**4. DESCRIPTION OF PROVIDED EQUIPMENT:**

- a. Watch Pat Tamper Proof Bracelet
- b. WatchPAT Unified home sleep testing probe
- c. Watch Pat Body Position & Snore Microphone
- d. Watch Pat 200 Kit, Actigraphy
- e. Adhesive Set for SBP Sensor
- f. Central Plus Add-on Kit with RESBP
- g. Pneumo- Opt UPAT Probes

**1. SPECIFICATIONS:**

**a. Watch Pat Temper Proof Bracelet**

- Watch Pat Temper Proof Bracelet is required item due to it is applied for authenticating the patient doing a sleep study and assures the study is recorded from the right person. It contains an electronic circuit that signals to the WatchPAT device the integrity of the bracelet and a unique identification. During the recording the device will periodically check the Bracelet connectivity. The recording will be stopped if the connection to the Bracelet will be lost for the time exceeding a predefined limit.

#### **b. WatchPAT Unified home sleep testing probe**

- WatchPAT Unified home sleep testing probe is a requirement, it has the Peripheral arterial tonometry, (PAT) signal that is measured from the fingertip by recording finger arterial pulsatile volume changes. Probe must be able to detect and unload arterial wall tension which generates a greater dynamic range of the measured PAT signal. Probe must fixate to finger with a PAT finger bio-sensor, which reduces movement artifact.

#### **c. Watch Pat Body Position & Snore Microphone**

- The integrated Body Position & Snore Sensor should be powered by the device and should not require replacement batteries after each study. Sensor should be automatically activated by the device when plugged into the Snore & Body position port. Body position: Requires 3-axis accelerometer that will provide a signal directly proportional to the patient's sleeping posture (supine, prone, right, left and sitting). The snore sensor should be an acoustic decibel detector. It uses a very sensitive microphone that responds to snoring and other sounds in the audio range and converts them to a small analog voltage that provides a clear, reliable indication of the presence of these sounds.

#### **d. Watch Pat 200 Kit**

- Kit Unit must contain the non-invasive EndoPAT system which comprises a measurement apparatus that supports a pair of modified plethysmographic bio-sensors. The unique feature of the PAT biosensors is that they impart a uniform sub-diastolic pressure field to the distal two thirds of the fingers including their tips. Applying the pressure in this way is extremely important because it prevents distal venous blood pooling, that can induce a veno-arteriolar vasoconstriction reflex. Channels: Requiring 8 total channels; PAT

signal, PAT Amplitude, pulse rate, oximetry, actigraphy, Wake & Sleep Stages, body position and snoring.

**e. Adhesive Set for SBP Sensor**

- Must contain the round double sided adhesive sticker that holds in place the snoring sensor with the microphone side (black opening) against the skin.

**f. Central Plus Add-on Kit with RESBP**

- WatchPAT Central PLUS must contain a new Snoring and Body Position (SBP) sensor which also provides a chest movement signal. The new SBP must have a high sampling rate where its body-position's 3D electrical accelerometer provides respiratory chest movement. The SBP microphone must measure snoring and is also used in the separation between obstructive and central events. WatchPAT automatic analysis must distinguish central sleep apnea, including CSR, from obstructive events, when compared to the gold standard manual scoring of PSG.

**g. Pneumo- Opt UPAT Probes**

- Must be a non-invasive measure of the arterial pulsatile volume changes at the fingertip. PAT signal is a surrogate of changes in the sympathetic nervous system that are associated with Sleep Disordered Breathing (SDB) events and specific “signatures” of sleep stages. PAT signal attenuation, and acceleration pulse rate- directly reflect immediate digital arteries vasoconstriction and increase heart rate. Both of which, are direct indicators of arousals and micro-arousals that are part of the SDB underlying mechanism and present in each such event. When further enhanced with oxygen blood desaturations and resaturations measured with the embedded pulse oximeter sensor, the proprietary algorithm accurately calculates the SDB clinical parameters such as AHI, EDI and ODI that utilize True Sleep Time and Complete Sleep Architecture (Deep, Light and REM), providing the physician with a full comprehensive assessment of the patient.

**5. EXCLUSIONS** (unless otherwise quoted):

- a. Modifications or corrections to the work scope dictated by concealed conditions encountered in the performance of the work and not indicated by the drawings, or specifications.

- b. Modification or corrections to installation room or supplied power.

- 6. **PERSONNEL CLEARANCES AND PRIVACY CONSIDERATIONS:** The Contractor will ensure that their personnel and subcontractor personnel meet the privacy standards as set forth by HIPAA (Health Insurance Portability and Accountability Act of 1996) with respect personal and confidential information that they may come upon, while servicing medical equipment.

7. **PATIENT HEALTH INFORMATION (PHI) AND INDIVIDUALLY IDENTIFIABLE INFORMATION (III):**

This system does contain Patient Health Information (PHI) and Individually Identifiable Information (III). No VA data will leave the VA Facility. If a hard drive or any other electronic storage device needs to be replaced, the device will be given to the ISO. After destruction of the data by degaussing, the device may be returned to the vendor for inventory control if so requested. The repair of this system will be supervised by a VA employee in BioMed to assure data does not leave the facility. The COR is responsible to assure that no VA data leaves the facility and an employee supervises repair. No Security & privacy training is needed by the vendor because the repair will be supervised. No other security statement is needed.

- 8. **DOCUMENTATION:** Contractor will provide the COTR with individual written reports which describe the maintenance and repair service performed on the equipment under warranty in sufficient detail so as to be acceptable by field inspectors of the Joint Commission and other inspecting bodies. This shall include a list of all parts replaced, all service performed as well as a statement that the equipment is operating per manufacturer's specifications after repair. The service report will be signed by the contractor's service technician, and by designated VANTHCS personnel.

- a. Prior to award, bidder must have a facility to include personnel, test equipment, parts inventory, training certificates, licenses and technical documentation available for inspection by VA Medical Center personnel and be able to show written evidence to technical qualifications of personnel, test equipment (and calibration documentation) licenses and availability of parts. Parts availability must be written documentation from either the equipment manufacturer or authorized parts supplier. In either case, bidder must be able to show the availability of parts to him/her within 24 hours after initial call. For contracts for maintenance and repair services from other than the original manufacturer or a designated representative, the Contractor will be fully responsible for obtaining all technical documentation necessary to fulfill contractual obligations.

The Contracting Officer and Representative will evaluate these needs and authorize appropriate action. The parts will be installed under the terms of the contract and each invoice is to include a legible itemized list of labor charges and parts costs. The government will incur no charges for service and parts including glassware due to accident, abuse, misuse or negligence by the contractor or his representative.

For line items covered by the WTO GPA, the Government will evaluate offers of U.S.-made or designated country end products without regard to the restrictions of the Buy American statute. (h) *Certification Regarding Responsibility Matters* (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals—

(1) ☐ Are, ☐ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) ☐ Have, ☐ have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) ☐ Are, ☐ are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) ☐ Have, ☐ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,500 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples.*

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. Sec. 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. Sec. 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. Sec. 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(ii) The Contracting Officer may not make an award to the offeror if the offeror fails to execute the certification in paragraph (k)(1) or (k)(2) of this clause or to contact the Contracting Officer as required in paragraph (k)(3)(i) of this clause.
