

The purpose of this amendment is to respond to questions regarding the Sources Sought/RFI. Listed below are the questions and the government's response.

1. I have a question with regard to the Industrial Hygiene Services RFI (36C25618Q9175). In #4 of the scope of services document, the document indicates the response format is to be in Microsoft Word. Is Microsoft Word required or is a PDF document acceptable? Some of our company documentation does not use Microsoft Word and cannot be converted to Word format.

Response: We prefer submission in Microsoft Word, because PDF files are sometimes inaccessible; due to our network security. If you elect to submit in PDF format, we may be unable to read it.

2. Training Question: Are the employees in various occupations at the hospital or engineers who oversee asbestos procedures/inspections. The training would be tailored according to the context of each involved. The training could also include hazard awareness training for various airborne contaminants in a hospital environment.

Response: Most of the staff will be engineering maintenance personnel and housekeeping. However, there may be an engineer or two or construction specialists in attendance.
