1	1		<p>Discovery XR656 Plus 2D</p> <p>Discovery XR656 Plus Base System with TWO FlashPad Detectors</p> <p>The Discovery XR656 Plus is an advanced digital radiographic imaging system that provides excellent image quality, a variety of image manipulation and post-processing tools as well as the option to utilize GE Healthcare's exclusive advanced clinical applications. Powered by FlashPad, GE's wireless digital detector, workflow is streamlined with TWO portable detectors that can be used in the table, wall-stand or freely to best accommodate most 2D exam requirements as well as advanced radiographic requirements.</p> <p>At its core, the Discovery XR656 Plus delivers improved productivity through an efficient and intuitive workflow. The base system comes equipped with a systems cabinet, acquisition review workstation, image processing tools, short-term storage and quick in-room viewing of images. Also included is a host of networking and connectivity options, dose reporting and system maintenance. These features are designed to make this system easy to use and reliable while providing high quality radiographic images in a digital environment.</p> <p>The Discovery XR656 Plus's core</p>			

Item No.	Qty	Catalog No.	Description	Contract Price	Discount	Ext Sell Price
			<p>feature set can help streamline even the toughest exam. Consistent image quality helps reduce retakes, and unique image processing helps save time. With DICOM connectivity, the Discovery XR656 Plus connects easily to HIS, RIS or PACS for efficient data transfer.</p> <p>The Discovery XR656 Plus base system includes:</p> <p>Two wireless Digital Detectors with batteries and optional tether.</p> <ul style="list-style-type: none"> <li>• Single panel (non-tiled) amorphous silicon detector with a Cesium Iodide scintillator and two handgrips that facilitate easy positioning and a secure grip.</li> <li>• Wireless connectivity through Ultrawide Band Technology for fast, efficient and secure communications between the detector and the base system.</li> <li>• Image area 40.4 cm x 40.4 cm (15.9 in. x 15.9 in.)</li> <li>• Active matrix 2022 x 2022 pixels.</li> <li>• Pixel pitch 200 microns.</li> <li>• Typical upper dynamic range 7.8 mR @ RQA5.</li> <li>• Typical DQE 68 @ 0lp @ RQA5.</li> <li>• Weighs 4.32 kg (9.52 lb.) without battery, 0.18 kg (0.40 lb.) battery weight.</li> <li>• Dimensions: L 580 mm, H 452 mm, T 24 mm.</li> </ul>

- Can support up to 160 kg (352 lb.) of distributed load.
- Battery or tethered operated. Includes two rechargeable and exchangeable batteries and 7 m cable (4 m or 10 m optional) for optimal connectivity and power.
- One 6:1 clip-on grid for FlashPad detectors.
- Battery allows for 150 images to be taken in 3 hours.
- QAP (Quality Assurance Procedure)
- FlashPad detector can support Advanced Applications that are options available on the Discovery XR656

#### Acquisition Workstation

The Acquisition Workstation is the primary interface to the network and provides image post-processing capabilities. The System Controller Module provides single point control, directing and coordinating overall system operation, while monitoring all system modules automatically through software.

The Acquisition Workstation includes:

- Two 19-inch Flat Panel Monitors that help minimize desktop space required.
- Keyboard and Mouse
- CPU Tower with 6GB RAM, 320 GB of hard drive storage and capacity for over 22,000
