

# SALIENT CHARACTERISTICS

## 1) Self-cath straight intermittent catheter 16fr 16"

## 2) Orthopedic Cotton Stockinette 4"x25 yds, Latex Free:

BSN Medical Specialist® Orthopedic Cotton Stockinette 4" x 25 yds, Latex-free.

Specialist® Orthopedic cotton stockinette consists of a high-grade absorbent cotton that is an ideal undercast layer. It stretches to three times its width to conform to complex anatomies. It is contained in an easy-to-use dispensing box for easy storage and handling.

## 3) Mepiform Self-Adherent Soft Silicone.

Mepiform® is a self-adherent soft silicone dressing for scar care and designed for the management of hypertrophic and keloid scars. Topical silicone has empirically been shown to have positive impact on hypertrophic and keloid scars. It may take from 3 months up to a year or more to improve an old scar, depending on the condition of the scar tissue. Mepiform shall optimally be worn 24 hours a day.

- Minimizes pain and trauma at dressing changes. No extra fixation is needed.
- Thin, flexible and discreet. May be worn in daily activities.
- May be cut to size and reapplied. One Mepiform® sheet may be used for several days.

## 4) Tubular Cotton Stockinette Dressing 25 yds x 4", Natural

Used as wrapping for fractures where single layers conform to shape of limb or body. Elasticity allows for swelling without discomfort. Dressing for vein ligations, plastic surgery procedures and with burn dressings. Used as a component of orthopedic appliances.

- Used under plaster casts for skin protection or as a component in orthopedic appliances
- Provides pressure to hold dressing in place.
- Latex-free.
- Non-sterile

## 5) Marathon® Liquid Skin Protectant, 1/2gm Vial

Marathon® Liquid Skin Protectant is a non-cytotoxic cyanoacrylate-based monomer that forms a remarkably strong protective layer over skin. It resists external moisture, yet it allows the skin to breathe. Use on intact skin to provide a barrier to breakdown, or to protect injured skin from adhesive trauma, moisture, incontinence and friction. Change frequency is up to three days, re-apply as needed.

- Robust, flexible and long-lasting.
- No-sting formula.
- Protects from the effects of friction
- Protects from moisture (urine, exudate, sweat, and other bodily fluids) that can cause maceration.
- Fast drying and breathable.

## 6) Kendall Argyle™ Yankauer Suction Tube With Regular Capacity Bulbous Tip, Rigid, Sterile

Argyle™ Rigid Surgical Suction Instruments and sets are transparent with smooth tips and eyes. They have shatter-resistant, one-piece construction and have an optional vent for better suction control.

## 7) Cardinal Health™ Gauze Sponge USP Type VII, Sterile 1s, Latex-Free, 12-Ply, 4" x 4"

Gauze Sponges are available in a premium quality with 100% cotton. Peel pouches and trays allow for easy opening, and a variety of counts meet your different needs. This is available in non-acute only.

- USP Type VII gauze.
- This easy open envelope is also carefully sealed to prevent the intrusion of dust and contaminants.
- Ideal for general wound care, packing, dressing and cleaning.
- Latex-Free. Sterile.

### **8) Merit Medical Systems Stafix® Percutaneous Drain Catheter Fastener, Large, Fits 12-24 Fr Catheter**

The StayFix® is a cost-effective, time-saving, needleless catheter securement device. It is specifically designed to stop migration, movement and accidental removal of the catheter.

### **9) Kendall Xeroform Sterile Non-Adherent Petrolatum Gauze Patch, 5" x 9"**

Xeroform Petrolatum Gauze is 3% bismuth tribromophenate in a special petrolatum blend on fine-mesh gauze. Non-adherent. Clings and conforms to all body contours.

- 3% bismuth tribromophenate in a special petrolatum blend on fine-mesh gauze.
- Occlusive.
- Clings and conforms to all body contours.
- Bacteriostatic action.

### **10) Smith & Nephew Acticoat™ Flex 3 Antimicrobial Barrier Dressing with Silcryst Nanocrystals 4" x 4"**

Smith & Nephew Acticoat™ Flex 7 Antimicrobial Barrier Dressing with Silcryst Nanocrystals is a highly conformable dressing that follows the body contours to maintain contact with the wound surface. The dressing is low adherent, which helps to minimize wound trauma at dressing changes. Nanocrystalline silver provides an effective barrier to microbial contamination. It allows fluid transport into the secondary dressing to minimize the risk of maceration.

- Nanocrystalline coating of pure silver delivers antimicrobial barrier activity within 30 minutes.
- Compatible as a wound contact layer with negative pressure wound therapy (NPWT) for a period of up to 3 days.
- Open weave structure facilitates the passage of fluid through the dressing and wicks away excess exudate.
- Polyester substrate helps manage moisture level and control silver release
- Effective barrier which may assist in preventing contamination of the wound.
- Versatile dressing that can be cut to the desired shape and size to wrap around all body parts.
- Sustained release of silver also means fewer dressing changes, resulting in less exposure of the wound bed to the environment.
- Provides potent, fast-acting, and long-lasting antimicrobial barrier control.
- Easy to apply and remove.
- Provides 3-day wear time.

### **11) Hollister Premier™ One-Piece Drainable Pouch, Up to 2-1/2" Cut-to-Fit Flat Flexlend® Skin Barrier, Integrated Closure, Beige**

**Pcs:** One

**Type:** Drainable, Extended Wear, Tape Border

**Stoma Opening:** Up to 2-1/2" Cut-to-Fit, Flat

**Size:** 12" L

**Filter:** No

**Backing:** Two-Sided ComfortWear Panel

**Color:** Beige

**Closure:** Lock N Roll® Microseal Closure

**Belt Tabs:** Yes

Hollister Premier™ Drainable Pouch with cut-to-fit Flexlend® skin barrier and tape - beige has integrated closure system which provides security that you can feel as the plastic fasteners lock into place. It is easy to close, empty and clean.

- Protects the skin over extended wearing time from irritating discharge.
- Flexlend® skin barrier is the barrier of choice for urostomies and ileostomies.
- Easy to close—simply roll it three times in the same direction, press from the middle out and feel the seal. Simple for all drainable pouch users including those with vision and dexterity problems.
- Easy to empty—lightly pinch the sides of the leak-proof outlet for easy control of content flow. Firm reinforcing strips shut as soon as you stop pinching. Simple to control the content flow from the pouch.
- Easy to clean—simply clean the inside of the pouch tail by wiping it with a damp tissue.
- Odor-barrier rustle-free film.

## **12) Coloplast SenSura® Click Wide Outlet Drainable Pouch, Filter, Integrated Closure, Transparent, 2-3/8" Flange, 3/8" to 2-1/4" Stoma**

**Pcs:** Two

**Type:** Drainable Wide Outlet

**Stoma Opening:** 3/8" to 2-1/4" Cut-to-Fit

**Flange:** 2-3/8"

**Size:** 12" L, 655mL, Large

**Filter:** Integrated Wave Filter

**Closure:** EasiClose™ Integrated Closure

**Backing:** Soft Cloth on Back

**Color:** Transparent

SenSura® Click Two-Piece combines the unique, double-layer adhesive with a removable bag. The bag is connected to the baseplate by a mechanical coupling system that gives a reassuring "click" when the bag is securely locked to the baseplate.

- Two-Piece system combines the revolutionary double-layer adhesive for optimal skin friendliness and protection with secure, click-lock technology.
- The double-layer adhesive is skin friendly and resistant to erosion from stoma output and body fluids.
- The mechanical coupling allows the bag to rotate to the best position.
- Visible blue cutting guides in relevant sizes make it easier for you to cut the adhesive accurately to ensure a safe seal around your stoma.
- The removal ear makes it easy to remove the adhesive without leaving residue on the skin.
- The coupling has been strengthened with a safety ring that gives a reassuring "click" when it is securely locked to the baseplate.
- The bag has an integrated wave filter that allows the air to flow to help keep your bag discreet and provide odor control.
- Integrated filter label can be opened or closed to reduce the effects of pancaking or ballooning.
- The soft, non-woven fabric is strong and water repellent, making it easier to dry the bag after a wash or swim.
- EasiClose™ outlet can be folded up and hidden away without the need for bulky clips.

## **13) ConvaTec SUR-FIT® Natura® Durahesive® 1-1/4" to 1-3/4" Moldable Skin Barrier, Convex, 2-1/4" Flange, 4-1/2" x 4-1/2"**

**Pcs:** Two

**Type:** Durahesive® Extended Wear, Tape Collar

**Stoma Opening:** 1-1/4" to 1-3/4" Mold-to-Fit, Convex

**Flange:** 2-1/4" Large

**Size:** 4-1/2" x 4-1/2"

**Belt Tabs:** No

The Natura® system is a comprehensive product line with our latest skin barrier technologies. The plastic coupling ring allows the pouch and skin barrier to snap together for audible security. Durahesive® and Stomahesive® skin barriers are designed for people whose stoma output is mostly liquid. Unlike other skin barriers that can break down around liquid output, Durahesive® skin barriers swell up or "Turtleneck" to better protect the stoma and peristomal skin. Convex is good for people with a retracted or flush stoma. Moldable allows for improved skin protection over traditional barriers and provides ease of use and versatility. It requires no cutting or measuring, which makes it easy to learn how to use.

- Provides added protection from liquid output.
- Barrier will turtleneck or gently swell up and hug the stoma, better protecting the skin around your stoma.
- Coupling ring provides audible click confirming secure connection to pouch.
- Starter hole rolls back to create opening for stoma.
- Designed to maintain a contoured fit during wear.

## **14) Coloplast Assura® Extra Two-Piece Skin Barrier, Extra-Extended Wear, Belt Tabs, 2-3/8" Flange, Cut-to-Fit 5/8" to 1-3/4" Stoma**

**Pcs:** Two

**Type:** Extra-Extended Wear, Round, Transparent Adhesive

**Stoma Opening:** 5/8" to 1-3/4" Cut-to-Fit. Convex

**Flange:** 2-3/8" Blue

**Belt Tabs:** Yes

Assura® Extra is a highly cohesive adhesive formulation. This means the barrier itself remains intact over time and minimal erosion/washing out occurs, which helps increase wear time and means less residue when removed. During use, the adhesive barrier will swell. It then conforms better to the skin, ensuring security and leak resistance. Assura® Extra contains proprietary natural and synthetic polymer adhesives. When combined, these absorptive properties ensure wear time significantly longer than the Assura® Standard adhesive. Because of the adhesive strength, overall surface area could be minimized, thereby ensuring maximum flexibility and comfort.

- Unique, transparent adhesive provides security and flexibility, while preserving the integrity of the surrounding skin.
- Security: during use, the adhesive barrier will swell. It then conforms better to the skin, ensuring security and leak resistance.
- Assura® Extra contains proprietary natural and synthetic polymer adhesives. When combined, these absorptive properties ensure wear time significantly longer than the existing Assura® Standard adhesive.
- Barrier is highly absorbent and more resistant to erosion.

**15) Coloplast Conveen® Security+ Contoured Leg Bag, 21 oz, Pre-Attached 18" Anti-Kink Tubing, Anti-Reflux Valve, Latex-Free, Soft Cloth Backing**

Coloplast® Conveen® Security+ Contoured Leg Bag With 18" Tubing. Deluxe leg bag with pre-attached, adjustable, antikink tubing; secure, user-friendly closure; Antireflux valve; soft cloth backing and low-profile contours.

- Low-profile design hugs the leg for ultimate discretion.
- Soft, absorbent fabric backing keeps skin cool and dry.
- Anti-reflux valve prevents backflow.
- Latex-free straps are constructed of soft fabric for greater patient comfort.
- Durable, reinforced channel linings provide extra security.
- Packaged complete with straps and pre-attached, anti-kink tubing for simplified ordering.
- Latex-free

**16) Hollister Sterile Vented Urinary Leg Bag System Combination Pack Large 30 oz, 11-1/8"**

Includes Contains 1 vented leg bag, 1 extension tubing (18") with vacuum relief valve, and 1 pair of fabric leg bag straps (23").

Urinary leg bag combination pack safely and easily conducts urine through its drain valve. Easy to open, closes securely even with limited dexterity. Protects skin from pressure points by placing leg strap connectors and drain valve away from direct contact with leg. Pleated sides increases the volume but not the length.

- Soft, durable vinyl.
- Quality materials result in soft, comfortable, durable bags.
- Pleated sides increase the volume but not the length.
- Protects skin from pressure points by placing leg strap connectors and drain valve away from direct contact with leg.
- Safely and easily conducts urine through its drain valve; easy to open, closes securely even with limited dexterity.
- The leg bag has integral connector buttons that are positioned in such a way as to not touch the skin.
- Drain valve permits the user to empty the pouch or leg bag without getting fingers wet.
- Anti-reflux valve-One way flow valve integral to the construction of a sheath or pouch that prevents flow back toward the skin.

**17) Kendall Texas Catheter™ Self-Sealing Male External Catheter, Latex with 1" Elastic Foam Strap, Standard Size**

Dover™ One-Piece Male External Catheter Standard 1" Self Sealing, Texas Style, With Elastic Foam Strap

The Dover™ Texas style male external catheter features a soft, lightweight latex. The Dover™ male external catheter features a natural latex rolled sheath with a soft tip.

- Dual function drainage connector.
- Molded one-piece construction.
- Large diameter connector.

- Large reinforced funnel area.
- Dover™ Texas style male external catheter uses soft, lightweight latex.
- Individually packaged.

### **18) Coloplast Freedom Cath® Male External Catheter with Kink-Resistant Nozzle, Large, 35mm**

The Coloplast Mentor Freedom Cath® is a self-adhering, one-piece latex catheter for secure everyday use. Combines a comfortable latex sheath with a wide, watertight adhesive seal. Freedom Cath® is applied simply by rolling it on. No need to apply adhesive tapes.

- Latex, self-adhering, one-piece.
- Made of soft, stretchable latex to keep you comfortable and secure during normal, everyday use.
- Combines a comfortable latex sheath with a wide, watertight adhesive seal.
- No straps that constrict.
- Self-adherence of the Freedom Cath® makes application easy - simply roll it on with no adhesive tapes needed.
- Double-thick bulb and stem prevent kinking and twisting of the catheter.

### **19) Teleflex MMG™ Closed System Intermittent Catheter Kit, Soft, Straight, 14Fr**

The kit contains:

- 1 Intermittent Catheter
- Gauze tissue
- BZK antiseptic towelette
- 2 vinyl gloves
- Underpad

The Rusch/MMG™ Intermittent Catheter has been proven to reduce urinary tract infections. Medical studies prove that MMG™ users are nine times less likely to contract UTI's than those using other conventional methods. Our soft silicone "introducer" tip shields the catheter through the tip of the urethral opening bypassing the majority of urinary tract bacteria. No gloves are needed. The self-contained intermittent catheter system is fully protected within its own closed sterile field. It is pre-lubricated, the catheter and soft silicone "Introducer" tip are both coated with non-allergenic, water-soluble lubricant for easy insertion. No separate lubrication procedure is needed. The MMG™ system's vinyl catheter drainage eyelets are recessed and polished and the tips are tapered assuring smoother glide passage through the urethra. The self-contained urine collection bag eliminates the need for separate containers, thus reducing the risk of spillage and allowing for ease of disposal.

- Fully enclosed system.
- Polished, recessed eyelets.
- Tapered catheter tip.
- Designed to reduce UTI recurrence.
- Guardian™ Tip protects catheter from contamination.
- No gloves required.
- Unique patented break-away funnel end provides a safe and easy urine sampling procedure.
- Sterile.
- Single use.
- Latex-free

### **20) Bard Tracheal Suction CATH N SLEEVE™ Kit 14Fr, Sterile**

Bard Tracheal Suction CATH N SLEEVE™ Kit 14Fr, Sterile, Contains 22" Plastic Suction Catheter in Clear Plastic Sleeve and Pop-up Solution Container in Peel-Open Package

Suction catheters are flexible, long tubes used to remove respiratory secretions from the airway. The purpose of suctioning is to keep the airway clear of secretions and to prevent plugging. One end of the suction catheter is connected to a collection container (suction canister) and a device that generates suction. The open end is advanced through the airway (endotracheal or tracheostomy tube) to remove secretions. The CATH 'N SLEEVE™ Kit has a clear plastic sleeve that envelopes a plastic suction catheter. The sleeve slides over exudate to reduce potential clinician contact.

- Thumb valve permits continuous or intermittent suction.
- Single-use.
- Contains Cath 'N Sleeve™ device and pop-up solution container in peel-open package.
- Sterile.

### **21) Coloplast Self-Cath® Intermittent Catheter, Male Straight Tip, Curved Pack, 14Fr 16"**

The Self-Cath® family of 100% Latex-free catheters offers patients a variety of options for intermittent self-catheterization. Each catheter is made with the highest quality standards dedicated to patient comfort and ease of use. The fire-polished eyelets and siliconized surface allow for smooth insertion. Self-Cath® intermittent catheters are available in a wide variety of sizes and styles.

- 100% Latex-free.
- Fire-polished eyelets.
- Siliconized surface for smooth insertion.

### **22) Coloplast Self-Cath® Male Intermittent Catheter with Guide Strip, Olive Coude Tip, PVC, 12Fr, 16" L**

Coloplast Self-Cath® Male Intermittent Catheter with Guide Strip 12Fr, 16" L, PVC, Olive Coude Tip, White Funnel End, Sterile, Latex-Free

Self-Cath® olive tip coude intermittent catheter with guide strip is Latex-free, sterile with fire-polished eyelets and a siliconized surface for smooth insertion and has a funnel end. The Guide Strip allows for monitoring of catheter tip position during insertion and removal.

- Guide strip for safe insertion.
- For monitoring of catheter tip position during insertion and removal.
- Additional guide strip helps to promote easier insertion up to the bladder, and minimizes injury that may occur from using other intermittent catheters.
- Helps to reduce an allergic reaction from occurring and helps to promote healthier skin and bladder functions.

### **23) Coloplast Self-Cath® Intermittent Catheter, Coude with Guide Strip, 14Fr 16"**

**Type:** Intermittent

**Tip:** Coude, Funnel End

**Lubrication:** No

**Material:** Latex-Free

**Size:** 14 Fr

**Length:** 16"

Mentor Self-Cath® Tapered Tip Coude Intermittent Catheter with guide stripe is 100% latex-free with fire-polished eyelets and a siliconized surface for smooth insertion. This catheter features a guide stripe which assures proper placement of the angled coude tip.

### **24) Self-Cath Coude Olive Tip Intermittent Catheter 16 Fr 16"**

16 fr 16" coude tipped catheter with olive tip.

### **25) Coloplast Self-Cath® Male Intermittent Catheter with Straight Tip 14Fr 16"**

Hydrophilic-Coated, Smooth Insertion, Latex-Free

### **26) Self-Cath Coude Olive Tip Intermittent Catheter 14 Fr 16"**

14 french 16" coude tipped catheter with olive tip.

## 27) OmniPod® Pods for the New OmniPod® System

The new OmniPod® System has the same unique features you love - but now there's even more built in. Improvements were made to the Pod to give you even more confidence and convenience in your diabetes management. See what some of the new Pod features can mean to you.

### Benefits:

- **Added Comfort and Discretion** - The Pod is smaller, slimmer and lighter. With the new design you can be even more discreet with your site placement, dress more freely, and feel greater comfort whether you're lounging around or running around.
- **Increased Confidence and Safety** - The Pod's pink slide insert is an additional safety feature to help you determine whether the cannula has deployed. When you apply a new Pod you can check to make sure you can see the pink slide insert through the top of the Pod.
- **More Convenient Pod Changes** - Prepping your new Pods for start-up is now even easier. The Pod's needle cap cover is larger so it's easier to remove when opening a new Pod. And because there are now 2 ports visible on the back of the Pod, we've included an arrow pointing to the fill port to help ensure that the insulin is filled properly.

### Features:

- Pod Size - 1.53 in x 2.05 in x 0.57 in (3.9 cm x 5.2 cm x 1.45 cm)
- Pod Weight - 25 g with empty reservoir.
- Pod Fill Port and Adhesive - There are 2 ports visible on the bottom of the Pod. An arrow printed on the adhesive points to the fill port.
- Pod's "Slide Insert" Feature - Pink slide insert is visible through Pod and lets you know the cannula has fired.
- Pod Cannula Color - Cannula tinted light blue.

## 28) Dexcom G4 Platinum Sensor Kit, For Use with Dexcom G4 Platinum Receiver Kit

Dexcom G4 Platinum Sensor Kit, For Use with Dexcom G4 Platinum Receiver Kit

- Dexcom G4 platinum sensor is a round, comfort-design, making it flexible, comfortable, and body-friendly.
- Sensor is designed to deliver exceptional sensing and outstanding performance to help drive decisions.
