A-08	Wireless Synchronized Clock System	1	As manufactured by Peter Pepper OR EQUAL #WCMNT5-2.4 2.4GHz Transmitter, syncTECH Network Time Protocol Master Clock, Obtains Time from Local or Internet Time Servers via the On-Board Ethernet Interface Card** Size: 9 1/2"w. x 5 1/5"d. x 2 1/2"h.

Performance Specification: For use with Item #A-07 and #EX-04, Wall Clock with Batteries. The 2.4 GHz Wireless Synchronized Time System provides a multi-path mesh network for clock-to-clock transmission of synchronized time, eliminating the time related issues and liabilities associated with manual time setting. The easy-to install system will provide years of trouble free service without the cost of expensive wiring. The master transmitter obtains time updates from a network timeserver or optional GPS receiver. The time signal is then broadcast to all clocks once per second. Automatic Daylight Savings Time adjustments. Each battery-operated clock transmits up to 150 feet in all directions, repeating the synchronized time signal clock-to-clock, throughout an entire facility.

2.4GHz Transmitter included on all master clocks. No FCC License required. The standard 2.4 GHz transmitter is sufficient for most single commercial building construction. Site plan/surveys are available to help determine your exact needs. Contact the factory. Ethernet connector supplied for NTP time acquisition. Accurate to a fraction of a second over 10 years. Operating temperature: 32 degrees Fahrenheit - 120 degrees Fahrenheit. Humidity: 0-95% non-condensing. Power Requirements: 110V AC. UL listed wall 'plug-in' type. 10-year lithium battery back up.

Note: **Internet service is required and not included with the PPP Wireless Synchronized Time System.

A-11	Single Monitor Arm	283	As manufactured by Teknion #YMSTD12 MAST Dynamic Arm, Single, Standard Edge Clamp with Wire Management Finish: Standard

Performance Specification: Dynamic Arm, MAST provides a visually and technically sophisticated solution that addresses present needs for flexible monitor support but also anticipates future requirements and the ongoing evolution of workplace technology. Designed to meet and exceed ergonomic standards, a wide range of adjustability promotes healthy posture and user comfort. At the same time, adjusting MAST is simple and intuitive. The Dynamic Arm provides full range fingertip height adjustment to accommodate user height or environmental factors, such as available light. The Dynamic Arm is a load balanced lift assist arm that provides simple, rapid and smooth adjustment via a balance mechanism that counters a large range of monitor weights. All MAST arms include a quick release VESA plate, highlighted by its signature Library Green color smart Tab, creating an easily understood and friendly user experience that speeds up monitor installation and on-the-fly monitor changes. **Dynamic Arm:** Smooth height adjustment and user feedback gauge for balancing; Load balanced lift assist mechanism for monitor height adjustment; Vertical adjustment range of 12 inches; Discreet raceway concealed in the underside for wire management; Custom single and dual hubs designed for maximum product performance; Mounts to stanchion using primary connector enabling same configuration options as Manual Arm. MAST has been developed and manufactured to meet DfE standards and guidelines. The MAST family of monitor support arms and accessories has been designed and extensively tested to be compatible with the sustainable goals of today’s architects, designers and end-users. The exceptional adaptability of the MAST product ensures a long life cycle, a key measure of sustainability. MAST is able to accept a wide range of monitors and tablets and integrates with virtually any workstation. Equally, MAST incorporates environmentally sound materials and finishes and is engineered for maximum re-use of parts, thus reducing costs and creating minimal waste. MAST can contribute to LEED credits for building projects for Commercial Interiors, New Construction and Existing Buildings: Operations & Maintenance. A PVC- and lead-free product. MAST is manufactured from recycled aluminum and steel. MAST is manufactured using 36 percent pre-consumer and 12 percent post-consumer recycled aluminum as well as 20% pre-consumer and 41% post-consumer recycled steel. MAST is 100% recyclable. Requires minimal packaging. GREENGUARD® Certified.

A-13	White Board - Mobile	38	As manufactured by KI #ATS44854FHC/MB/4CW/SX All Terrain® Screens Full-Height Core with Four-Point Base Markerboard Core (Painted Steel) - Four-Point Base (MB) with Four Casters (two locking, two swivel) Size: 48"w. x 16"d. x 54"h. Finish: Frame Finish - #SX Starlight Silver Metallic Markerboard - White Porcelain

Performance Specification: **Markerboard Core:** The markerboard core shall be constructed of 20-gauge painted steel adhered to both sides of a corrugate core to a finished thickness of 1/2". The paint shall be color-matched to the white porcelain paint finish of other KI markerboard products. The core shall be trapped in the screen framework. **Castors:** Castors shall be available for the screen. Four large twin-wheel castors shall be constructed with 70mm (2-3/4") diameter black tread and KI Glacier white hub. Castors shall have a swivel radius of 2-1/2". When four castors are specified, two locking and two swivel castors are used. **Screen Frame:** The framework shall be constructed of extruded aluminum horizontal and vertical members. The framework shall have a powder-coat finish. **Magnetic Edge Trim:** The magnetic edge trim shall be constructed of rubber magnet extrusion. It shall be held in place by the vertical frame extrusion. The magnetic trim shall provide a means of tool-less and component-less linking of screens. Magnetic trim shall provide linking at any angle. Magnetic trim shall provide linking between two screens, between three screens, and between four screens, allowing for three-way and four-way connections. **Full-Height Core Screen:** The full-height core screens shall extend from the top of the screen's framework to the bottom of the screen's framework.

A-20	Mirror - Locker Room	1	<p>As manufactured by Mirrorlite® OR EQUAL #GGM-24-72 Surface Mounted, Glassless Mirror</p> <p>Size: 24"w. x 1"d. x 72"h.</p> <p>Finish: Mirror Film (wraps around surface and frame) - Polyester; Frame - Aluminum</p> <p>Performance Specification: Wall Mount Glassless Mirror is a lightweight, shatterproof mirror that can be used in place of traditional glass mirrors. Glassless Mirrors come pre-drilled and are supplied with mounting brackets. Easy assembly. Technical Description: Glassless Mirrors consists of a rigid foam core framed by an aluminum extrusion. The frame has a raised lip around the four edges. A polyester film, aluminized on the back side, is stretched across the raised edges to form the mirror surface. Because the film is mounted on raised edges, an air space is created between the back of the film and the core. This air space, 1/8", allows the film to flex under minor impact with- out damage.</p>

A-25	Mobile White Board - (36")	6	As manufactured by KI #ATS43654FHC/MB/4CW/SX All Terrain® Screens Full-Height Core with Four-Point Base Markerboard Core (Painted Steel) - Four-Point Base (MB) with Four Casters (two locking, two swivel) Size: 36"w. x 16"d. x 54"h. Finish: Finish: Frame Finish - #SX Starlight Silver Metallic Markerboard - White Porcelain

Performance Specification: **Markerboard Core:** The markerboard core shall be constructed of 20-gauge painted steel adhered to both sides of a corrugate core to a finished thickness of 1/2". The paint shall be color-matched to the white porcelain paint finish of other KI markerboard products. The core shall be trapped in the screen framework. **Castors:** Castors shall be available for the screen. Four large twin-wheel castors shall be constructed with 70mm (2-3/4") diameter black tread and KI Glacier white hub. Castors shall have a swivel radius of 2-1/2". When four castors are specified, two locking and two swivel castors are used. **Screen Frame:** The framework shall be constructed of extruded aluminum horizontal and vertical members. The framework shall have a powder-coat finish. **Magnetic Edge Trim:** The magnetic edge trim shall be constructed of rubber magnet extrusion. It shall be held in place by the vertical frame extrusion. The magnetic trim shall provide a means of tool-less and component-less linking of screens. Magnetic trim shall provide linking at any angle. Magnetic trim shall provide linking between two screens, between three screens, and between four screens, allowing for three-way and four-way connections. **Full-Height Core Screen:** The full-height core screens shall extend from the top of the screen's framework to the bottom of the screen's framework.

EX-03	Medical Storage Cart, Mobile	4	As manufactured by Herman Miller OR EQUAL Each to Consist of:
		(1)	#E0948B General Medical Storage Mobile Cart, Cart Body - Style-B Narrow with Raised Edge Top, (2) 3"h. Drawers, (4) 6"h. Drawers, (1) Side Accessory Rail
		(2)	#CT580.03 Drawer Organizer Kit for 20" Wide, 3" Deep Drawers
		(4)	#CT575.06 Drawer Organizer Kit for 20" Wide, 6" Deep Drawers Size: 32"w. x 22"d. x 42"h. Finish: Cart and Drawers - #LU Soft White

Performance Specification: Designed for heavy use. Made of highly durable, impact-resistant plastic with color integrated, so there is no color chipping, fading, denting, or rusting, even if surfaces are scratched. The carts' steel frame is covered with the same material. Drawers extend fully without wobbling or falling, increasing the efficiency of stocking and restocking. Tops are sturdy, built as part of the cart—not a slip-on addition. Carts come with a 12-year, 3-shift warranty that far exceeds the industry standard. Procedure/supply carts are designed to help control infection control. All interior components and accessories can be removed from the cart body, making every surface—inside and out—accessible for cleaning. Drawers can be cleaned in a washer. Surfaces can be cleaned without danger of rusting or surface damage. The smooth, rounded edges of the carts and components are easier to clean than sharp angles. And because carts and components are plastic, there is no chance of paint contamination. Ergonomic design, rounded corners, and a surface material that is softer than metal add up to a user-friendly design. Thoughtful design details include edges and pulls that are smooth and sturdy. The carts' lighter weight and sturdy casters ease mobility and movement over door and elevator thresholds and when quick response is essential.

FC-01	Mobile Pedestal (B/F)	82	As manufactured by Teknion #LPWN-BF-28-15-D1-A-25-R Ledger Mobile Pedestal in Box, File Configuration with Metal Front Finish Style, Full Pull Finished to Match File Front; Includes (1) Pedestal/Case, Drawers, 4 Large Casters, Locking Front Casters, Counterweight, Lock and Key, (1) Pencil Drawer, (1) Drawer Divider, (1) Hanging File Bar and (1) A4/Letter Conversion Rail

Size: 15"w. x 28"d. x 23-4/5"h.

Finish: Foundation Paint #25 Crisp Grey

Performance Specification: Drawer interiors extend the full interior depth of the pedestal except for 28" deep box, which has an interior drawer depth of 22". Mobile pedestals are equipped with large casters that allow for easy movement within a workstation. Pedestal file drawers accommodate both imperial and A4 filing sizes. Counterweights are included, standard. If pedestals are supporting a worksurface in a freestanding application, counterweights are required. Paint color must match for all Teknion items specified.

Note: Pedestals to be keyed randomly.

FC-05	Lateral 2-Drawer File Cabinet	11	As manufactured by Teknion #LLF20-B-18-36-D1-A-25-R-W2 Ledger 2-High Binder-Height Lateral File with Counterweights; Metal Front Finish Style; Full Pull Finished to Match File Front; Includes (1) Cabinet Case, (2) Binder Drawers, Hanging File Bars, Counterweights, Lock and Key, with Levelers Size: 18"w. x 36"d. x 28-4/5"h. Finish: Foundation Paint #25 Crisp Grey Note: File cabinets to be keyed randomly.

Performance Specification: All drawer heights are based on a 1.6" module (the size of the posting shelf), then 3.2", 4.8", 6.4" up to 16". Label holders are included with full pull fronts to clearly identify the contents of each drawer. Binder-height support binder in all drawing openings, as well as hanging files. Levelers have 1" leveling range. A patented interlocking system prevents more than one drawer opening at a time to guard against tipping. Adjacent drawers align for a continual datum line. The interior construction of the case permits drawer reconfiguration or retrofit at any time. Paint color must match for all Teknion items specified.

Installation.
 Unless otherwise specified, Seller assumes no obligation to install any products sold or to place any products in working order at Buyer's premises. In the event that Seller's products are installed by Seller or its designated third-party installer, such installer shall be responsible for any direct damages incurred by Buyer in the event of improper installation or the installer's negligence. Seller or its designated third-party installer shall not, however, be liable hereunder for any incidental, indirect or consequential damages arising out of the installation of the products. If Buyer designates the installer, Seller shall have no liability arising out of or in connection with the installation of the products, and Buyer hereby waives any such claims against Seller.
