FAR13.5 Simplified Procedures for Certain Commercial Items: The authority for applying the Simplified Procedures for Commercial Items of FAR 13.5 is 41 U.S.C. 1901 and is implemented by for restricting competition on this procurement via FAR 13.106-1(b)(2).

5. Demonstration that the Contractor's Unique Qualifications or Nature of the Acquisition Requires the Use of the Authority Cited Above (applicability of authority):

Approximately 152 Midmark Exam tables are being used throughout the Lebanon VA Medical Center and its 5 supporting clinics with an estimated replacement value of \$1,360,489.68. In 2014/2015 21 of those chairs were updated to the new Midmark Exam Tables with an estimated value of \$187,962.39. This 5 year IDIQ request will supplement the facilities growing needs through expansions, activations, and life cycle replacements while adding and transitioning to new identical Midmark Exam Table equipment at all of the facilities creating a consistent and cohesive environment through design, color, size, functionality, maintenance, and operation as established through VHA Directive 1850.05 Interior Design Operations and Management Program. The exam room size, flow, functionality, and additional room furniture in the expanding clinics, activation projects, and existing facility rooms were designed, updated, and engineered around the existing Midmark Exam Table which meets the technical needs of the medical staff and is consistent with the local Interior Design Program.

Providers within the Lebanon VA Medical Center and surrounding clinics have the potential to work at multiple facilities at varying times and it is essential to maintain continuity of equipment at all of the facilities. The standardization of this medical equipment allows for any provider to quickly and efficiently treat patients no matter which location they are at or which room they use without having to familiarize or become proficient with multiple manufactures' medical equipment. Thus maximizing compatibility, interoperability, safety, value, and quality as established by VHA Directive 1026 VHA Enterprise Framework for Quality, Safety and Value. The purpose of the Veterans Health Administration directives is to establish policies, responsibilities, and processes for operating and managing the facilities as established by authority 38 U.S.C. 7301(b).

Accordingly, Midmark Corporation is the only manufacturer capable of providing the model of equipment currently being used at the facilities, required by the Medical Facility, and consistent with VHA Directives, and as described in Section III above without the Veteran's Health Administration experiencing substantial duplication of cost that could not be expected to be recovered through competition.

6. Description of Efforts Made to ensure that offers are solicited from as many potential sources as deemed practicable:

Based on the authorized distributors from this manufacturer there will be multiple SDVOSB/VOSB distributors able to compete for this award.

7. Determination by the CO that the Anticipated Cost to the Government will be Fair and Reasonable:

The anticipated cost will be considered fair and reasonable based on the competition from the multiple authorized distributors from the manufacturer. The steps that will be taken to ensure the final contract price will be fair and reasonable are based on government need, price, technical and past performance.

8. Description of the Market Research Conducted and the Results, or a Statement of the Reasons Market Research Was Not Conducted:

As described in Section 6 above, market research, in accordance with FAR Part 10, was conducted by synopsis of the proposed acquisition, advising industry of the pending acquisition and soliciting inquiries from interested parties.

FPDS Search; GSA Search by model number and description; provided historical contract information; collect informal quotes; identified SDVOSB distributors; NAC Searches; verified SAM Registration of manufacturer; VIP searches by distributor, description, and NAICS codes.

11. A Statement of the Actions, if any, the Agency May Take to Remove or Overcome any Barriers to Competition before Making subsequent acquisitions for the supplies or services required:

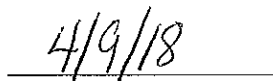

No actions are planned to foster competition for future acquisitions. Midmark Corporation is the only manufacturer capable of providing the same manufactured exam tables that are utilized at the Medical Center and its surrounding facilities. If alternate manufacturer's models are selected the Medical Center and its facilities would require that the equivalent of the same brand be procured for the existing exam tables resulting in a substantial duplication of cost.

A sole source effort is required for multiple years in the form of an IDIQ contract to create efficiencies such as eliminating redundant contracts, contracting working hours on redundant contracts, cost savings due to scale and reduced working hours, and customer ease of use ultimately maximizing the quality, safety, and value of patient care provided by the medical centers as desired by VHA Directive 1026 VHA Enterprise Framework for Quality, Safety and Value.

12.
