Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Active records are maintained in individual folders stored in file cabinets. File cards with name and business addresses of individuals covered by this system are maintained in file cabinets. Listings of accredited representatives and claim agents are maintained both on magnetic disk and in hard copy in file cabinets. Identification codes and codes used to access various VA automated communications systems and records systems, as well as security profiles and

possible security violations, are maintained on magnetic media in a secured environment within VA workspaces. Hard copies are maintained in locked containers.

Retrievability:

Records and file cards are maintained in alphabetical order by last name of the individuals covered by this system. Information concerning possible security violations associated with exercise or remote access privileges is retrieved by individual assignment numbers. Information concerning individual security profiles and codes assigned to an individual for that person to obtain access to various computer systems is retrieved by the individual's assignment number.

Safeguards:

1. Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

2. Access to Automated Data Processing files is controlled at two levels: (1) Terminals, central processing units, and peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected; and (2) the system recognizes authorized users by means of an individually unique password entered in combination with an individually unique user identification code.

3. Access to automated records concerning identification codes and codes used to access various VA automated communications systems and records systems, as well as security profiles and possible security violations is limited to designated automated systems security personnel who need to know the information in order to maintain and monitor the security of the VA's automated communications and veterans' claim records systems. Access to these records in automated form is controlled by individually unique passwords/codes. Agency personnel may have access to the information on a need to know basis when necessary to advise agency security personnel or for use to suspend or revoke access privileges or to make disclosures authorized by a routine use.

4. Access to VA facilities where identification codes, passwords, security profiles and possible security violations are maintained is controlled at all hours by the Federal Protective Service, VA or other security personnel and security access control devices.

Retention and disposal:

Records are maintained as long as the individual is an active accredited representative or claims agent. Once the representative or agent becomes inactive, the inactive records are maintained by the Veterans Affairs Central Office, Records Management Section for 3 years and then destroyed. Rejected applications, investigative material, and related correspondence are permanently maintained in the Office of General Counsel for 10 years and then destroyed.

2. Disclosure may be made of blood availability, location, quantity on hand, and blood type for use by the area donor collection coordinators to answer and fill requests from health care facilities in need of type-specific blood.

3. In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

4. A record from a system of records maintained by this component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper documents, magnetic tape, disk.

Retrievability:

1. All VA blood donor manual records are indexed by name and social security number of donor, cross-indexed by blood type.

2. Automated records are indexed by name, social security number, blood type, antibodies and date of last donation.

Safeguards:

1. Access to VA working space and medical record storage areas is restricted to VA employees on a "need to know" basis. Generally, VA file areas are locked after normal duty hours and are protected from outside access by the Federal Protective Service. Employee file records and file records of public figures or otherwise sensitive medical record files are stored in separate locked files. Strict control measures are enforced to ensure that disclosure is limited to a "need to know" basis.

2. Strict control measures are enforced to ensure that access to and disclosure from all records including electronic files are limited to VA employees whose official duties warrant access to those files. The system recognizes authorized employees by a series of individually-unique passwords/codes, and the employees are limited to only that information in the file, which is needed in the performance of their official duties.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are stored in paper folders, microfiche, magnetic discs, magnetic tape, and on file cards, X-rays, or other medical reports and forms. These records are stored in VA medical, personnel, dispensary, health, safety or other designated offices at Central Office and field facilities. Information in the Decentralized Hospital Computer Program (DHCP) system is stored at health care facilities.

Retrievability:

Records are retrieved by the employee's name, date of birth, social security number, or any combination of those identifiers.

Safeguards:

Records are stored in locked file cabinets or locked rooms. Generally, file areas are locked after normal duty hours. Automated records are protected by restricted access procedures and audit trails. Access to Employee Medical File System records is strictly limited to VA or contractor officials with a bona fide need for access to the records. Strict control measures are enforced to ensure that access to and disclosure from these records are limited to a "need-to-know basis." In VA Central Office these records are maintained in staffed rooms during working hours. During nonworking hours, there is limited access to the building with visitor control by security personnel. Access to the DHCP computer rooms within the health care facilities is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. Automated data processing peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected. Information in the DHCP system may be accessed by authorized VA employees. Access to file information is controlled at two levels; the system recognizes authorized employees by a series of individually unique passwords/codes as a part of each data message, and the employees are limited to only that information in the file which is needed in the performance of their official duties. Drug testing records will be maintained in accordance with the Urgent Relief for the Homeless Supplemental Appropriations Act of 1987, Pub. L. No. 100-71, Section 503, 101 Stat. 468 (1987). Contractor laboratories are subject to the same restrictions as VA employees.

Systems exempted from certain provisions of the act:

Under 5 U.S.C. 552a(j)(2), the head of any agency may exempt any system of records within the agency from certain provisions of the Privacy Act, if the agency or component that maintains the system performs as its principal function any activities pertaining to the enforcement of criminal laws. The Inspector General Act of 1978, Pub. L. 95-452, mandates the Inspector General to recommend policies for, and to conduct, supervise and coordinate activities in the Veterans Administration and between the Veterans Administration and other Federal, State and local governmental agencies with respect to all matters relating to the prevention and detection of fraud programs and operations administered or financed by the Veterans Administration and to the identification and prosecution of participants in such fraud. Under the Act, whenever the Inspector General has reasonable grounds to believe there has been a violation of Federal criminal law, the Inspector General must report the matter expeditiously to the Attorney General.

This system of records has been created in major part to support the criminal law-related activities assigned by the Inspector General to the Office of Investigations. These activities constitute the principal function of this staff.

In addition to principal functions pertaining to the enforcement of criminal laws, the Inspector General may receive and investigate complaints or information from various sources concerning the possible existence of activities constituting noncriminal violations of law, rules or regulations, or mismanagement, gross waste of funds, abuses of authority or substantial and specific danger to the public and safety. This system of records also exists to support inquiries by the Assistant Inspector General for Investigations into these noncriminal violation types of activities.

Based upon the foregoing, the Administrator of Veterans Affairs has exempted this system of records, to the extent that it encompasses information pertaining to criminal law-related activities, from the following provisions of the Privacy Act of 1974, as permitted by 5 U.S.C. 552a(j)(2):

- 5 U.S.C. 552a(c)(3) and (4);
- 5 U.S.C. 552a(d);
- 5 U.S.C. 552a(e)(1), (2) and (3);

5 U.S.C. 552a(e)(4)(G), (H) and (I);
5 U.S.C. 552a(e)(5) and (8);
5 U.S.C. 552a(f);
5 U.S.C. 552a(g).

The Administrator of Veterans Affairs has exempted this system of records, to the extent that it does not encompass information pertaining to criminal law-related activities under 5 U.S.C. 552a(j)(2), from the following provisions of the Privacy Act of 1974, as permitted by 5 U.S.C. 552a(k)(2):

5 U.S.C. 552a(c)(3);
5 U.S.C. 552a(d);
5 U.S.C. 552a(e)(1);
5 U.S.C. 552a(e)(4)(G), (H) and (I);
5 U.S.C. 552a(f).

Reasons for exemptions: The exemption of information and material in this system of records is necessary in order to accomplish the law enforcement functions of the Office of Inspector General, to prevent subjects of investigations from frustrating the investigatory process, to prevent the disclosure of investigative techniques, to fulfill commitments made to protect the confidentiality of sources, to maintain access to sources of information and to avoid endangering these sources and law enforcement personnel.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. In the event that a system of records maintained by this agency to carry out its function indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto,

the relevant records in the system of records may be referred, as a routine use to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigation or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

2. To provide statistical and other information in response to other legitimate and reasonable requests as approved by appropriate VA authorities, such as the release of information under the Freedom of Information Act.

3. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

4. Disclosure may be made to NARA (National Archives and Records Administration) GSA (General Services Administration) in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper documents, magnetic tape and disks. Retrievability: Folder files are filed by name, automated records are indexed by social security number within station.

Safeguards:

1. Physical Security. The VA Central Office is protected from outside access by the Federal Protective Service. All file areas are restricted to authorized personnel on a need-to-know basis. Hard copy records pertaining to employees, or other sensitive records are stored in locked cabinets. Access to the VA Central Office computer rooms is restricted to authorized operating personnel through electronic locking devices. All other persons gaining access to the computer room are escorted by an individual with authorized access.

2. System Security: Access to computer programs is controlled at three levels: Programming, auditing, and operations. The CSS provides automated recognition of authorized users and their respective access restrictions through passwords. Passwords are changed periodically and are restricted to authorized individuals on a need-to-know basis for system access or security purposes. In addition to passwords, there are other levels of security assigned to system personnel only.

These levels are strictly monitored by the Systems Manager. The VA Central Office Systems Security Officer is assigned responsibility for privacy-security measures, including review of violation logs and local control and distribution of passwords.

Retention and disposal: Folder files are destroyed immediately upon separation from VA. Folders are retained two years if employee withdraws from system and subsequently destroyed. Automated records are stored on disks for a period of ten years. Automated records in excess of ten years are then stored on remote disks separate from active disks. Other records are retained and disposed of in accordance with disposition authorization approved by the Archivist of the United States.

These records may also be disclosed as part of an ongoing computer matching program to accomplish these purposes.

10. Identifying information in this system, including name, address, social security number and other information as is reasonably necessary to identify such individual, may be disclosed to the National Practitioner Data Bank at the time of hiring and/or clinical privileging/reprivileging of health care practitioners, and other times as deemed necessary by VA, in order for VA to obtain information relevant to a Department decision concerning the hiring, privileging/reprivileging, retention or termination of the applicant or employee.

These records may also be disclosed as part of a computer matching program to accomplish these purposes.

12. Relevant identifying and medical treatment information (excluding medical treatment information related to drug or alcohol abuse, infection with the human immunodeficiency virus or sickle cell anemia) may be disclosed to a Federal agency or non-VA health care provider or institution when VA refers a patient for treatment or medical services or authorizes a patient to obtain non-VA medical services and the information is needed by the Federal agency or non-VA institution or provider to perform the services or for VA to obtain sufficient information in order to make payment for the services, to evaluate the services rendered, or to determine the need for additional services.

13. Information maintained in this system concerning non-VA health care institutions and providers, including name, address, social security or employer's taxpayer identification numbers, may be disclosed to the Treasury Department, Internal Revenue Service, to report calendar year earnings of \$600 or more for income tax reporting purposes.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are maintained on paper documents at the health care facilities. Paper payment vouchers are maintained at the health care facility or VA Data Processing Center at Austin, Texas. Information on automated storage media (e.g., microfilm, microfiche, magnetic tape and magnetic disks and laser optical media) is stored at the health care facilities (includes record information stored in the Integrated Hospital System (IHS) at selected medical facilities and at other facilities in the Decentralized Hospital Computer Program (DHCP) system, and, in most cases, copies of back-up computer files maintained at off-site locations),

VA Central Office, the VA Boston Development Center, the Regional Directors and Division Offices, the Information Systems Centers and the Austin VA Data Processing Center. Reports generated from these records are maintained on paper and microfiche at the health care facilities, VA Central Office, the Regional Directors and Division Offices, and the Data Processing Center.

Retrievability:

Information is retrieved by the patient's name and/or social security number and/or the name or social security or taxpayer identification numbers of the non-VA health care institution or provider.

Safeguards:

1. Access to working spaces and record storage areas in VA health care facilities is restricted to VA employees on a "need-to-know" basis. Generally, file areas are locked after normal duty hours and the health care facilities are protected from outside access by the Federal Protective Service or other security personnel. Access to the records is restricted to VA employees who have a need for the information in the performance of their official duties. Employee records or records of public figures or otherwise sensitive records are generally stored in separate locked files. Strict control measures are enforced to ensure that access to and disclosures from these records are limited to a "need-to-know" basis.

2. Access to the DHCP and IHS computer rooms at health care facilities is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. ADP peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected. Information in the DHCP and IHS systems may be accessed by authorized VA employees. Access to file information is controlled at two levels:

the system recognizes authorized employees by a series of individually unique passwords/codes as a part of each data message, and the employees are limited to only that information in the file which is needed in the performance of their official duties. Information that is downloaded from the Austin Data Processing Center and DHCP and IHS files and maintained on personal computers is afforded similar storage and access protections as the data that is maintained in the original files. Remote access to file information by staff of the Information Systems Centers, the Veterans Benefits Administration Regional Offices, and access by OIG staff conducting an audit or investigation at the health care facility or an OIG office location remote from the health care facility is controlled in the same manner.

3. Access to the Austin VA Data Processing Center is generally restricted to Center employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to computer rooms are escorted. Information stored in the computer may be accessed by authorized VA employees at remote locations including VA health care facilities, Information Systems Centers, VA Central Office, Regional Directors and Division Offices, and OIG headquarters and field staff. Access is controlled by individually unique passwords/codes which must be changed periodically by the employee.

4. Access to records maintained at VA Central Office, the VA Boston Development Center, the Information Systems Centers and the Regional Directors and Division Offices is restricted to VA employees who have a need for the information in the performance of their official duties. Access to information stored on automated storage media is controlled by individually unique passwords/codes. Information stored on computers at the Information Systems Centers may be accessed by authorized VA employees at remote locations including VA health care facilities and Regional Directors and Division Offices. Access is controlled by individually unique passwords/codes. Records are maintained in manned rooms during nonworking hours. The facilities are protected from outside access during working hours by the Federal Protective Service or other security personnel.

5. Information downloaded from DHCP and IHS and VA Data Processing Center files and maintained by the OIG headquarters and field offices on automated storage media is secured in storage areas or facilities to which only OIG staff have access. Paper documents are similarly secured. Access to paper documents and information on automated storage media is limited to OIG employees who have a need for the information in the performance of their official duties. Access to information stored on automated storage media is controlled by individually unique passwords/codes.

Retention and disposal:

Paper documents at the health care facility related to authorizing the fee basis care and the services authorized, billed and paid for are maintained in the Patient Medical Records-VA (24VA136). These records are retained at health care facilities for a minimum of three (3) years after the last episode of care. After the third year of inactivity the paper record is screened and vital documents are removed and retained for an additional seventy-two (72) years at the facility as a perpetual medical record. The remaining portion of the record is transferred to the nearest Federal Record Center for seventy-two (72) more years of storage. Automated storage media and other paper documents that are included in this system of records and not maintained in the Patient Medical Records-VA (24VA136) are retained and disposed of in accordance with disposition authorization approved by the Archivist of the United States.

System manager(s) and address:

Addresses of VA health care facilities may be found in VA Appendix 1 at end of this document. All inquiries must reasonably identify the portion of the fee basis record involved and the place and approximate date that medical care was provided. Inquiries should include the patient's full name, social security number and return address.

Record access procedures:

Individuals seeking information regarding access to and contesting of VA fee basis records may write, call or visit the last VA facility where medical care was authorized or provided. Contesting record procedures: (See Record Access Procedures above.)

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Records (or information in records) are maintained on paper documents in the consolidated health record at the last VA health care facility where care was rendered and at Federal records centers. Subsidiary record information is maintained at the various respective services within the health care facility (e.g., Pharmacy, Fiscal, Dietetic, Clinical Laboratory, Radiology, Social Work, Psychology, etc.) and by individuals, organizations, and/or agencies with whom VA has a contract or agreement to perform such services as VA may deem practicable. All or portions of the consolidated health record is stored or maintained on-line in VISTA or DHCP (Veterans Information Systems Technology Architecture or Decentralized Hospital Computer Program) computer systems in each VA health care facility and back-up computer files maintained at off-site locations, and may also be stored, in part, at VA Central Office, the National Institutes of Health, the VA Boston Development Center, Chief Information Officer Field Offices (CIOFOs), VA regional offices (VAROs), and the Austin Automation Center (AAC), Austin, Texas.

Retrievability:

Patient medical record folders are indexed by name and social security number and maintained in terminal digit order. Automated records are indexed by name and social security number.

Safeguards:

1. Access to working spaces and patient medical record storage areas in VA health care facilities is restricted to VA employees on a “need-to-know” basis. Generally, file areas are locked after normal duty hours and the health care facilities are protected from outside access by the Federal Protective Service or other security personnel. Access to patient medical records is restricted to VA employees who have a need for the information in the performance of their official duties. Employee patient medical records and records of public figures or otherwise sensitive patient medical records are generally stored in separate locked files. Strict control measures are enforced to ensure that access to and disclosures from these patient medical records are limited to a “need-to-know” basis.

2. Access to the VISTA or/and DHCP computer rooms within the health care facilities is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. ADP peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected. Information in DHCP and VISTA systems may be accessed only by authorized VA employees. Access to file information is controlled at two levels: The system recognizes authorized employees by a series of individually unique passwords/codes as a part of each data message, and the employees are limited to only that information in the file which is needed in the performance of their official duties. Information that is downloaded from PTF, OPC, DHCP and VISTA files and maintained on personal computers must be afforded similar storage and access protections as the data that is maintained in the original files.

3. Authorized Veterans Benefits Administration (VBA) regional office personnel are provided direct, on-line remote access to VHA patient treatment

records maintained on DHCP or VISTA systems at VA health care facilities for the purposes of reading and downloading veterans' medical record relevant to the development and adjudication of the veterans' claims. To the extent that medical treatment records do not exist in electronic format, VBA will continue to access treatment records via AMIE (Automated Medical Information Exchange) software.

4. Access to the Austin Automation Center (AAC) is generally restricted to AAC employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to computer rooms are escorted. Information stored in the AAC databases may be accessed by authorized VA employees at remote locations including VA health care facilities, VA Central Office, VISN (Veterans Integrated Service Network) Offices, and OIG headquarters and field staff. Access is controlled by individually unique passwords/codes which must be changed periodically by the employee.

5. Access to records maintained at VA Central Office, the VA Boston Development Center, the CIOFOs, and the VISN Offices is restricted to VA employees who have a need for the information in the performance of their official duties. Access to information stored in electronic format is controlled by individually unique passwords/ codes. Records are maintained in manned rooms during working hours. The facilities are protected from outside access during non-working hours by the Federal Protective Service or other security personnel.

6. Information stored on computers at the CIOFOs may be accessed by authorized VA employees at remote locations including VA health care facilities and VISN Offices. Access to electronically stored information is controlled by individually unique passwords/codes. Records are maintained in manned rooms during working hours. The facilities are protected from outside access during non-working hours by the Federal Protective Service or other security personnel.

7. Access to PTF information stored by VA Central Office at the National Institutes of Health Computer Center is limited to quality assurance program staff at VA Central Office and the VISN Offices. VA Central Office staff may access the nationwide data and staff of the VISN Offices may access data for their network area. Access to file information is controlled by individually unique passwords/codes.

8. Information downloaded from OPC, PTF and VISTA/DHCP files and maintained by the OIG headquarters and field offices on automated storage media is secured in storage areas or facilities to which only OIG staff have access. Paper documents are similarly secured. Access to paper documents and information on automated storage media is limited to OIG employees who have a need for the information in the performance of their official duties. Access to information stored electronically is controlled by individually unique passwords/codes.

Retention and disposal:

Consolidated health records are retained at health care facilities for a minimum of 3 years after the last episode of care. After the third year of inactivity

the paper record is transferred to the nearest Federal record center for 72 more years of storage. Information stored on electronic storage media is retained and disposed of in accordance with disposition authorization approved by the Archivist of the United States.

Safeguards:

1. Physical security. a. All VA facilities are protected by the Federal Protective Service or other security personnel. All file areas are restricted to authorized personnel on a need-to-know basis. Areas containing paper records are protected by a sprinkler system. Paper records pertaining to employees and public figures, or otherwise sensitive files, are stored in locked files. Microfilm records are stored in a locked, fireproof, humidity-controlled vault. Automated records which are not in use at the Benefit Delivery Center are stored in secured, locked vault areas.

b. Access to VA Benefits Delivery Center is restricted to Center employees, custodial personnel, and Federal Protective Service or other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to computer rooms are escorted by an individual with authorized access.

c. At Regional Offices and at Regional Office and Insurance Centers, the video display terminals are protected by password access. Electronic keyboard locks are activated on security errors. A security officer at each facility is assigned responsibility for privacy-security measures, including review of violations logs and local control and distribution of passwords.

2. System Security. a. At the Benefits Delivery Center, identification of magnetic tapes and disks containing data is rigidly enforced using manual and automated labeling techniques. Access to computer programs is controlled at three levels: Programming, auditing, and operations. b. The ITS (Insurance Terminal System) uses the VA data telecommunications terminal system known as the Benefits Delivery Network (BDN) which provides computerized access control for security purposes. This system provides automated recognition of authorized users and their respective access levels and restrictions through passwords. Passwords are changed periodically and are restricted to authorized individuals on a need-to-know basis for system access or security purposes.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Fiduciary Program beneficiary and fiduciary information contained in the PGF, veterans' files, and correspondence files are maintained on paper documents in case folders and/or in the Fiduciary Beneficiary System (e.g., magnetic tapes, magnetic disks, and computer lists) and are stored at the regional offices (includes record information stored in the Fiduciary Beneficiary System), VA Central Office, and VA Data Processing Center at Austin, Texas. Copies of nonfiduciary program investigations and related information contained in veteran's files and correspondence files are maintained on paper documents and are stored at the regional offices and at VA Central Office.

Retrievability:

Paper documents and automated storage media are indexed by name and file number of VA beneficiary or other individual.

Safeguards:

1. The individual case folder and computer lists are generally kept in steel cabinets when not in use. The cabinets are located in areas which are locked after work hours. Access to these records is restricted to authorized VA personnel on a "need to know" basis. Magnetic tapes and disks, when not in use, are maintained under lock and key in areas accessed by authorized VA personnel on a "need to know" basis.

2. Access to the computer rooms within the regional office is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. ADP peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected. Information in the Fiduciary Beneficiary System may be accessed by authorized VA employees. Access to file information is controlled at two levels; the system recognizes authorized employees by a series of individually unique passwords/codes and the employees are limited to only the information in the file which is needed in the performance of their official duties.

3. Access to the VA data processing center is generally restricted to center employees, custodial personnel, Federal Protective Service and other security personnel. Access to the computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to the computer rooms are escorted.

4. Access to records in VA Central Office is only authorized to VA personnel on a “need to know” basis. Records are maintained in manned rooms during working hours. During non-working hours, there is limited access to the building with visitor control by security personnel.

Retention and disposal:

Paper documents and computer lists are destroyed anywhere from 60 days after receipt to 2 years after VA supervision has ceased, depending on the type of record or document. Correspondence files are destroyed after 1 year, veteran files after 2 years, PGFs 2 years after the case becomes inactive. Investigations data and information obtained from SSA is destroyed according to the time standards established in the two preceding sentences. Information contained in the Fiduciary Beneficiary System is automatically purged two years after the case becomes inactive. A record is determined inactive when it comes under the provision of the Veterans Services Division General Operations Manual, M27-1, part 3, section 1, chapter 8, paragraphs 8.23-8.42.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

The basic file is on automated storage media (e.g., magnetic tapes and disks), with backup copies of the information on magnetic tape. Such information may be accessed through a data telecommunication terminal system designated the Benefits Delivery Network (BDN). BDN terminal locations include VA Central Office, VA regional offices, VBA Debt Management Center, VA health care facilities, Department of Defense Finance and Accounting Service Centers and the U.S. Coast Guard Pay and Personnel Center. An adjunct file (at the Records Processing Center (RPC) in St. Louis, MO) contains microfilm and paper documents of former manual Central Index claims numbers registers, partial files of pensioners with service prior to 1930, personnel with service between 1940 and 1948 with VA insurance, and partial lists of other Armed Forces personnel indexed by service number. A duplicate of the microfilm is also located at VA Central Office.

Remote on-line access is also made available to authorize representatives of claimants and to attorneys of record for claimants. A VA claimant must execute a prior written consent or a power of attorney authorizing access to his or her

claims records before VA will allow the representative or attorney to have access to the claimant's automated claims records. Access by representatives and attorneys of record is to be used solely for the purpose of assisting an individual claimant whose records are accessed in a claim for benefits administered by VA.

Retrievability:

Information is retrievable by the use of name only, name and one or more numbers (service, social security, VA claims file and VA insurance file), name and one or more criteria (e.g., dates of birth, death and service), number only, or initials or first five letters of the last name with incorrect file number.

Safeguards:

Access to the basic file in the Austin DPC (Data Processing Center) is restricted to authorized VA employees and vendors. Accredited service organization representatives, VA-approved claims agents and attorneys acting under a declaration of representation so that these individuals can aid veterans in the preparation, presentation, and prosecution of claims under the laws administered by VA are provided read-only access.

Access to BDN data telecommunications network is by authorization controlled by the site security officer who is responsible for authorizing access to the BDN by a claimant's representative or attorney approved for access in accordance with VA regulations. The site security officer is responsible for ensuring that the hardware, software and security practices of a representative or attorney satisfy VA security requirements before granting access. The security requirements applicable to access to automated claims files by VA employees also apply to access to automated claims files by claimants' representatives or attorneys. The security officer is assigned responsibility for privacy-security measures, especially for review of violation logs, information logs and control of password distribution, including password distribution for claimants' representatives.

Access to the computer room where the basic file is maintained within the DPC is further restricted to authorized VA employees and vendor personnel on a "need to know" basis and is protected from unauthorized access by an alarm system, the Federal Protective Service, and VA security personnel. As to access to Target terminals, see Safeguards, Compensation, Pension, Education, and Rehabilitation Records--58VA21/22. Authorized terminals with access to the VBA Benefits Delivery Network are located only at VA regional offices, VA medical facilities, VA Central Office, VBA Debt Management Center, National Cemetery System facilities, Railroad Retirement Board through the Chicago Regional Office, the National Personnel Records Center, the U.S. Army Reserve Components Personnel and Administration Center at St. Louis, MO, and at remote sites nationwide. The adjunct file is accessible for official use only by personnel assigned to Systems Development Service (20M4), VA Central Office, Washington, DC, and the Administrative Division at VA Records Processing Center, St. Louis, MO.

Records are maintained on magnetic tape, disks, microfilm or paper documents and are retained and disposed of in accordance with disposition authorization approved by the Archivist of the United States.

The information that may be disclosed under this routine use is limited to that which is necessary to permit the contractor to perform the services required under the contract or agreement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

VA-guaranteed, insured, direct and vendee loan records are maintained in individual folders on paper documents and on automated storage media (i.e., microfilm, microfiche, magnetic tape and magnetic disks.)

Retrievability:

All VA loan applications and loan records are indexed by name and VA loan file number in the local VA office having jurisdiction over the geographic area in which the property is located. Automated records are indexed for statistical purposes by a file number, field station and county code number and lender identification number. However, an individual loan record in automated format may only be retrieved by name or loan number. Records in CAIVRS may only be retrieved by social security number.

Safeguards:

Access to VA working spaces and record file storage areas is restricted to VA employees on a "need to know" basis. Generally, VA file areas are locked after normal duty hours and are protected from outside access by the Federal Protective Service or other VA security personnel. Loan and property security instruments are stored in separate fire resistant locked files. VA employee loan file records and other files which, in the opinion of VA, are, or may become, sensitive are stored in separate locked files.

Information in the system may be accessed from authorized terminals in the VA telecommunications network. Terminal locations include VA Central Office and regional offices. Access to terminals is by authorization controlled by the site security officer. The security officer is assigned responsibility for privacy-security measures, especially for review of violations logs, information logs and control of password and badge readers and audible alarms. Electronic keyboard locks are activated on security errors. Also, beginning in 1986, sensitive files were established using the social security numbers of the VA Veterans Benefits Administration employees and other prominent individuals to prevent indiscriminate access to their automated records.

At the data processing centers, identification of magnetic tape and disks containing data is rigidly enforced using labeling techniques. Automated storage media which are not in use are stored in tape libraries which are secured in locked rooms. Access to programs is controlled at three levels: Programming, auditing, and operations. Access to data processing centers is generally restricted to center employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to computer rooms are escorted.

Access to the data processing center where HUD maintains CAIVRS is generally restricted to center employees, authorized HUD employees and authorized subcontractors. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to computer rooms are escorted.

Files in CAIVRS use social security numbers as identifiers. Access to information in files is restricted to authorized employees of participating agencies and authorized employees of lenders who participate in the agencies' programs. Access is controlled by agency distribution of passwords. Information in the system may be accessed by use of a touchtone telephone by authorized agency and lender employees on a "need to know" basis.

Retention and disposal:

Records in individualized case folder concerning active VA guaranteed or insured loans are retained at the VA servicing facility for up to three years and forwarded to the Federal Archives and Records Center (FARC) where they are retained up to thirty-three years and then destroyed. Active direct loan case folders are retained at the VA servicing facility until the case becomes inactive, e.g., existing loan balance is paid in full.

Inactive guaranteed and direct loan folders are forwarded to the FARC annually, retained for five years and then destroyed. Vendee loan records being maintained in case folders are kept at the VA servicing facility until five years after the case becomes inactive and are then destroyed. Specially adapted housing (SAH) records are maintained either at VA Central Office (VACO) and/or the VA servicing facility. Once SAH records are closed, SAH records at VACO are maintained for one year and then sent to the FARC where they are retained for thirty years and then destroyed. Closed SAH records maintained at regional offices are maintained for ten years and then destroyed. Generally, automated

records (e.g., computer lists, discs, and microfiche) are maintained for up to five years and then destroyed. Destruction of records is accomplished by shredding, burning, and/or erasure.

File information for CAIVRS is provided to HUD by VA on magnetic tape. After information from the tape has been read into the computer the tape is returned to VA for updating. HUD does not keep separate copies of the tape.

Some of the records in this system are exempt from the notification requirement under 5 U.S.C. 552a(k). To the extent that records in this system of records are not subject to exemption, they are subject to notification. A determination as to whether an exemption applies shall be made at the time a request for notification is received.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Magnetic tapes of all active volunteers are maintained at the AAC in Austin, Texas. The AAC only maintains data on active volunteers. Paper documents for

all active volunteers are maintained at the individual VA facilities where the volunteer has donated time. Computer files containing such basic information as the volunteer's name, address, social security number, date of birth, telephone number, next-of-kin information, assignments worked, hours and years of service and last award received are retained for all volunteers, either active or inactive, at the VA facility where the individual currently volunteers or has volunteered.

Retrievability:

All volunteer records are retrieved by name, social security number (SSN) or pseudo SSN.

Safeguards:

Physical Security:

1. Access to VA working space areas and the AAC is restricted to VA employees on a "need to know" basis. Generally, VA file areas and computer rooms are locked after normal duty hours and are protected from outside access by the Federal Protective Service.
2. Strict control measures are enforced to ensure that access to and disclosure from all records including electronic files stored in the Volunteer Management System in VistA are limited to VAVS employees whose official duties warrant access to those files. The system recognizes authorized employees by a series of individually unique passwords/codes and the employees are limited to only that information in the file which is needed in the performance of their official duties.
3. Any sensitive information that may be downloaded or printed to hard copy format is provided the same level of security as the electronic records. All paper documents and informal notations containing sensitive data are shredded prior to disposal.
4. All new VAVS employees receive initial information security training, and refresher training is provided to all employees on an annual basis.
5. Access to the AAC is generally restricted to Center employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to computer rooms are escorted. Information stored in the computer may be accessed by authorized VA employees at remote locations including VA health care facilities, Information Systems Centers, VA Central Office, and Veterans Integrated Service Networks. Access is controlled by individually unique passwords/codes which must be changed periodically by the employee.

Retention and disposal:

The paper and electronic records will be maintained and disposed of in accordance with the records disposition authority approved by the National Archives and Records Administration (NARA).

System manager(s) and address:

Official responsible for policies and procedures: Director, Voluntary Service Office (10C2), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420.

Official maintaining the system: National Automated Information Systems Coordinator, VA Medical Center, 2907 Pleasant Valley Blvd., Altoona, Pennsylvania 16602-4377.

Notification procedure:

Individuals seeking information concerning the existence and content of their service records must submit a written request or apply in person to the VA health care facility where their voluntary service was accomplished. All inquiries must reasonably identify, to the VA facility, the portion of the volunteer's service record they want information about and the approximate dates of service, in order to receive that information. Inquiries should include the volunteer's name, social security number or pseudo SSN, organization represented, date of birth, and last address while serving as a volunteer to VA.

Record access procedure:

40. Names and addresses, and other identifying data including the Social Security number, of surviving spouses, children and parents of deceased veterans may be released from this system of records to the Department of Defense (DOD) upon its official request in order for DOD to identify individuals eligible for health care benefits administered by the DOD, or to collect or verify information necessary for DOD facility planning, personnel studies, capitalization budgeting and post exchange, commissary and housing studies.

This match will permit the DOL to verify a person's eligibility for DOL payments as well as to detect situations where recipients may be erroneously receiving concurrent multiple payments from the DOL and the VA, to identify areas where legislative and regulatory amendments directed toward preventing overpayments are needed, and to collect debts owned to the United States Government. This matching program is performed pursuant to the DOL Inspector General's authority under Pub. L. 95-452, section 4(a) to detect and prevent fraud and abuse. Identifying information, including the initials and abbreviated surname, the social security number, the date of birth and coding indicating the category of the individual's records, the degree of disability, the benefit program under which benefits program under which benefits are being paid and the computed amount of VA benefits for a calendar year may be released to the Department of the Treasury, Internal Revenue Service (IRS) in order for IRS to conduct a computer matching program against the Internal Revenue Service's Forms 1040, Schedule R, Credit for the Elderly and the Permanently and Totally Disabled. This match will permit IRS to determine the eligibility for and the proper amount of Elderly and Disabled Credits claimed on IRS Form 1040, Schedule R. This matching program is performed pursuant to the provisions of Internal Revenue Code Section 7602. This disclosure is consistent with 38 U.S.C. 3301(b)(3).

48. Identifying information, such as name, social security number, VA claim number, date and place of birth, etc., in this system may be disclosed to an employer or school having information relevant to a claim in order to obtain information from the employer or school to the extent necessary to determine that eligibility for VA compensation or pension benefits continues to exist or to verify that there has been an overpayment of VA compensation or pension benefits. 54. This routine use authorizes VA to compile lists of the social security numbers and loan account numbers of all persons with VA-guaranteed and portfolio loans in default, or VA loans on which there has been a foreclosure and the Department paid a claim and provide these records to the Department of Housing and Urban Development for inclusion in its Credit Alert Interactive Voice Response System (CAIVRS). Information included in this system may be disclosed to all participating agencies and lenders who participate in the agencies' programs to enable them to verify information provided by new loan applicants and evaluate the creditworthiness of applicants. These records may also be disclosed as part of an ongoing computer matching program to accomplish these purposes.

55. Identifying information including social security number, abbreviated surname, first and middle initial, date of birth, sex and claim number, and excluding the full name and address, may be disclosed to the Social Security Administration for the purpose of conducting a computer match to obtain information to validate the social security number maintained in VA records.

56. Any information contained in the files of veterans whose claims were referred to VA Central Office for an advisory opinion concerning their claims that their disabilities were incurred secondary to occupational radiation exposure may be disclosed to the Department of the Navy. The information to be furnished to the Navy would include the medical opinions, dose estimates, advisory opinions, and rating decisions including veterans' names, addresses, VA claim numbers, Social Security numbers and medical information. The requested information may be disclosed to the Department of the Navy upon receipt of their official written request for such information for their use in the review and assessment of their occupational radiation exposure controls and training.

60. The name and address of a former accredited representative, claim agent or attorney, and any information concerning such individual, except a veteran's name and home address, which is relevant to a revocation of such access privileges may be disclosed to an appropriate governmental licensing organization where VA determines that the individual's conduct which resulted in revocation merits reporting.

61. A record from this system (other than the address of the beneficiary) may be disclosed to a former representative of a beneficiary to the extent necessary to develop and adjudicate a claim for payment of attorney fees to such representative from past-due benefits under 38 U.S.C. 5904(d) or to review a fee agreement between such representative and the beneficiary for reasonableness under 38 U.S.C. 5904(c)(2).

62. Disclosure of tax returns and return information received from the Internal Revenue Service may be made only as provided by 26 U.S.C. 6103 (an IRS confidentiality statute) also covering any IRS tax return information provided as part of an ongoing computer matching program.

Name and home addresses of veterans and their dependents will be released on VA's initiative under this routine use only to Federal entities.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records (or information contained in records) are maintained on paper documents in claims file folders (e.g., "C" file folders, educational file folders and vocational rehabilitation folders) and on automated storage media (e.g., microfilm, microfiche, magnetic tape and disks.) Such information may be accessed through a data telecommunication terminal system designated the Benefits Delivery Network (BDN). BDN terminal locations include VA Central Office, VA regional offices, VA health care facilities, VISN offices, Department of Defense Finance and Accounting Service Centers and the U.S. Coast Guard Pay and Personnel Center.

Remote on-line access is also made available to authorized representatives of claimants and to attorneys of record for claimants. A VA claimant must execute a prior written consent or a power of attorney authorizing access to his or her claims records before VA will allow the representative or attorney to have access to the claimant's automated claims records. Access by representatives and attorneys of record is to be used solely for the purpose of assisting an individual claimant whose records are accessed in a claim for benefits administered by VA.

Information relating to receivable accounts owed to VA, designated the Centralized Accounts Receivable System (CARS), is maintained on magnetic tape, microfiche and microfilm. CARS is accessed through a data telecommunications terminal system at St. Paul, Minnesota.

Retrievability:

Claims file folders are indexed by name of the veteran and VA file number. Automated records are indexed by name, VA file number, payee name and type of benefit. Automated Records of employee productivity cannot be accessed. At the conclusion of a monthly reporting period, the generated listing is indexed by employee TAC number. Records in CAIVRS may only be retrieved by social security number.

Safeguards:

1. Physical Security: (a) Access to working spaces and claims folder file storage areas in VA regional offices and centers is restricted to VA employees on a need-to-know basis. Generally, file areas are locked after normal duty hours and the offices and centers are protected from outside access by the Federal Protective Service or other security personnel. Employee claims file records and claims file records of public figures are stored in separate locked files. Strict control measures are enforced to ensure that access to and disclosure from these claims file records are limited to a need-to-know basis.

(b) Access to BDN data telecommunications network is by authorization controlled by the site security officer who is responsible for authorizing access to the BDN by a claimant's representative or attorney approved for access in accordance with VA regulations. The site security officer is responsible for ensuring that the hardware, software and security practices of a representative or attorney satisfy VA security requirements before granting access. The security requirements applicable to access to automated claims files by VA employees also apply to access to automated claims files by claimants' representatives or attorneys. The security officer is assigned responsibility for privacy-security

measures, especially for review of violation logs, information logs and control of password distribution, including password distribution for claimants' representatives.

(c) Access to data processing centers is generally restricted to center employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons provided access to computer rooms are escorted.

(d) Employee production records are identified by the confidential BDN access number, not name, and are protected by management/supervisory personnel from unauthorized disclosure in the same manner as other confidential records maintained by supervisors.

2. BDN System Security: (a) Usage of the BDN system is protected by the usage of "logon" identification passwords and authorized function passwords. The passwords are changed periodically. These same protections apply to remote access users.

(b) At the data processing centers, identification of magnetic tapes and disks containing data is rigidly enforced using labeling techniques. Automated storage media which are not in use are stored in tape libraries which are secured in locked rooms. Access to programs is controlled at three levels: Programming, auditing and operations. Access to the data processing centers where HUD maintains CAIVRS is generally restricted to center employees and authorized subcontractors. Access to computer rooms is restricted to center employees and authorized operational personnel through electronic locking devices. All other persons granted access to computer rooms are escorted.

Files in CAIVRS use social security numbers as identifiers. Access to information files is restricted to authorized employees of participating agencies and authorized employees of lenders who participate in the agencies' programs. Access is controlled by agency distribution of passwords. Information in the system may be accessed by use of a touch-tone telephone by authorized agency and lender employees on a "need-to-know" basis.

Retention and disposal:

Individual claims file folders and the compensation, pension, rehabilitation and education claims records contained therein are retained at the servicing regional office for the life of the veteran. At the death of the veteran, these records are sent to the Federal Records Center (FRC), maintained by the FRC for 75 years and thereafter destroyed. Rehabilitation and education counseling records are maintained until the exhaustion of a veteran's maximum entitlement or upon the exceeding of a veteran's delimiting date of eligibility (generally, ten or twelve years from discharge or release from active duty), whichever occurs first, and then destroyed. Automated storage media containing temporary working information are retained until a claim is processed to determination. All other automated storage media are retained and disposed of in accordance with disposition authorization approved by the Archivist of the United States. Employee productivity records are maintained for two years after which they are destroyed by shredding or burning. File information for CAIVRS is provided to

HUD by VA on magnetic tape. After information from the tapes has been read into the computer the tapes are returned to VA for updating. HUD does not keep separate copies of the tapes.

Systems exempted from certain provisions of the act:

Under 5 U.S.C. 552a(j)(2), the head of any agency may exempt any system of records within the agency from certain provisions of the Privacy Act if the agency or component that maintains the system performs as its principal function any activities pertaining to the enforcement of criminal laws. The Inspector General Act of 1978, Pub. L. 95-452, mandates the Inspector General to recommend policies for and to conduct, supervise and coordinate activities in the Veterans Administration and between the Veterans Administration and other Federal, State and local governmental agencies with respect to: (1) The prevention and detection of fraud in programs and operations administered or financed by the Veterans Administration and (2) the identification and prosecution of participants in such fraud. Under the Act, whenever the Inspector General has reasonable grounds to believe there has been a violation of Federal criminal law, the Inspector General must report the matter expeditiously to the Attorney General.

This system of records has been created in major part to support the criminal law-related activities assigned by the Inspector General to the Assistant Inspector General for Investigations. These activities constitute a principal function of the Inspector General's Complaint Center staff.

In addition to principal functions pertaining to the enforcement of criminal laws, the Inspector General may receive and investigate complaints and

allegations from various sources concerning the possible existence of activities constituting noncriminal violations of law, rules or regulations; mismanagement; gross waste of funds; abuses of authority or substantial and specific danger to the public health and safety. This system of records also exists to support inquiries by the Assistant Inspectors General for Auditing and for Policy, Planning and Resources into these noncriminal violations.

Based upon the foregoing, the Administrator of Veterans Affairs has exempted this system of records, to the extent that it encompasses information pertaining to criminal law-related activities, from the following provisions of the Privacy Act of 1974, as permitted by 5 U.S.C. 552a(j)(2):

- 5 U.S.C. 552a(c)(3) and (4)
- 5 U.S.C. 552a(d)
- 5 U.S.C. 552a(e)(1), (2) and (3)
- 5 U.S.C. 552a(e)(4)(G), and (H) and (I)
- 5 U.S.C. 552a(e)(5) and (8)
- 5 U.S.C. 552a(f)
- 5 U.S.C. 552a(g)

The Administrator of Veterans Affairs has also exempted this system of records to the extent that it does not encompass information pertaining to criminal law-related activities under 5 U.S.C. 552a(j)(2) from the following provisions of the Privacy Act of 1974, as permitted by 5 U.S.C. 552a(k)(2):

- 5 U.S.C. 552a(c)(3)
- 5 U.S.C. 552a(d)
- 5 U.S.C. 552a(e)(1)
- 5 U.S.C. 552a(e)(4)(G), (H) and (I)
- 5 U.S.C. 552a(f)

Reasons for exemptions: The exemption of information and material in this system of records is necessary in order to accomplish the law enforcement functions of the Office of Inspector General; e.g., to prevent subjects of investigations from frustrating the investigatory process by discovering the scope and progress of an investigation, to prevent the disclosure of investigative techniques, to fulfill commitments made to protect the confidentiality of sources, to maintain access to sources of information and to avoid endangering these sources and law enforcement personnel.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

These records may be maintained in file folders, on lists and forms, on microfilm or microfiche, and in computer processable storage media.

Retrievability:

These records may be retrieved using various combinations of name, birth date, Social Security number, or identification number of the individual on whom they are maintained.

Safeguards:

Access to areas where these records are maintained is restricted to VA employees, contractors, or subcontractors on a "need to know" basis; strict control measures are enforced to ensure that disclosure to these individuals is also based on this same principle. File areas are locked after normal duty hours and are protected from outside access by the Federal Protective Service or other types of alarm systems.

Access to the VA Austin Automation Center and VA Shared Service Center are restricted to authorized VA employees and authorized representatives of

vendors. Access to computer rooms within these facilities is further restricted to especially authorized VA personnel and vendor personnel.

Access to computerized records is limited through the use of access codes and entry logs. Additional protection is provided by electronic locking devices, alarm systems, and guard services.

Electronic data is made available to VA field facilities via VA's Intranet. Strict control measures are enforced to ensure that disclosure is limited to the individual on whom the record is being maintained or on a "need to know" basis. Security devices (e.g. passwords, firewalls) are used to control access by VA users to Internet services, and to shield VA networks and systems from outside the firewall.

Retention and disposal:

The Merged Personnel Records Folder (MPRF) is maintained for the period of the employee's service in VA and is then transferred to the National Personnel Records Center (NPRC) for storage, or, as appropriate, to the next employing Federal agency. Other records are either retained at VA for various lengths of time in accordance with the National Archives and Records Administration records schedules or destroyed when they have served their purpose or the employee leaves VA.

a. VA maintains the MPRF as long as VA employs the individual.

Within 90 days after the individual separates from VA's employment, the MPRF is sent to the NPRC for long-term storage. The MPRF of a retired employee or an employee who dies in service is sent to the Records Center within 120 days of the retirement or death.

b. Records in this system must be maintained and disposed of in accordance with General Records Schedule 1, and VA Records Control Schedule 10-1, the Office of Personnel Management Guide to Federal Recordkeeping, and the Memorandum of Understanding concerning this subject between VA, the Office of Personnel Management, and the National Archives and Records Administration.

Identifying information in this system, including name, address, social security number and other information as is reasonably necessary to identify such individual, may be disclosed to the NPDB at the time of hiring, appointment, utilization, and/or clinical privileging/reprivileging of physicians, dentists and other health care practitioners, and other times as deemed necessary by VA, in order for VA to obtain information relevant to a Department decision concerning the hiring, appointment, utilization, privileging/reprivileging, retention or termination of the individual.

18. Relevant information from this system of records may be disclosed to the NPDB and/or State Licensing Board in the State(s) in which a practitioner is licensed, in which the VA facility is located, and/or in which an act or omission occurred upon which a medical malpractice claim was based when VA reports information concerning: (a) Any payment for the benefit of a physician, dentist, or other licensed health care practitioner which was made as the result of a settlement or judgment of a claim of medical malpractice if an appropriate determination is made in accordance with agency policy that payment was related to substandard care, professional incompetence or professional misconduct on the part of the individual; (b) a final decision which relates to possible incompetence or improper professional conduct that adversely affects the clinical privileges of a physician or dentist for a period longer than 30 days; or, (c) the acceptance of the surrender of clinical privileges or any restriction of such privileges by a physician or dentist either while under investigation by the health care entity relating to possible incompetence or improper professional conduct, or in return for not conducting such an investigation or proceeding. These records may also be disclosed as part of a computer-matching program to accomplish these purposes.

19. In response to a request about a specifically identified individual covered by this system from a prospective Federal or non-Federal health care entity employer, the following information may be disclosed: (a) Relevant information concerning the individual's professional employment history including the clinical privileges held by the individual; (b) relevant information concerning a final decision which results in a voluntary or involuntary limitation, reduction or loss of clinical privileges; and (c) relevant information concerning any payment which is made in settlement (or partial settlement) of, or in satisfaction of a judgment in, a medical malpractice action or claim and, when through a peer review process that is undertaken pursuant to VA policy, negligence, professional incompetence, responsibility for improper care, and/or professional misconduct has been assigned to the individual.

20. Disclosure may be made to any Federal, State, local, tribal or private entity in response to a request concerning a specific provider for the purposes of credentialing providers who provide health care at multiple sites or move between sites. Such disclosures may be made only when: (a) The records are properly constituted in accordance with VA requirements; (b) the records are accurate, relevant, timely, and complete; and (c) disclosure is in the best interests of the Government (i.e., to meet the requirements of contracts, sharing agreements, partnerships, etc.). When the exchange of credentialing information

through the exchange of individual records directly benefits VA's completion of its mission and enhances public confidence in VA's or the Federal Government's role in the delivery of health care, then the best interests of the Government are served.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are maintained on paper documents or in electronic format. Information included in the record may be stored on microfilm, magnetic tape or disk.

Retrievability:

Records are retrieved by the names and social security number or other assigned identifiers, e.g. the National Provider Identifier, of the individuals on whom they are maintained.

Safeguards:

1. Access to VA working and storage areas in VA health care facilities is restricted to VA employees on a "need-to-know" basis; strict control measures are enforced to ensure that disclosure to these individuals is also based on this same principle. Generally, VA file areas are locked after normal duty hours and the health care facilities are protected from outside access by the Federal Protective Service or other security personnel.

2. Access to computer rooms within the health care facilities is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. Automated data processing peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected. Information in the VistA system may be accessed by authorized VA employees. Access to file information is controlled at two levels; the system recognizes authorized employees by a series of individually unique passwords/codes as a part of each data message, and the employees are limited to only that information in the file, which is needed in the performance of their official duties.

3. Access to records in VA Central Office and the VISN Directors and Division Offices is only authorized to VA personnel on a "need-to-know" basis. Records are maintained in manned rooms during working hours. During non-working hours, there is limited access to the building with visitor control by security personnel.

4. The automated system is Internet enabled and will conform to all applicable Federal regulations concerning information security. The automated system is protected by a generalized security facility and by specific security techniques used within the application that accesses the data file and may include individually unique passwords/ codes and may utilize Public Key Infrastructure personal certificates. Both physical and system security measures will meet or exceed those required to provide an adequate level of protection for host systems. Access to file information is limited to only that information in the file which is needed in the performance of official duties. Access to computer rooms is restricted generally by appropriate locking devices to authorized

operational personnel. Information submitted to the automated electronic system is afforded the same protections as the data that is maintained in the original files. Access from remote locations, including remote on-line access from other agencies to the data storage site, is controlled in the same manner. Access to the electronic data is supported by encryption and the Internet server is insulated by a firewall.

Retention and disposal:

Records are maintained at the employing VA facility. If the individual transfers to another VA facility location, the record is transferred to the new location, if appropriate. Paper records are retired to a Federal records center 3 years after the individual separates from VA employment or no longer utilized by VA (in some cases, records may be maintained at the facility for a longer period of time) and are destroyed 30 years after separation. Paper records for applicants who are not selected for VA employment or appointment are destroyed 2 years after non-selection or when no longer needed for reference, whichever is sooner. Electronic records are transferred to the Director, Credentialing and Privileging Program, Office of Quality and Performance, VHA Central Office, when the provider leaves the facility. Information stored on electronic storage media is maintained and disposed of in accordance with records disposition authority approved by the Archivist of the United States.

System manager(s) and address:

In most cases, the electronic data will be maintained by the Department of Health and Human Services, Health Resources and Services Administration (HHS/HRSA), a component thereof (a contractor, subcontractor of HHS/HRSA, or by another entity) in accordance with the VA Interagency Agreement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are maintained on paper, microfilm, magnetic tape, disk, or laser optical media. In most cases, copies of back-up computer files are maintained at off-site locations.

Retrievability:

Records are retrieved by name, social security number or other assigned identifiers of the individuals on whom they are maintained.

Safeguards:

1. Access to VA working and storage areas is restricted to VA employees on a "need-to-know" basis. Strict control measures are enforced to ensure that disclosure to these individuals is also based on this same principle. Generally, VA file areas are locked after normal duty hours and the facilities are protected from outside access by the Federal Protective Service or other security personnel.

2. Access to computer rooms at health care facilities is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. Automated Data Processing (ADP) peripheral devices are placed in secure areas (areas that are locked or have limited access) or are

otherwise protected. Information in VistA may be accessed by authorized VA employees. Access to file information is controlled at two levels. The systems recognize authorized employees by series of individually unique passwords/codes as a part of each data message, and the employees are limited to only that information in the file which is needed in the performance of their official duties. Information that is downloaded from VistA and maintained on personal computers is afforded similar storage and access protections as the data that is maintained in the original files. Access to information stored on automated storage media at other VA locations is controlled by individually unique passwords/codes. Access by Office of Inspector General (OIG) staff conducting an audit, investigation, or inspection at the health care facility, or an OIG office location remote from the health care facility, is controlled in the same manner.

3. Information downloaded from VistA and maintained by the OIG headquarters and Field Offices on automated storage media is secured in storage areas for facilities to which only OIG staff have access. Paper documents are similarly secured. Access to paper documents and information on automated storage media is limited to OIG employees who have a need for the information in the performance of their official duties. Access to information stored on automated storage media is controlled by individually unique passwords/codes.

Retention and disposal:

Paper records and information stored on electronic storage media are maintained and disposed of in accordance with records disposition authority approved by the Archivist of the United States.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Records are maintained on magnetic tape and disk, microfilm, microfiche, optical disk and paper documents. DMC does not routinely maintain paper records of individual debtors in file folders with the exception of correspondence, and replies thereto, from Congress, the White House, members of the Cabinet and other similar sources. Paper records related to accounts receivable may be maintained in individual file folders located at VA regional offices, health care facilities and CHAMPVA Center. Generally and with the exception of claims against third-party insurers and certain first-party medical debts, such papers maintained outside of DMC are not used directly in the debt collection process unless they are first forwarded to DMC. Information stored on magnetic media for most benefit debts, including first-party medical, may be accessed through a data telecommunications terminal system designated as CAROLS (Centralized Accounts Receivable On-Line System). Most CAROLS terminals are located in DMC; however, VA regional offices generally each have one terminal for inquiry purposes. Information stored on magnetic media and related to the All-Volunteer Force Educational Assistance, education loan, miscellaneous home loan or CHAMPVA debt collection programs may be accessed through personal computers. Records provided to the Department of Housing and Urban Development for inclusion in the Credit Alert Interactive Voice Response System (CAIVRS) are maintained on magnetic media at the HUD Data Processing Center in Lanham, Maryland. For benefit debts other than miscellaneous home loan, first-party medical and CHAMPVA, identifying information, the amount of the debt and benefit source of the debt may be stored on magnetic media in records that serve as the data base for the VA Benefits Delivery Network (BDN). The BDN is operated for the adjudication of claims and the entry of certain fiscal transactions. The identifying information, the amount of the debt and benefit source of the debt are transmitted to the Centralized Accounts Receivable System (CARS) or a personal computer local area network system before collection activity commences. When a debtor is awarded gratuitous benefits under VA programs, the BDN may operate to offset all or part of retroactive funds awarded, if any, to reduce the balance of the indebtedness. The Decentralized Hospital Computer Program (DHCP), through its various modules, is used to create and store first-party medical charges and debts associated with the provision of health care benefits. The identifying information about the person, the amount of the debt and program source of the debt may be transmitted to

CARS as part of the collection process. When a person receives care under the auspices of VA, a VA medical facility may collect all or part of a charge or debt.

Retrievability:

Paper documents, microfilm and microfiche are indexed by VA file number or date of receipt. Automated records are indexed by VA claim number, Social Security account number, name and loan account number in appropriate circumstances. Records in CAIVRS may only be retrieved by Social Security number.

Safeguards:

1. Physical Security: (a) Access to working spaces and document storage areas in DMC is restricted by cipher locks and to VA employees on a need-to-know basis. Generally, document storage areas in VA offices other than DMC are restricted to VA employees on a need-to-know basis. VA offices are generally protected from outside access by the Federal Protective Service or other security personnel. Strict control measures are enforced to ensure that access to and disclosure from documents, microfilm and microfiche are limited to a need-to-know basis. (b) Access to CAROLS data telecommunications terminals is by authorization controlled by the site security officer. The security officer is assigned responsibility for privacy-security measures, especially for review of violation logs, information logs and control of password distribution. (c) Access to data processing centers is generally restricted to center employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other personnel gaining access to computer rooms are escorted.

2. CAROLS and Personal Computer Local Area Network (LAN) Security:

(a) Usage of CAROLS and LAN terminal equipment is protected by password access. Electronic keyboard locks are activated on security errors.

(b) At the data processing centers, identification of magnetic media containing data is rigidly enforced using labeling techniques. Automated storage media which are not in use are stored in tape libraries which are secured in locked rooms. Access to programs is controlled at three levels: programming, auditing and operations.

3. CAIVRS Security: Access to the HUD data processing center from which CAIVRS is operated is generally restricted to center employees and authorized contact employees. Access to computer rooms is restricted to authorized operational personnel through locking devices. All other persons gaining access to computer rooms are escorted.

Records in CAIVRS use Social Security numbers as identifiers. Access to information files is restricted to authorized employees of participating agencies and authorized employees of lenders who participate in the agencies' programs. Access is controlled by agency distribution of passwords. Information in the system may be accessed by use of a touch-tone telephone by authorized agency and lender employees on a need-to-know basis.

Retention and disposal:

Microfilm and microfiche are retained in metal cabinets in DMC for 25 years.

CARS records are retained until termination of debt collection (payment in full, write off, compromise or waiver). All other automated storage media are retained and disposed of in accordance with disposition authorization approved by the Archivist of the United States. DMC generally forwards all substantive paper documents to VA regional offices, health care facilities and CHAMPVA Center for storage in claims files, patient treatment files, imaging systems or loan files. Those documents are retained and disposed of in accordance with the appropriate system of records. Information provided to HUD for CAIVRS is stored on magnetic tape. The tapes are returned to VA for updating each month. HUD does not keep separate copies of the tapes.

However, in accordance with an agreement between the Department of Veterans Affairs and the U.S. Postal Service, disclosures to the U.S. Postal Service for decisions concerning the employment of veterans will only be made with the veteran’s prior written consent.

3. Any information in this system may be disclosed, by computer matching or otherwise, in connection with any proceeding for the collection of an amount owed the United States when, in the judgment of the Secretary, or official generally delegated such authority under standard agency delegation of authority rules (38 CFR 2.6), such disclosure is deemed necessary and proper in accordance with 38 U.S.C. 5701(b)(6) for debts resulting from participation in VA benefit programs or pay administration, with 31 U.S.C. 3711(g)(5) for other debts referred to VA in its capacity as a Government-wide cross-servicing facility or with a valid interagency agreement for collection services independent of the cross-servicing provisions of section 3711(g)(4) and (g)(5).

4. The name and address of a person indebted to the United States and other information as is reasonably necessary to identify such person may be disclosed to a consumer reporting agency for the purpose of locating that person or to obtain a consumer report in order to assess the ability of that person to repay an indebtedness, provided the disclosure is consistent with 38 U.S.C. 5701(g)(2) for purposes of debts owed veterans and their dependents as a result of participation in VA benefit programs and 31 U.S.C. 3711(h)(1) for purposes of all other debts to the United States.

5. The name and address of a person indebted to the United States, other information as is reasonably necessary to identify such person, including personal information obtained from other Federal agencies through computer matching programs, and any information concerning the person’s indebtedness to the United States may be disclosed to a consumer reporting agency for purposes of making such information available for inclusion in consumer reports

regarding that person, provided that the provisions of 38 U.S.C. 5701(g)(4) have been met for purposes of indebtedness incurred as the result of participation in VA benefit programs and 31 U.S.C. 3711(f)(1) for purposes of all other types of indebtedness.

6. Any information in this system, including available identifying information regarding a person, such as the person's name, address, Social Security number, VA insurance number, VA claim number, VA loan number, date of birth, employment information or identification number assigned by any Government component, may be disclosed, except to consumer reporting agencies, to a third party in order to obtain current name, address and credit report in connection with any proceeding for the collection of an amount owed the United States. Such disclosure may be made in the course of computer matching having the purpose of obtaining the information indicated above. Third parties may include other Federal agencies, State probate courts, State drivers' license bureaus, State automobile title and license bureaus and private commercial concerns in the business of providing the information sought.

7. Identifying information, including the debtor's name, Social Security number and VA claim number, along with the amount of indebtedness, may be disclosed to any Federal agency, including the U.S. Postal Service, in the course of conducting computer matching to identify and locate delinquent debtors employed by or receiving retirement benefits from those agencies. Such debtors may be subject to offset of their pay or retirement benefits under the provisions of 5 U.S.C. 5514.

8. Any information in this system, including the nature and amount of a financial obligation as well as the history of debt collection activity against a debtor, may be disclosed to the Federal agency administering salary or retirement benefits to the debtor to assist that agency in initiating offset of salary or retirement benefits to collect delinquent debts owed the United States.

9. The name(s) and address(es) of a debtor(s) may be disclosed to another Federal agency or to a contractor of that agency, at the written request of the head of that agency or designee of the head of that agency for the purpose of conducting Government research or oversight necessary to accomplish a statutory purpose of that agency.

10. Information in this system specifically related to debts resulting from participation in VA programs or pay administration, including the amount of debt, may be disclosed at the request of the subject debtor to accredited service organizations, VA-approved claims agents and attorneys acting under a declaration of representation so that these individuals can aid persons indebted to VA in the preparation, presentation and prosecution of debt-related matters under the laws administered by VA. The name and address of a debtor will not, however, be disclosed to these individuals under this routine use if the debtor has not requested the assistance of an accredited service organization, claims agent or an attorney.

11. Information in this system specifically related to debts incurred as a result of participation in VA benefit programs such as the amount of indebtedness and collection history may be disclosed in the course of presenting

evidence to a court, magistrate or administrative authority in matters of guardianship, inquests and commitments, to private attorneys representing debtors rated incompetent in conjunction with issuance of Certificates of Incompetence and to probation and parole officers in connection with court-required duties.

12. Information in this system related to debts incurred as a result of participation in VA benefit programs, including the amount of indebtedness and history of collection activity, may be disclosed to a VA or court-appointed fiduciary or a guardian ad litem in relation to his or her representation of the subject debtor only to the extent necessary to fulfill the duties of the fiduciary or guardian ad litem.

13. Any relevant information in this system may be disclosed to the Department of Justice and United States Attorneys in the defense or prosecution of litigation involving or pertaining to the United States. Any relevant information in this system may also be disclosed to other Federal agencies upon their request in connection with review of administrative tort claims and potential tort claims filed under the Federal Tort Claims Act, 28 U.S.C. 2672, the Military Claims Act, 10 U.S.C. 2733 and other similar claims statutes.

14. Any information concerning a person's indebtedness to the United States, including personal information obtained from other Federal agencies through computer matching programs, may be disclosed to any third party, except consumer reporting agencies, in connection with any proceeding for the collection of any amount owed to the United States. Purposes of these disclosures include, but are not limited to (a) assisting the Government in collection of debts resulting from participation in Government programs of all categories and pay administration, and (b) initiating legal actions for prosecuting individuals who willfully or fraudulently obtain Government benefits, pay or allowances without entitlement. Third parties may include, but are not limited to, persons, organizations or other entities with contracts for collection services with the Government.

15. The debtor's name, address, Social Security number and the amount (excluding interest) of any indebtedness waived, compromised or written off may be disclosed to the Treasury Department, Internal Revenue Service, as a report of income under 26 U.S.C. 61(a)(12).

Information in CAIVRS may be disclosed to all participating

agencies and lenders who participate in the agencies' programs to enable them to verify information provided by new loan applicants and evaluate the creditworthiness of applicants. Records are disclosed to participating agencies and private-sector lenders by an ongoing computer matching program.

18. Name, Social Security numbers and any other information reasonably necessary to ensure accurate identification may be disclosed to the Department of the Treasury, Internal Revenue Service, to obtain the mailing address of taxpayers who are debtors under this system of records. Disclosure is made by computer matching and pursuant to 26 U.S.C. 6103(m)(2).

19. Any information in a record under this system of records may be disclosed to the United States General Accounting Office (GAO) to enable GAO to pursue collection activities authorized to that office or any other activities within their statutory authority.

20. Any information in this system concerning a debt over 180 days delinquent may be disclosed, by computer matching or otherwise, to the Secretary of the Treasury or to any designated Government disbursing official for purposes of conducting administrative offset of any eligible Federal payments under the authority set forth in 31 U.S.C. 3716. Payments subject to offset include those payments disbursed by the Department of the Treasury, the Department of Defense, the United States Postal Service, any Government corporation or any disbursing official of the United States designated by the Secretary of the Treasury. 22. The name and address of a debtor, other information as is reasonably necessary to identify such person, including personal information obtained from other Federal, state or local agencies as well as private sources through computer matching, and other information concerning the person's indebtedness to the United States, may be disclosed to third parties, including Federal, State and local government agencies to determine the debtor's employer. Such information may be used to initiate garnishment of disposable pay in accordance with the provisions of 31 U.S.C. 3720D.

23. The name and address of a debtor, and such other information as may be necessary for identification of that debtor, may be disclosed to a debtor's employer for purposes of initialing garnishment of the disposable pay of that debtor under the provisions of 31 U.S.C. 3720D.

24. The names and addresses of delinquent debtors, along with the amounts of their debts, may be published or otherwise publicly disseminated subject to the provisions of 31 U.S.C. 3720E.

Disclosure to consumer reporting agencies:

Disclosures pursuant to 5 U.S.C. 552a(b)(12) may be made from this record system to consumer reporting agencies as defined in the Fair Credit Reporting Act 15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1966 31 U.S.C. 3701(a)(3). The disclosure is limited to information necessary to establish the identity of the individual, including name, address, and taxpayer identification number (Social Security number), the amount, status and history of the claim; and the agency or program under which the claim arose for the sole purpose of allowing the consumer reporting agency to prepare a commercial credit report. 38 U.S.C. 5701(g) governs the release of names and addresses of any person who is a present or former member of the Armed Forces, or who is a dependent of such a person, to consumer reporting agencies under certain circumstances. Routine uses, above, provide for disclosure under those circumstances.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Records are maintained on magnetic tape and disk, microfilm, microfiche, optical disk and paper documents. DMC does not routinely maintain paper records of individual debtors in file folders with the exception of correspondence, and replies thereto, from Congress, the White House, members of the Cabinet and other similar sources. Paper records related to accounts receivable may be maintained in individual file folders located at VA regional offices, health care facilities, HAC and other agencies referring debts to VA in its capacity as a Government-wide cross-servicing debt collection center. Generally and with the exception of claims against third-party insurers and certain first-party medical debts, such papers maintained outside of DMC are not used directly in the debt collection process unless they are first forwarded to DMC. Information stored on magnetic media for most VA benefit debts, including first-party medical, may be accessed through a data telecommunications terminal system designated as CAROLS (Centralized Accounts Receivable On-Line System). Most CAROLS terminals are located in DMC; however, VA regional offices generally each have one terminal for inquiry purposes. Records of debts referred to VA in its capacity as a Government-wide cross servicing debt collection center will be accessible only to employees of DMC. Information stored on magnetic media and related to the All-Volunteer Force Educational Assistance, education loan, miscellaneous home loan or HAC debt collection programs may be accessed through personal computers. Records provided to the Department of Housing and Urban Development for inclusion in the Credit Alert Interactive Voice Response System (CAIVRS) are maintained on magnetic media at the HUD Data Processing Center in Lanham, Maryland. Records provided to the Department of the

Treasury for administrative offset or referral to a designated debt collection center, private collection agency or the Department of Justice are maintained on magnetic media at the Financial Management Service Debt Collection Operations System in Hyattsville, Maryland. For VA benefit debts other than miscellaneous home loan, first-party medical and CHAMPVA, identifying information, the amount of the debt and benefit source of the debt may be stored on magnetic media in records that serve as the database for the VA Benefits Delivery Network (BDN). The BDN is operated for the adjudication of VA claims and the entry of certain fiscal transactions. The identifying information, the amount of the debt and benefit source of the debt are transmitted to the Centralized Accounts Receivable System (CARS) or a personal computer local area network system before collection activity commences. When a debtor is awarded gratuitous benefits under VA programs, the BDN may operate to offset all or part of retroactive funds awarded, if any, to reduce the balance of the indebtedness. The Veterans Health Information Systems and Technology Architecture (VISTA), through its various modules, is used to create and store first-party medical charges and debts associated with the provision of health care benefits. The identifying information about the person, the amount of the debt and program source of the debt may be transmitted to CARS as part of the collection process. When a person receives care under the auspices of VA, a VA medical facility may collect all or part of a charge or debt.

Retrievability:

Paper documents, microfilm and microfiche related to VA claims and debts are indexed by VA file number or date of receipt. Automated records of VA claims and debts are indexed by VA claim number, Social Security account number, name and loan account number in appropriate circumstances. Paper documents, microfilm, microfiche and automated records of pay administration debts and debts referred to VA for cross servicing are indexed by Social Security account number or Taxpayer Identification Number. Records in CAIVRS may only be retrieved by Social Security number.

Safeguards:

1. Physical Security: (a) Access to working spaces and document storage areas in DMC is restricted by cipher locks and to VA employees on a need-to-know basis. Generally, document storage areas in VA offices other than DMC are restricted to VA employees on a need-to-know basis. VA offices are generally protected from outside access by the Federal Protective Service or other security personnel. Strict control measures are enforced to ensure that access to and disclosure from documents, microfilm and microfiche are limited to a need-to-know basis. (b) Access to CAROLS data telecommunications terminals is by authorization controlled by the site security officer. The security officer is assigned responsibility for privacy-security measures, especially for review of violation logs, information logs and control of password distribution. © Access to data processing centers is generally restricted to center employees, custodial personnel, Federal Protective Service and other security personnel. Access to computer rooms is restricted to authorized operational personnel through

electronic locking devices. All other personnel gaining access to computer rooms are escorted.

2. CAROLS and Personal Computer Local Area Network (LAN)

Security: (a) Usage of CAROLS and LAN terminal equipment is protected by password access. Electronic keyboard locks are activated on security errors. (b) At the data processing centers, identification of magnetic media containing data is rigidly enforced using labeling techniques. Automated storage media which are not in use are stored in tape libraries which are secured in locked rooms. Access to programs is controlled at three levels: programming, auditing and operations.

3. CAIVRS Security: Access to the HUD data processing center from which CAIVRS is operated is generally restricted to center employees and authorized contact employees. Access to computer rooms is restricted to authorized operational personnel through locking devices. All other persons gaining access to computer rooms are escorted.

Records in CAIVRS use Social Security numbers as identifiers. Access to information files is restricted to authorized employees of participating agencies and authorized employees of lenders who participate in the agencies' programs. Access is controlled by agency distribution of passwords. Information in the system may be accessed by use of a touch-tone telephone by authorized agency and lender employees on a need-to-know basis.

4. Department of the Treasury Security: Access to the system is on a need-to-know basis, only, as authorized by the system manager. Procedural and physical safeguards are utilized to include accountability, receipt records and specialized communications security. The data system has an internal mechanism to restrict access to authorized officials. The building is patrolled by uniformed security guards.

Retention and disposal:

Microfilm and microfiche are retained in metal cabinets in DMC for 25 years. CARS records are retained until termination of debt collection (payment in full, write off, compromise or waiver). All other automated storage media are retained and disposed of in accordance with disposition authorization approved by the Archivist of the United States. DMC generally forwards all substantive paper documents to VA regional offices, health care facilities and CHAMPVA Center for storage in claims files, patient treatment files, imaging systems or loan files. Those documents are retained and disposed of in accordance with the appropriate system of records. Information provided to HUD for CAIVRS is stored on magnetic tape. The tapes are returned to VA for updating each month. HUD does not keep separate copies of the tapes. Information provided to the Department of the Treasury for the Treasury Offset Program is transferred electronically and stored by Treasury on magnetic media.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

To the extent that records contained in the system include information protected by 26 U.S.C. 6103(p)(4), i.e., the nature, source and amount of income, that information cannot be disclosed under a Routine Use set forth absent specific authorization from the IRS or the VA Office of General Counsel (024).

1. The record of an individual who is covered by this system may be disclosed to a member of Congress or staff person acting for the member when the member or staff person requests the record on behalf of, and at the written request of, that individual.

2. Disclosure of HEC (formerly IVM) records, as deemed necessary and proper to named individuals serving as accredited service organization representatives and other individuals named as approved agents or attorneys for a documented purpose and period of time, to aid beneficiaries in the preparation and presentation of their cases during the verification and/or due process procedures and in the presentation and prosecution of claims under laws administered by the Department of Veterans Affairs (VA).

3. In the event that information in this system of records maintained by this agency to carry out its functions, indicates a suspected violation or reasonably imminent violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or a particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records may be referred at VA's initiative, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto. However, names and addresses of veterans and their dependents will be released only to Federal entities.

Information may be disclosed under this routine use only to the extent that it is reasonably necessary for the following purposes: (a) To assist the VA in the collection of costs of services provided individuals not entitled to such services; and (b) to initiate civil or criminal legal actions for collecting amounts owed to the United States and/or for prosecuting individuals who willfully or fraudulently obtained or seek to obtain title 38 medical benefits. This disclosure is consistent with 38 U.S.C. 5701(b)(6).

10. The name and address of a veteran, other information as is reasonably necessary to identify such veteran, including personal information obtained from other Federal agencies through computer matching programs, and any information concerning the veteran's indebtedness to the United States by virtue of the person's participation in a benefits program administered by the VA may be disclosed to a consumer reporting agency for purposes of assisting in the collection of such indebtedness, provided that the provisions of 38 U.S.C. 5701(g)(4) have been met.

11. For computer matching program and Automated Data Processing (ADP) security review purposes, record information may be disclosed to teams from other source Federal agencies who are parties to computer matching

agreements involving the information maintained in this system, but only to the extent that the information is necessary and relevant to the review.

Relevant information from this system may be disclosed to individuals, organizations, private or public agencies, etc., with whom VA has a contract or agreement to perform such services as VA may deem practicable for the purposes of laws administered by VA in order for the contractor or subcontractor to perform the services of the contract or agreement.

Note: This routine use does not authorize disclosure of FTI received from the Internal Revenue Service or the Social Security Administration to contractors or subcontractors.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Records are maintained on magnetic tape, magnetic disk, optical disk and paper.

Retrievability:

Records (or information contained in records) maintained on paper documents are indexed and accessed by the veteran's name, social security number or case number and filed in case order number. Automated veterans' health eligibility records are indexed and retrieved by the veteran's name, social security number or case number. Automated health eligibility record information on spouses may be retrieved by the spouse's name or social security number.

Safeguards:

1. Data transmissions between VA health care facilities and the HEC and VA databases housed at VA's AAC are accomplished using the Department's wide area network. The software programs at the respective facilities automatically flag records or events for transmission based upon functionality requirements. VA health care facilities and the HEC control access to data by using VHA's Veterans Health Information System and Technology Architecture (VISTA),

(formerly known as Decentralized Hospital Computer Program (DHCP) software modules), specifically Kernel and MailMan. Kernel utility programs provide the interface between operating systems, application packages and users. Once data are identified for transmission, records are stored in electronic mail messages, which are then transmitted via the Department's electronic communications system (wide area network) to specific facilities on the Department's wide area network. Server jobs at each facility run continuously to check for data to be transmitted and/or incoming data which needs to be parsed to files on the receiving end. All mail messages containing data transmissions include header information that is used for validation purposes. Consistency checks in the software are used to validate the transmission, and electronic acknowledgment messages are returned to the sending application. The Department's Telecommunications Support Service has oversight responsibility for planning security.

2. Working spaces and record storage areas at the HEC are secured during all business hours, as well as during non-business hours. All entrance doors require an electronic passcard for entry when unlocked, and entry doors are locked outside normal business hours. Electronic passcards are issued by the HEC Security Officer. HEC staff controls visitor entry by door release or escort. The building is equipped with an intrusion alarm system for non-business hours, and this system is monitored by a security service vendor. The office space occupied by employees with access to veteran records is secured with an electronic locking system, which requires a card for entry and exit of that office space. Access to the VA AAC is generally restricted to AAC staff, VA Headquarters employees, custodial personnel, Federal Protective Service and authorized operational personnel through electronic locking devices. All other persons gaining access to the computer rooms are escorted.

3. Strict control measures are enforced to ensure that access to and disclosure from all records, including electronic files and veteran specific data elements, stored in the HEC veteran database is limited to VA employees whose official duties warrant access to those files. The HEC automated record system recognizes authorized users by keyboard entry of a series of unique passwords. Once the employee is logged onto the system, access to the files is controlled by discrete menus which are assigned by the HEC computer system administration staff, upon request from the employee's supervisor and employee's demonstrated need to access the data to perform the employee's assigned duties. A number of other security measures are implemented to enhance security of electronic records (automatic timeout after short period of inactivity, device locking after pre-set number of invalid logon attempts, etc.). Employees are required to sign a user access agreement acknowledging their knowledge of confidentiality requirements, and all employees receive annual training on information security. Access is deactivated when no longer required for official duties. Recurring monitors are in place to ensure compliance with nationally and locally established security measures.

4. Veteran data is transmitted from the HEC to VA health care facilities and National Enrollment Database (NED) over the Department's computerized

electronic communications system. Access to data in these files is controlled at the health care facility and NED level in accordance with nationally and locally established data security procedures. The NED is a database developed to support a national enrollment system. VA employees at these facilities are granted access to patient data on a "need-to-know" basis. All employees receive information security training and are issued unique access and verify codes. Employees are assigned computer menus that allow them to view and edit records as authorized by the supervisor. While employees at the health care facility may edit data which was initially input at the facility level, employees at the facility do not have edit access to income tests which originated at the HEC.

5. In addition to passcards, the HEC computer room requires manual entry of a security code prior to entry. Only the Automated Information System (AIS) staff and the HEC security officer are issued the security code to this area. Programmer access to the HEC database is restricted only to those AIS staff whose official duties require that level of access.

6. On-line data reside on magnetic media in the HEC computer room that is highly secured. Backup media are stored in a combination lock safe in a secured room within the same building; only information system staff has access to the safe. On a weekly basis, backup media are stored in off-site storage by a media storage vendor. The vendor picks up and returns the media in a locked storage container; vendor personnel do not have key access to the locked container.

7. Any sensitive information that may be downloaded to personal computer files in the HEC or printed to hard copy format is provided the same level of security as the electronic records. All paper documents and informal notations containing sensitive data are shredded prior to disposal. All magnetic media (primary computer system) and personal computer disks are degaussed prior to disposal or release off site for repair.

8. The IVM program of the HEC requires that HEC obtain veteran and spouse earned and unearned income data from IRS and SSA. The HEC complies fully with the Tax Information Security Guidelines for Federal, State and Local Agencies (Department of the Treasury IRS Publication 1075) as it relates to access and protection of such data. These guidelines define the management of magnetic media, paper and electronic records, and physical and electronic security of the data.

9. All new HEC employees receive initial information security training with refresher training provided to all employees on an annual basis. An annual information security audit is performed by the VA Regional Information Security Officer. This annual audit includes the primary computer information system, the telecommunication system, and local area networks. Additionally, the IRS performs periodic on-site inspections to ensure the appropriate level of security is maintained for Federal tax data. The HEC Information Security Officer and AIS administrator additionally perform periodic reviews to ensure security of the system and databases.

10. Identification codes and codes used to access HEC automated communications systems and records systems, as well as security profiles and possible security violations, are maintained on magnetic media in a secure

environment at the Center. For contingency purposes, database back-ups on removable magnetic media are stored off-site by a licensed and bonded media storage vendor.

11. Neither field offices, the contractor administering the Call Center for VHA, nor the NED will receive FTI from HEC.

12. Contractor working spaces and record storage areas are secured during all business hours, as well as during non-business hours. All entrance doors require an electronic passcard for entry when unlocked, and entry doors are locked outside normal business hours. Electronic passcards are issued by the contractor's Security Officer. Visitor entry is controlled by the contractor's staff by door release and/or door escort. The building is equipped with an intrusion alarm system for non-business hours, and this system is monitored by a security service vendor.

13. Strict control measures are enforced to ensure that access to and disclosure from all records including electronic files and veteran specific data elements in the contractor veteran call tracking database are limited to contractor's employees whose official duties warrant access to those files. The automated record system recognizes authorized users by keyboard entry of a series of unique passwords. Once the employee is logged onto the system, access to files is controlled by discrete menus, assigned by the contractor computer system administration staff upon request from the employee's supervisor and the employee's demonstrated need to access the data to perform assigned duties. A number of other security measures are implemented to enhance security of electronic records (automatic timeout after short period of inactivity, device locking after pre-set number of invalid logon attempts, etc.). Employees are required to sign a user security policy agreement acknowledging their understanding of confidentiality requirements, and all employees receive annual training on information security. Access is deactivated when no longer required for official duties.

14. Contractors and subcontractors will adhere to the same safeguards and security requirements as the HEC is held to.

Retention and disposal:

Depending on the record medium, records are destroyed by either shredding or degaussing. Paper records are destroyed after they have been accurately scanned on optical disks. Optical disks or other electronic medium are deleted when all phases of the veteran's appeal rights have ended (ten years after the income year for which the means test verification was conducted). Tapes received from SSA and IRS are destroyed 30 days after the data have been validated as being a true copy of the original data. Summary reports and other output reports are destroyed when no longer needed for current operation. Records are disposed of in accordance with the records retention standards approved by the Archivist of the United States, National Archives and Records Administration, and published in the VHA Records Control Schedule 10-1. Regardless of the record medium, no records will be retired to a Federal records center.

System name: Electronic Document Management System (EDMS)-VA.

System location:

Automated records are maintained within the Electronic Document Management System (EDMS) at the Department of Veterans Affairs Central Office, 810 Vermont Avenue, NW, Washington, DC 20420. Paper correspondence records are maintained in file cabinets under the control of the office responsible for processing the correspondence item.

Categories of individuals covered by the system:

Members of Congress and their staff, officials and representatives of other Federal agencies, state, local and tribal governments, Foreign governments, and veterans service organizations; representatives of private or commercial entities; veterans and their beneficiaries; other private citizens; and VA employees.

Categories of records in the system:

Records are maintained in electronic and paper form depending on the nature of the materials received, background information compiled, and/or response sent. Each may include the names, social security numbers, mailing addresses, telephone numbers, and other personal identifiers routinely required to identify a correspondent or subject. Other record items maintained may include personal facts about medical, financial, or memorial benefits related to the correspondent, veteran or beneficiary. Internal VA records may include (but are not limited to) VA administrative, financial and personnel information. Records may include scanned document, letter, e-mail, fax, Internet document, tracking sheet, note, documentation of a telephone call and/or of a meeting with an individual.

Authority for maintenance of the system:

Title 38, United States Code, 501(c).

Purpose(s):

EDMS is used to process replies to correspondence and other inquiries that originate from members of Congress; other Federal agencies; state, local, and tribal governments; Foreign governments; veterans service organizations; representatives of private or commercial entities; veterans and their beneficiaries; private citizens; and VA employees. EDMS is also used for some categories of correspondence and records internal to VA.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. VA may disclose the records in this system, except for the name and address of a veteran, that it determines are relevant to a suspected violation or reasonably imminent violation of law, whether civil, criminal or regulatory in nature, and whether arising by general or program statute or by regulation, rule or order issued pursuant thereto, to a Federal, state, local, tribal or foreign agency charged with the responsibility of investigating or prosecuting such violation, or charged with enforcing or implementing the statute, regulation or order issued pursuant thereto.

2. VA may disclose the name and address of a veteran that it determines are relevant to a suspected violation or reasonably imminent violation of law, whether civil, criminal or regulatory in nature, and whether arising by general or program statute or by regulation, rule or order issued pursuant thereto, to a Federal agency charged with the responsibility of investigating or prosecuting such violation, or charged with enforcing or implementing the statute, regulation or order issued pursuant thereto.

3. VA may disclose the records in proceedings before a court or adjudicative body before which VA is authorized to appear when VA, a VA official or employee, the United States, or an individual or entity for whom the United States is providing representation is a party to litigation or has an interest in such litigation, and VA determines that the use of such records is relevant and necessary to the litigation, provided, however, that in each case, the agency determines that disclosure of the records is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

4. Information may be provided to Members of Congress or staff persons in response to an inquiry from an individual to Members of Congress, made at the request of the individual and concerning that individual's VA records. Such information will be provided as authorized by law.

5. Information may be provided to a third party acting on an individual's behalf, such as agencies of Federal, state, local and tribal governments, Foreign governments; veterans service organizations; representatives of private or commercial entities in response to a request made by the individual to the third party and concerning that individual's VA records. Such information will be provided as authorized by law.

6. VA may compile statistical information using records contained in EDMS, except for identification information of a veteran such as name, address or social security number. This information may be disclosed to other VA facilities, Members of Congress; other Federal agencies; state, local and tribal governments. VA will determine that the use of such statistical information is relevant and necessary, that disclosure of the information contained in the records is compatible with the purpose for which the records were collected.

7. Disclosure may be made during reviews by the National Archives and Records Administration in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

8. To disclose relevant information to the Department of Justice and United States Attorneys in defense or prosecution of litigation involving the United States.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

EDMS employs rotational magnetic disk and Write Once-Read Many (WORM) optical disk media for storage of electronic records. Electronic records are regularly copied and moved to a separate physical location to assure a fail-

safe records recovery capability. Paper records are maintained in file cabinets under the control of the office responsible for processing the record.

Retrievability:

Key identification information is established for each record in EDMS. This information is in relation to the nature of materials received, background information compiled and/or response sent. Retrieval is by searching for specific key information (e.g., record identification number, author, correspondent name, subject matter, initial date record established, etc.).

Safeguards:

Access to EDMS is via personal computer terminal. Necessary and sufficient application security functionality (i.e., unique customer user identification code/password and user-specific administrative control levels) are used to limit access to authorized VA staff, and to limit operations they may perform. To obtain access to EDMS' electronic records, VA staff must comply with the following procedures:

1. VA staff may not self-register in the system for access. A request for a user identification code and password is reviewed and approved by the designated EDMS Office Coordinator, and entered into the system by the system administrator. Approved staff are issued a user identification code and a temporary password, which they are required to change when they first sign onto the system.

2. Electronic records are protected by classifications, specified when the records are created. The owner of the record or authorized security personnel are the only ones who can modify the classification. A user's rights to inspect or modify records will depend on the user's assigned administrative control level as compared to the record's classification. The EDMS System Administrator manages the records classifications and user administration control levels.

Retention and disposal:

Records will be maintained and disposed of in accordance with the records disposal authority approved by the Archivist of the United States, the National Archives and Records Administration. Paper records will be destroyed by shredding or other appropriate means for destroying sensitive information. Automated storage records are retained and destroyed in accordance with disposition authorization approved by the Archivist of the United States.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Electronic data are maintained on Direct Access Storage Devices at the AAC, Austin, Texas, and on optical disks at VA Central Office, Washington, DC. AAC stores registry tapes for disaster back up at an off-site location. VA Central Office also has back-up optical disks stored off-site. In addition to electronic data, registry reports are maintained on paper documents and microfiche.

Retrievability:

Records are indexed by name of veteran and social security number.

Safeguards:

Access to records to VA Central Office is only authorized to VA personnel on a "need to know" basis. Records are maintained in manned rooms during working hours. During non-working hours, there is limited access to the building with visitor control by security personnel. Registry data maintained at the AAC can only be updated by authorized AAC personnel. Read access to the data is granted through a telecommunications network to authorized VA Central Office personnel. AAC reports are also accessible through a telecommunications network on a read-only basis to the owner (VA facility) of the data. Access is limited to authorized employees by individually unique access codes which are changed periodically. Physical access to the AAC is generally restricted to AAC staff, VA Central Office employees, custodial personnel, Federal Protective Service, and authorized operational personnel through electronic locking devices. All other persons gaining access to the computer rooms are escorted. Backup records stored off-site for both the AAC and VA Central Office are safeguarded in secured storage areas.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

The ADDFS is stored in a secure area located at VA's Automation Center, 1615 E. Woodward Street, Austin, Texas 78772. Specifically, in order to obtain access to the automated records in this system of records, an individual must have access to VA's automated resources. Access to the ADDFS at VA's Automation Center is limited as follows: An individual may not self-register for this access. Formal documentation of the request for access, signed by the employee's supervisor and approved by the Director, Center for Minority Veterans, is required before an individual may obtain such access. Authorized customers are issued a customer identification code and a one-time password. Access to paper records maintained by the Center for Minority Veterans is limited to VA employees who need to have access to the records in order to perform their agency duties. Generally, file areas are locked after normal duty hours and the Federal Protective Service or other security personnel protect the offices from outside access.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Information from this system of records may be disclosed in accordance with the following routine uses:

1. Disclosure of identifying information, such as names, SSNs, demographic and utilization data, may be made to Federal, State, local, or tribal agencies such as the DoD, HCFA, and Medicare Payment Advisory Commission (MedPAC), as part of statistical matching programs for the purpose of better identifying the total current health care usage of the patient population served by VA in order to forecast future demand for VA medical care by VA medical facilities.

2. Disclosure may be made to Federal, State, local, and tribal government agencies and national health organizations in order to assist in the development of programs that will be beneficial to claimants and assure that they are receiving all benefits to which they are entitled.

3. Disclosure may be made of information relevant to or indicating a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, to Federal, State, local, or tribal agencies charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order listed pursuant thereto.

4. Disclosure may be made, excluding name and address (unless name and address are furnished by the requestor) for research purposes determined to be necessary and proper, to epidemiological and other research facilities approved by the Under Secretary for Health.

5. In order to conduct Federal research necessary to accomplish a statutory purpose of an agency, at the written request of the recipient agency, the name (s) and address (s) of present or former personnel of the Armed Services and/or their dependents may be disclosed (a) To a Federal department or agency or (b) directly to a contractor of a Federal department or agency. When disclosure of this information is to be made directly to the contractor, VA may impose applicable conditions on the department, agency and/or contractor to insure the appropriateness of the disclosure to the contractor.

6. Disclosure may be made to National Archives and Records Administration (NARA), General Services Administration (GSA) in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

7. Records from this system of records may be disclosed to the Department of Justice or in a proceeding before a court, adjudicative body, or other administrative body before which the Agency is authorized to appear when: The Agency, or any component thereof; or any employee of the Agency in his or her official capacity; where the Department of Justice or the Agency has agreed to represent the employee; or the U.S. when the Agency determines that litigation is likely to affect the Agency or any of its components, is a party to litigation, and has an interest in such litigation, and the use of such records by the Department of Justice or the Agency is deemed by the Agency to be relevant and necessary to the litigation provided, however, that the disclosure is compatible with the purpose for which the records were collected.

8. Disclosure may be made to individuals, organizations, private or public agencies, etc., with whom VA has a contract or agreement to perform such services as VA may deem practicable for the purposes of laws administered by VA, in order for the contractor or subcontractor to perform the services of the contract or agreement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Data are maintained on magnetic tape, disk, or laser optical media.

Retrievability:

Records may be retrieved by name, name and one or more criteria (e.g., dates of birth, death and service), SSN or VA claim number.

Safeguards:

1. Access to and use of these records is limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

2. Access to Automated Data Processing files is controlled at two levels: (1) Terminals, central processing units, and peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected; and (2) the system recognizes authorized users by means of an individually unique password entered in combination with an individually unique user identification code.

3. Access to automated records concerning identification codes and codes used to access various VA automated communications systems and records systems, as well as security profiles and possible security violations is limited to designated automated systems security personnel who need to know the information in order to maintain and monitor the security of VA's automated communications and veterans' claim records systems. Access to these records in automated form is controlled by individually unique passwords/codes. Agency personnel may have access to the information on a need to know basis when necessary to advise agency security personnel or for use to suspend or revoke access privileges or to make disclosures authorized by a routine use.

4. Access to VA facilities where identification codes, passwords, security profiles and possible security violations are maintained is controlled at all hours

by the Federal Protective Service, VA or other security personnel and security access control devices.

Retention and disposal:

Copies of back-up computer files will be maintained at VA Management Science Group, Bedford, Massachusetts, and VA Information Resource Center, Hines, Illinois.

Records will be maintained and disposed of in accordance with the records disposal authority approved by the Archivist of the United States, the National Archives and Records Administration, and published in Agency Records Control Schedules.

System name: Disaster Emergency Medical Personnel System—VA.

System location:

Records are maintained at each of the Department of Veterans Affairs (VA) health care facilities. The address locations for VA facilities were listed in VA Appendix I of the biennial publication of the VA systems of record. Information from these records or copies of records may be maintained at the Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420; Network Directors' Offices; Emergency Management Strategic Healthcare Group Headquarters, VA Medical Center, Martinsburg, WV 25401; or with the Area Emergency Managers located at VA facilities.

Categories of individuals covered by the system:

VA employees who make application to VA and are considered for deployment as health care providers primarily in times of national emergencies in response to domestic disasters resulting from natural and technological hazards, terrorist attacks, and the employment of nuclear, biological, and/or chemical weapons of mass destruction. These individuals may include audiologists, dentists, dietitians, expanded-function dental auxiliaries, licensed practical vocational nurses, nuclear medicine technologists, nurse anesthetists, nurse practitioners, nurses, occupational therapists, optometrists, clinical pharmacists, licensed physical therapists, physician assistants, physicians, podiatrists, psychologists, registered respiratory therapists, certified respiratory therapy technicians, diagnostic and therapeutic radiology technologists, social workers, speech pathologists, contracting specialists, building maintenance, engineering, housekeeping, and other personnel associated with emergency management.

Categories of records in the system:

Information on VA employees who make application to be deployed as health care providers primarily in times of national emergencies. This source document provides personal and demographic information initiated, provided and authenticated by the employee and contains the necessary approvals and signatures of officials in the supervisory chain for the employee's inclusion in the data base. Information is provided on a voluntary basis. Information related to identifying and selecting individuals by the Emergency Management Strategic Healthcare Group, networks and medical centers eligible to support specific job tasking and assignments during either disasters internal to the Veterans Health Administration health care system, or external to VHA for which the VA is tasked to provide support, under applicable authorities. Requests for issuance of travel orders and necessary reimbursement to VA for subsequent allocation of funds to home stations of deployed personnel are required to cover costs of travel, overtime and other expenses associated with individual deployments. This information is necessary to account for personnel deployed to support disasters, to identify personnel with specific job skills and experience that may be required to support contingency missions tasked to VA under the VA/Department of Defense (DoD) Contingency Plan, and for the development of plans at the

corporate, network and medical center level for utilization of VHA personnel in support of VA internal and external disasters.

Authority for maintenance of the system:

Authority for maintenance of this system of records is Executive Order 12656 dated November 18, 1988.

Purpose(s):

The records may be used for such purpose as to provide information on sufficient health care medical personnel to respond to disasters, to provide information to the Emergency Management Strategic Healthcare Group primarily in times of national emergencies caused by catastrophic events, and to respond to internal emergencies occurring within the Veterans Integrated Service Networks.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Information may be disclosed for routine uses as indicated below:

1. Selected information (such as name, social security number, home station and telephone numbers) may be disclosed to other Federal departments and agencies that have an interest in or obligation to track or otherwise audit transfer of funds to VA for reimbursement of tasks.

2. Statistical information and other data may be disclosed to Federal, State and local government agencies to assist in disaster planning and after-action reports.

3. When a record on its face, or in conjunction with other records, indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, disclosure may be made to the appropriate agency, whether Federal, foreign, State, local, or tribal, or other public authority responsible for enforcing, investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto, if the information disclosed is relevant to any enforcement, regulatory, investigative or prosecutive responsibility of the receiving entity.

4. Disclosure may be made to any source, such as a police department or the Federal Bureau of Investigation, from which additional information is requested to the extent necessary to identify the individual, inform the source of the purpose(s) of the request, and to identify the type of information requested such as DEMPS personnel present at a crime scene caused by terrorists.

5. Disclosure may be made to an agency in the executive, legislative, or judicial branch, or the District of Columbia's Government in response to its request, or at the initiation of VA, for information in connection with the selection of an employee for the deployment and future training of an individual, the letting of a contract, the issuance of a license, grant, or other benefits by the requesting agency, or the lawful statutory, administrative, or investigative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's deployment/Federal Response Plan needs.

6. Disclosure may be made to a Member of Congress or to a congressional staff member in response to an inquiry of the congressional office made at the written request of the constituent about whom the record is maintained.

7. Disclosure may be made to the National Archives and Records Administration (NARA) in records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

8. Disclosure may be made to a Federal agency or to a State or local government licensing board, and/or to the Federation of State Medical Boards, or a similar non-government entity, provided the entity maintains records concerning individuals' employment histories, is engaged in the issuance, retention or revocation of licenses, certifications, or registration necessary to practice an occupation, profession or specialty. The disclosure is for the Department to obtain information relevant to a Department decision concerning the hiring, retention or termination of an employee, or to inform a Federal agency, licensing boards or to the appropriate non-government entities about the health care practices of a terminated, resigned, or retired health care employee whose professional health care activity so significantly failed to conform to generally accepted standards of professional medical practice as to raise reasonable concern for the health and safety of patients receiving medical care in the private sector or from another Federal agency. These records may also be disclosed as part of an ongoing computer matching program to accomplish these purposes.

9. Information may be disclosed to private sector (i.e., non-Federal, State, or local governments) agencies, organizations, boards, bureaus, or commissions (e.g., the Joint Commission on Accreditation of Healthcare Organizations) when the disclosure is in the best interest of the government (e.g., to obtain accreditation or other approval rating). When cooperation with the private sector entity, through the exchange of individual records, directly benefits VA's completion of its mission, enhances personnel management functions, or increases the public confidence in VA's or the Federal government's role in the community, then the government's best interests are served. Further, only such information that is clearly relevant and necessary for accomplishing the intended uses of the information as certified by the receiving private sector entity is to be furnished.

10. Information may be disclosed to a State or local government entity or national certifying body that has the authority to make decisions concerning the issuance, retention or revocation of licenses.

11. Information may be disclosed to the Department of Justice and United States Attorneys in defense or prosecution of litigation involving the United States, and to Federal agencies upon their request in connection with review of administrative tort claims filed under the Federal Tort Claims Act, 28 U.S.C. 2672.

12. Information on deployment to Federal/VHA emergencies, performance, or other personnel-related material may be disclosed to any facility with which there is, or there is proposed to be, an affiliation, sharing agreement, contract, or similar arrangement, for purposes of establishing, maintaining, or expanding any such relationship.

13. Information concerning a health care provider's professional qualifications and clinical privileges may be disclosed to a VA/ emergency disaster-served client patient, or the representative or guardian of a patient who, due to physical or mental incapacity, lacks sufficient understanding and/or legal capacity to make decisions concerning his/her medical care, who is receiving or contemplating receiving medical or other patient care services from the provider when the information is needed by the patient or the patient's representative or guardian in order to make a decision related to the initiation of treatment, continuation or discontinuation of treatment, or receiving a specific treatment that is proposed or planned by the provider. Disclosure will be limited to information concerning the health care provider's professional qualifications (professional education, training and current licensure/certification status), professional employment history, and current clinical privileges.

14. Information may be disclosed to officials of labor organizations recognized under 5 U.S.C. chapter 71, when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting working conditions.

15. Information may be disclosed to the VA-appointed representative of an employee of all notices, determinations, decisions, or other written communications issued to the employee in connection with an examination ordered by VA under medical evaluation (formerly fitness-for-duty) examination procedures or Department-filed disability retirement procedures.

16. Information may be disclosed to officials of the Merit Systems Protection Board, including the Office of the Special Counsel, when requested in connection with appeals, special studies of the civil service and other merit systems, review of rules and regulations, investigation of alleged or possible prohibited personnel practices, and such other functions, promulgated in 5 U.S.C. 1205 and 1206, or as may be authorized by law.

17. Information may be disclosed to the Equal Employment Opportunity Commission when requested in connection with investigations of alleged or possible discrimination practices, examination of Federal affirmative employment programs, compliance with the Uniform Guidelines of Employee Selection Procedures, or other functions vested in the Commission by the President's Reorganization Plan No. 1 of 1978.

18. Information may be disclosed to the Federal Labor Relations Authority (including its General Counsel) when requested in connection with investigation and resolution of allegations of unfair labor practices, and in connection with the resolution of exceptions to arbitrator awards when a question of material fact is raised.

19. Disclosure may be made to agency contractors, grantees, or volunteers who have been engaged to assist the agency in the performance of a contract service, grant, cooperative agreement, or other activity related to this system of records and who need to have access to the records in order to perform the activity. Recipients shall be required to comply with the requirement of the Privacy Act of 1974, as amended, 5 U.S.C. 552a.

Disclosure to consumer reporting agencies:

Reports of all transactions dealing with data will be used within VA and will not be provided to any consumer-reporting agency.

Policies and practices for storing, retrieving, accessing, Retaining and Disposing of records in the system:**Storage:**

Automated records are maintained at all levels of management outlined in system location. Automated information may be stored on microfilm, magnetic tape, disk, or call down data bases.

Retrievability:

Records are retrieved from the system by the name, professional title, social security number, VISN, home station, professional specialty, job position title, etc., of the individuals on whom they are maintained.

Safeguards:

1. Access to VA working and storage areas in VA health care facilities is restricted to VA employees on a need-to-know basis; strict control measures are enforced to ensure that disclosure to these individuals is also based on this same principle. Generally, VA file areas are locked after normal duty hours, and the health care facilities are protected from outside access by the Federal Protective Service or other security personnel.

2. Access to the Veterans Health Information Systems Technology Architecture (VISTA) computer room within the health care facilities is generally limited by appropriate security devices and restricted to authorized VA employees and vendor personnel. ADP peripheral devices are generally placed in secure areas (areas that are locked or have limited access) or are otherwise protected. Authorized VA employees may access information in the VISTA system. Access to file information is controlled at two levels: The system recognizes authorized employees by a series of individually unique passwords/ codes as a part of each data message, and the employees are limited to only that information in the file which is needed in the performance of their official duties.

Retention and disposal:

An automated database of DEMPS personnel will be maintained at the employing VA facility. If the individual transfers to another VA facility location, the name will be added to the database at the new location. Information stored on electronic storage media is maintained and disposed of in accordance with the records disposition authority approved by the Archivist of the United States.

System manager(s) and address:

Official responsible for maintaining the system: Director, Emergency Management Strategic Healthcare Group (EMSHG) (104), VA Medical Center, Martinsburg, West Virginia, 25401.

Contesting record procedures:

(See Record Access Procedures above.)

Record source categories:

The information will be provided by the individual VA employee and the VA medical facility (home station) or other VA location at which the employee was employed. EMSHG Headquarters will also provide information for updates of deployment status and availability.

101VA05

System name: Professional Standards Board Action and Proficiency Rating Folder (Title 38)-VA.

System location:

Active records are maintained at the Department of Veterans Affairs (VA) Central Office, 810 Vermont Avenue, NW, Washington, DC 20420 and VA field facilities. Inactive records are retired to the National Personnel Records Center, 111 Winnebago Street, St. Louis, MO 63118. When VA determines that all or a portion of these records need to be maintained in a different location, e.g., VA Central Office, such records are covered by this system.

Categories of individuals covered by the system:

Current and former employees appointed under 38 U.S.C. 7306, 7401(1), 7401(3), and 7405, except students, trainees, medical support personnel, and those appointed on a fee or without compensation basis. This includes employees such as physicians, dentists, podiatrists, optometrists, nurses, nurse anesthetists, physician assistants, expanded-function dental auxiliaries, certified respiratory therapy technicians, registered respiratory therapists, licensed physical therapists, licensed practical or vocational nurses, occupational therapists, and pharmacists. This system of records does not cover applicants for positions covered by this system of records. Such individuals are covered by the system of records entitled Applicants for Employment Under Title 38, USC-VA (02VA135). It also does not cover the performance appraisals of Title 38 employees appointed under 38 U.S.C. 7306, facility Directors appointed under 38 U.S.C. 7401(1), or "hybrid" title 38 employees appointed under 38 U.S.C. 7401(3) or 7405(a)(1)(B). The performance appraisals of these employees are covered under the Employee Performance File System of Records (OPM/GOVT-2).

Categories of records in the system:

All categories of records may include identifying information, such as name, date of birth, Social Security number, service computation date, facility number, current position title, and the employee's current grade, level, and step rate. Records in this system include:

- a. Copies of the employee's employment application, curriculum vitae, and transcripts of higher education. The original documents are maintained in the General Personnel Records (Title 38)--VA (76VA05).
- b. Board Actions (VA Form 2543) and recommendations/documentation associated with those actions. The Title 38 personnel system utilizes a peer review process for making recommendations concerning appointments, advancements, awards, promotion reconsideration, conversions from one type of Title 38 appointment to another, and other personnel actions. After receiving input from an employee's supervisor, the appropriate Professional Standards Board (the employee's peers) makes recommendations for consideration by appropriate management officials. The recommendations and management action taken are recorded on the VA Form 2543. The VA Form 2543 documenting recommendations and management actions taken because of a

probationary review, separation based on pre-employment suitability, or separation based on failure to meet required physical standards are also included in this system of records. However, all supporting documents associated with the actions in the preceding sentence are to be included in the records system 102VA05. This includes notices of proposed action, materials relied on by VA to support the reason(s) for the action, replies by employees, statements of witnesses, hearing notices, and other reports related to these actions.

c. Proficiency reports documenting the proficiency ratings of employees and any comments associated with those proficiency reports.

d. On-going, periodic assessments of an employee's education, experience, and training to ensure they can effectively meet the requirements of their position (i.e., competency assessments and associated documents).

Authority for maintenance of the system:

38 U.S.C. 501(a), 7304 and 7406(c)(1).

Purpose(s):

This system is a repository for Professional Standards Board recommendations and the information needed to make those recommendations (e.g., employment applications, transcripts of higher education, and proficiency reports). It also contains a record of management actions taken with respect to Professional Standards Board recommendations. The actions taken give legal force and effect to personnel transactions and establish employee rights and benefits under pertinent laws and regulations governing Federal employment. They also provide a basic source of factual data about a person's VA employment. Records in this system assist Professional Standards Boards and others to determine whether a variety of personnel actions are appropriate. They are also used to obtain information needed to provide other personnel services.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. To disclose information to government training facilities (Federal, State and local) and to non-government training facilities (private vendors of training course or programs, private schools, etc.) for training purposes.

2. To disclose relevant information to third parties considering VA employees for awards or recognition and to publicize information about such awards or recognition. This may include disclosures to public and private organizations, including news media, which grant or publicize employee awards or honors.

3. To disclose information about incentive awards and other awards or honors granted by VA. This may include disclosure to public and private organizations, including news media, which publicize such recognition.

4. To disclose the information listed in 5 U.S.C. 7114(b)(4) to officials of labor organizations recognized under 5 U.S.C. Chapter 71 when relevant and necessary to their duties of exclusive representation concerning personnel policies, practices, and matters affecting working conditions.

5. VA may, on its own initiative, disclose relevant information to a Federal agency (including Offices of the Inspector General), State, or local agency

responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, or regulation if there is reason to believe that a violation may have occurred. This routine use does not authorize disclosures in response to requests for information for civil or criminal law enforcement activity purposes, nor does it authorize disclosure of information in response to court orders. Such requests must meet the requirements of 5 U.S.C. 552a(b)(7) or (b)(11), as applicable.

6. To disclose pertinent information to any source when necessary to obtain information relevant to a conflict-of-interest investigation or determination.

7. To disclose information to any source from which additional information is requested (to the extent necessary to identify the individual, inform the source of the purposes(s) of the request, and to identify the type of information requested), when necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the letting of a contract, or the issuance of a license, grant, or other benefit.

8. To disclose to an agency in the executive, legislative, or judicial branch, or the District of Columbia's Government in response to its request, or at the initiation of VA, information in connection with the hiring of an employee, the issuance of a security clearance, the conducting of a security or suitability investigation of an individual, the letting of a contract, the issuance of a license, grant or other benefit by the requesting agency, or the lawful statutory or administrative purpose of the agency to the extent that the information is relevant and necessary to the requesting agency's decision.

9. To disclose relevant information to non-Federal agencies (i.e., State or local governments), and private sector organizations, boards, bureaus, or commissions (e.g., the Joint Commission on Accreditation of Healthcare Organizations) when such disclosures are required to obtain accreditation or other approval ratings.

11. To provide information to a congressional office from the records of an individual in response to an inquiry from the congressional office made at the request of the individual.

12. VA may, on its own initiative, disclose information to another Federal agency, court, or party in litigation before a court or other administrative proceeding conducted by a Federal agency, if VA is a party to the proceeding and VA needs to disclose such information to protect its interests.

13. To disclose information to the National Archives and Records Administration (NARA) for records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

14. To disclose to persons engaged in research and survey projects information necessary to locate individuals for personnel research or survey response, and to produce summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related workforce studies. While published statistics and studies do not contain

individual identifiers, in some instances, the selection of elements of data included in the study may be structured in such a way as to make the data individually identifiable by inference.

15. To provide an official of another Federal agency information needed in the performance of official duties related to reconciling or reconstructing data files in support of the functions for which the records were collected and maintained.

16. When an individual to whom records pertain is mentally incompetent or under other legal disability, information in the individual's records may be disclosed to any person or entity responsible for managing the individual finances to the extent necessary to ensure payment of benefits to which the individual is entitled.

17. To disclose information to officials of the Merit Systems Protection Board or the Office of the Special Counsel, when requested in connection with appeals, special studies of the civil service and other merit systems, review of rules and regulations, investigation of alleged or possible prohibited personnel practices, and such other functions, promulgated in 5 U.S.C. 1205 and 1206, or as may be authorized by law.

18. To disclose information to the Equal Employment Opportunity Commission when requested in connection with investigations of alleged or possible discriminatory practices, examination of Federal affirmative employment programs, or for other functions of the Commission as authorized by law.

19. To disclose to the Federal Labor Relations Authority (including its General Counsel) information related to the establishment of jurisdiction, the investigation and resolution of allegations of unfair labor practices, or information in connection with the resolution of exceptions to arbitration awards when a question of material fact is raised; to disclose information in matters properly before the Federal Services Impasses Panel.

20. Records from this system of records may be disclosed to a Federal, State, or local government agency or licensing board and/or to the Federation of State Medical Boards or a similar non-government entity. These entities maintain records concerning individuals' employment or practice histories or concerning the issuance, retention, or revocation of licenses or registration necessary to practice an occupation, profession, or specialty. Disclosures would be made for the Agency to obtain information determined relevant to an Agency decision concerning the hiring, retention, or termination of an employee. Disclosures may also be made to inform licensing boards or the appropriate non-governmental entities about the health care practices of a terminated, resigned or retired health care employee whose professional health care activity so significantly failed to conform to generally accepted standards of professional practice as to raise reasonable concern for the health and safety of patients.

21. To disclose relevant information to the Department of Justice and United States Attorneys in defense or prosecution of litigation involving the United States and to Federal agencies upon their request in connection with review of administrative tort claims filed under the Federal Tort Claims Act, 28 U.S.C. 2672.

22. To disclose relevant and necessary hiring, performance, or other personnel-related information to any facility with which there is, or there is proposed to be, an affiliation, sharing agreement, contract, or similar arrangement, for purposes of establishing, maintaining, or expanding any such relationship.

23. Identifying information in this system, including name, Social Security number, and other information as is reasonably necessary to identify such an individual, may be disclosed to the National Practitioner Data Bank (NPDB) at the time of hiring and/or clinical privileging/reprivileging of health care practitioners, and other times as deemed necessary by VA, in order for VA to obtain information relevant to a Department decision concerning the hiring, privileging/reprivileging, retention, or termination of the applicant or employee.

24. Relevant information from this system of records may be disclosed to the NPDB or to a State or local government licensing board which maintains records concerning the issuance, retention, or revocation of licenses, certifications, or registrations necessary to practice an occupation, profession, or specialty when under the following circumstances, through peer review process that is undertaken pursuant to VA policy, negligence, professional incompetence, responsibility for improper care, and/or professional misconduct has been assigned to a physician or licensed or certified health care practitioner: (1) On any payment in settlement of (or partial settlement of, or in satisfaction of) a judgment in a medical malpractice action or claim; or, (2) on any final decision that adversely affects the clinical privileges of a physician or practitioner for a period of more than 30 days.

25. To disclose information to contractors, subcontractors, grantees, or others performing or working on a contract, grant, or cooperative agreement for the Federal government, provided disclosure is in the interest of the Government and the information to be disclosed is relevant and necessary for accomplishing the intended uses of the information and necessary to perform services under the contract, grant, or cooperative agreement.

26. Information from this system of records will be disclosed to the Healthcare Integrity and Protection Data Base as required by section 1122E of the Social Security Act (as added by Sec. 221(a) of Pub. L. 104-191) and the associated implementing regulations issued by the Department of Health and Human Services, 45 CFR Part 61. For example, VA is required to report adjudicated adverse personnel actions based on acts or omissions that either affected or could have affected the delivery of health care services.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

These records may be maintained in file folders, on lists and forms, on microfilm or microfiche, and in computer processable storage media.

Retrievability:

These records may be retrieved using various combinations of name, birth date, Social Security number, or identification number of the individual on whom they are maintained.

Safeguards:

Access to areas where these records are maintained is restricted to VA employees, contractors, or subcontractors on a "need to know" basis; strict control measures are enforced to ensure that disclosure to these individuals is also based on this same principle. File areas are locked after normal duty hours and are protected from outside access by VA police officers or other types of alarm systems.

Retention and disposal:

The Professional Standards Board Action and Proficiency Rating Folder is maintained for the period of the employee's service in VA and is then transferred with the Merged Records Personnel Folder to the National Personnel Records Center (NPRC) for storage, or, as appropriate, to the next employing Federal agency.

a. VA maintains the Professional Standards Board Action and Proficiency Rating Folder as long as VA employs the individual. Within 90 days after the individual separates from Federal employment, the record is sent with the Merged Records Personnel Folder to the NPRC for long-term storage. The records of retired employees or employees who die in service are sent to the Records Center within 120 days of the retirement or death.

b. Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

All reports of suspected noncompliance will be documented in a computerized database and assigned a unique identification number. Paper files may also be maintained which contain documents collected in association with reviewing the case, such as memoranda, policies, or examples of work produced as a result of the complaint.

Retrievability:

Both electronic and paper case files will be stored and individually retrieved by the unique identification number, not by name.

Safeguards:

Access to computerized information in the database is restricted to authorized personnel on a need-to-know basis by means of passwords and

authorized user identification codes. Computer system documentation will be maintained in a secure environment in the VHA Office of the Chief Financial Officer (CFO) Compliance Office, and in the Compliance Offices at the network and medical center locations. Physical access to printouts and data terminals will be limited to authorized personnel in the Compliance Program.

Access to file folders is restricted to authorized personnel on a need-to-know basis. Paper files are maintained in file cabinets or closets and are locked after duty hours. These files are under the control of the Compliance Officer or his/her designees. Buildings are protected from unauthorized access by a protective service.

Retention and disposal:

Computerized records will be retained indefinitely. Periodic system back-ups will be employed for record protection. If disk space is limited, the records will be archived to tape or disk in accordance with established practice. Paper records will be maintained and disposed of in accordance with records disposition authority approved by the Archivist of the United States.

The records include information concerning program beneficiaries, individuals eligible for benefits, applicants for benefits, and members of their immediate families.

Categories of records in the system:

The records may include information related to:

1. Medical (such as diagnoses, prescriptions, and patient visits) and non-medical benefits program usage records and reports of contact about program benefits usage with individuals or groups.
2. Data on beneficiary, eligible, and applicant demographics, including identifying information (such as name, date of birth, age, sex, social security number, taxpayer identification number); address information (for example, home and/or mailing address, home telephone number, emergency contact information such as name, address, telephone number, and relationship); information related to training, education, and continuing education (for example, name and address of schools and dates of attendance, courses attended and scheduled to attend, type of degree, certificate, grades); information related to military service and status; technical skills acquired, employment information, and income.
3. Any other statistical data regarding the interaction and/or participation of VA beneficiaries, eligibles, and applicants in VA programs.

To the extent that records contained in the system include information protected by 38 U.S.C. 7332 (such as medical treatment information related to drug abuse, alcoholism or alcohol abuse, sickle cell anemia or infection with the human immunodeficiency virus), that information cannot be disclosed under a routine use unless there is also specific statutory authority permitting disclosure.

Authority for maintenance of the system:

Title 38, United States Code, section 527(b).

Purpose(s):

VA collects and maintains the records in this system of records to evaluate on a continuing basis the effectiveness of all programs authorized under Title 38 U.S.C., in achieving program goals in general, including achieving such goals in relation to their cost, and their structure and mechanisms for delivery of services, as well as their effect on related programs. Data may also be used for longitudinal research purposes and follow-up to evaluate the long-term effects of program usage.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Data and information may be disclosed for routine uses as indicated below:

1. In the event that a record maintained by VA to carry out its functions indicates a violation or potential violation of civil or criminal law or regulations arising by general statute or particular program statute, regulation, rule, or order, information may be disclosed at VA's own initiative to the appropriate Federal, State, local, or foreign agency charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or rule, regulation, or order. However, names and addresses of veterans and their dependents will be released only to federal entities.

2. Disclosure may be made to a Congressional office from the record of an individual in response to an inquiry from the Congressional office made at the request of that individual.

3. Disclosure may be made to the National Archives and Records Administration (NARA) in records management inspections conducted under authority of 44 U.S.C.

4. Disclosure may be made to the Department of Justice and United States attorneys in defense or prosecution of litigation involving the United States.

5. Disclosure of name(s) and address(es) of present or former personnel of the Armed Services and/or their dependents may be made to:(a) A Federal department or agency, at the written request of the head or designee of that agency or (b) directly to a contractor or subcontractor of a Federal department or agency for the purpose of conducting Federal research necessary to accomplish a statutory purpose of an agency.

6. Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are maintained on paper, microfilm, magnetic tape, disk, or laser optical media.

Retrievability:

Records are retrieved by name, social security number, or other assigned identifiers of the individuals on whom they are maintained.

Safeguards:

1. Access to VA working and storage areas is restricted to VA employees on a "need-to-know" basis; strict control measures are enforced to ensure that disclosure to these individuals is also based on this same principle. Scrambling algorithms are used to protect unique personal identifiers such as social security numbers. Generally, VA file areas are locked after normal duty hours and the facilities are protected from outside access by the Federal Protective Service or other security personnel.

2. Access to electronic files stored in personal computers is limited to only that information in the file which is needed in the performance of employees' official duties through use of individually unique passwords. Access by Office of

Inspector General (OIG) staff conducting an audit or investigation is controlled in the same manner. Access to paper documents and information on automated storage media is limited to employees who have a need for the information in the performance of their official duties.

3. Contractors and subcontractors are required to maintain the same level of security as VA for records in their custody.

108VA119

System name: Spinal Cord Dysfunction—Registry (SCD-R)-VA.

System location:

All electronic and paper records are maintained at the Austin Automation Center (AAC), Department of Veterans Affairs (VA), 1615 Woodward Street, Austin, Texas 78772, and at VA health care facilities listed in VA Appendix 1 of the biennial publication of VA's Systems of Records. Each local medical center facility has a Veterans Health Information System and Technology Architecture (VistA)-based SCD-Registry software package. Data transmissions between VA health care facilities and the VA databases housed at the AAC are accomplished using the Department's wide area network.

Categories of individuals covered by the system:

Veterans identified with spinal cord injury and disorders that have applied for VA health care services are included in the system. Occasionally, non-veterans who have received VA health care or rehabilitation services under sharing agreements, contracted care, or humanitarian emergencies will also have information recorded in the Spinal Cord Dysfunction (SCD)-Registry.

Categories of records in the system:

These records contain identifying information including name, social security number, date of birth, and registration date in the SCD-Registry. SCD-Registry registration information may include information about whether individuals are receiving services from VA's spinal cord system of care, neurologic level of injury, etiology, date of onset, type of cause, completeness of injury, and annual evaluation dates offered and received. The Outcomes File of the SCD-Registry has data fields for storing measures of impairment, activity, social role participation, and satisfaction with life. A registrant may have multiple entries in this file.

Authority for maintenance of the system:

Title 38, United States Code, Sections 501 and 7304.

Purpose(s):

The SCD-Registry provides a registry of veterans with spinal cord injury and disorders (SCI&D). This registry contains pertinent information on veterans with SCI&D and enables better coordination of care among VHA staff. The purpose of the registry is to assist clinicians, administrators, and researchers in identifying and tracking services for veterans with spinal cord dysfunction resulting from trauma or diseases. The SCD-Registry can also facilitate clinical, administrative, and research reports for medical center use. Local VistA SCD-Registries provide data extracts to the National SCD-Registry database at the AAC. This centralized AAC registry is used to provide a VA-wide review of veteran demographics and clinical aspects of injuries and disorders.

Routine uses of records maintained in the system, including categories of

users and the purposes of such uses:

1. The record of an individual who is covered by this system may be disclosed to a member of Congress or staff person, acting for the member, when they request the record on behalf of, and at the written request of that individual.

2. Disclosure of records covered by this system, as deemed necessary and proper to named individuals serving as accredited veterans service organization representatives and other individuals named as approved agents or attorneys for a documented purpose and period of time. These agents/attorneys must be aiding beneficiaries in the preparation/presentation of their cases during verification and/or due process procedures or in the presentation/prosecution of claims under laws administered by VA.

3. A record containing the name(s) and address(es) of present or former members of the armed services and/or their dependents may be released from this system of records under certain circumstances:

a. To any nonprofit organization if the release is directly connected with the conduct of programs and the utilization of benefits under Title 38, and

b. To any criminal or civil law enforcement governmental agency or instrumentality charged under applicable law with the protection of the public health or safety if a qualified representative of such organization, agency or instrumentality has made a written request that such name(s) or address (es) be provided for a purpose authorized by law; provided, further, that the record(s) will not be used for any purpose other than that stated in the request and that the organization, agency or instrumentality is aware of the penalty provision of 38 U.S.C. 5701(f).

4. Disclosure may be made to the National Archives and Records Administration (NARA) in records management inspections conducted under authority of Title 44 United States Code.

5. Disclosure of information, excluding name and address (unless name and address is furnished by the requester) for research purposes determined to be necessary and proper, to epidemiological and other research facilities approved by the Under Secretary for Health.

6. In order to conduct Federal research necessary to accomplish a statutory purpose of an agency, at the written request of the head of the agency, or designee of the head of that agency, the name(s) and address(es) of present or former personnel or the armed services and/ or their dependents may be disclosed;

a. To a Federal department or agency; or

b. Directly to a contractor of a Federal department or agency.

When a disclosure of this information is to be made directly to the contractor, VA may impose applicable conditions on the department, agency, and/or contractor to insure the appropriateness of the disclosure to the contractor.

7. In the event that a record maintained by VA to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, information may be disclosed at VA's initiative to the appropriate agency whether Federal, State,

local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or rule, regulation or order issued pursuant thereto.

8. For program review purposes and the seeking of accreditation and/or certification, disclosure may be made to survey teams of the Rehabilitation Accreditation Commission, Joint Commission on Accreditation of Healthcare Organizations (JCAHO), College of American Pathologists, American Association of Blood Banks, and similar national accreditation agencies or boards with whom VA has a contract or agreement to conduct such reviews but only to the extent that the information is necessary and relevant to the review.

9. Records from this system of records may be disclosed in a proceeding before a court, adjudicative body, or other administrative body when the Agency, or any Agency component or employee (in his or her official capacity as a VA employee), is a party to litigation; when the Agency determines that litigation is likely to affect the Agency, any of its components or employees, or the United States has an interest in the litigation, and such records are deemed to be relevant and necessary to the legal proceedings; provided, however, that the disclosure is compatible with the purpose for which the records were collected.

10. Disclosure of relevant information may be made to individuals, organizations, private or public agencies, etc., with whom VA has a contract or agreement to perform such services as VA may deem practicable for the purposes of laws administered by VA, in order for the contractor or subcontractor to perform the services of the contract or agreement.

11. Relevant information may be disclosed to the Department of Justice and United States Attorneys in defense or prosecution of litigation involving the United States, and to Federal agencies upon their request in connection with review of administrative tort claims filed under the Federal Tort Claims Act, 28 U.S.C. 2672.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Magnetic tapes/disks and optical discs. Electronic data are maintained on Direct Access Storage Devices at the AAC. The AAC stores registry tapes for disaster backup at a secure, off-site location.

Retrievability:

Records are indexed by name of veteran, social security number, and unique patient identifiers.

Safeguards:

1. Data transmissions between VA health care facilities and the VA databases housed at the AAC are accomplished using the Department's wide area network. The SCD-Registry program and other programs at the respective facilities automatically flag records or events for transmission based upon functionality requirements. VA health care facilities control access to data by using VHA's VistA software modules. The Department's Telecommunications Support Service has oversight responsibility for planning, security, and management of the wide area network.

2. Access to records at VA health care facilities is only authorized to VA personnel on a “need-to-know” basis. Records are maintained in staffed rooms during working hours. During non-working hours, there is limited access to the building with visitor control by security personnel. Access to the AAC is generally restricted to AAC staff, VA Headquarters employees, custodial personnel, Federal Protective Service and authorized operational personnel through electronic locking devices. All other persons gaining access to the computer rooms are escorted. Backup records stored off-site for both the AAC and VA Headquarters are safeguarded in secured storage areas.

3. Strict control measures are enforced to ensure that access to and disclosure from all records including electronic files and veteran-specific data elements are limited to VHA employees whose official duties warrant access to those files. The automated record system recognizes authorized users by keyboard entry of unique passwords, access, and verify codes.

Retention and disposal:

Records will be maintained and disposed of in accordance with record disposition authority approved by the Archivist of the United States. Depending on the record medium, records are destroyed by either shredding or degaussing. Optical disks or other electronic media are deleted when no longer required for official duties.
