TBS INSIGHT	TBS iNsiGht® (Horizon System only) TBS iNsiGht is a unique DXA application to assess bone micro-architecture in routine clinical practice. TBS – Trabecular Bone Score – is measured directly from DXA scans in one click and so the clinician may now integrate micro-architecture in fracture risk evaluation. TBS is the missing link in osteoporosis diagnosis, fracture prognosis and patient's follow-up.
TBS INSIGHT DICOM	Enable TBS iNsiGht users to save TBS reports in DICOM format and store it on PACS systems with the patient file exams.
