

It was brought up at the job walk that the Cortina Grande does not come in 18x18 but the engineer of this project was adamant that it does. I've done research since the walk including talking to the manufacturer Johnsonite and they have confirmed that it only comes in 16x16.

For bidding purposes how should we proceed.

All products shall be bid brand name or equal, and the specification has been amended to provide for 16"x16" SVT. Updated SOW attached.
