

Enabling you to connect.®

Keep your Residents Connected

Technology that Exceeds Expectations

Today's households are plugged in. The average person owns any number of smart phones, tablets and laptops, and they want to live in a place that delivers the connectivity they need. Wi-Fi, high-speed Internet, access to HD entertainment -- these amenities once considered "premium" are now the expectation, and if you can't deliver, someone else will.

Powernet has the solutions and experience needed to provide guests the top-notch services they demand. We can transform your units into "smart" buildings with improved Wi-Fi, Internet, television and phone services at competitive rates, **consolidating your communications network across one company and offering guests improved technology solutions.**

We take a consultative approach to designing, installing and deploying your network, utilizing Wi-Fi technology to improve efficiencies and enhance resident services throughout the complex at a fraction of the cost of traditional Wi-Fi. We will also work with you to customize phone, Internet and TV solutions to help you meet your budget and your residents' expectations.

About Powernet

Powernet enables businesses to connect with audiences around the world through wireless networking, voice, data and call center solutions in addition to carrier services. **As a Woman-Owned business with more than 24 years of telecom experience** and expert sales and support teams operating out of our Cincinnati, Ohio headquarters, we provide our partners and clients the unparalleled service and innovative technology they need to achieve their goals.
