

Salient Characteristics

Haag Streit BQ900 LED Slit Lamp (Brand Name or Equal)

General

The slit lamp is an ophthalmic instrument that emits a high intensity beam of light that can be focused and shined into the eye so that the interior (of the eye) can be examined.

Warranty Requirements

Manufacturer must offer a 1 year warranty that product is free from defects in materials and workmanship. All defects will be replaced or repaired by the manufacturer at no cost to the buyer.
