- 3. Unique characteristics that limit availability to only one source, with the reason no other supplies or services can be used:**

The Battle Creek VAMC has been using the Carl Zeiss brand HFA750i for approximately 10 years in mapping visual field defects in veterans with many different types of eye disease. Central to the management and treatment of these diseases is applying statistical analysis to these mapping studies as we collect them over time. If a disease progresses and visual field studies show progressive loss over time, we are obligated to alter our management of the disease. It is essential that we continue with the Zeiss field machines as they can incorporate the large existing data base that we have for our patients with the results of new studies and continue the same statistical analysis. If we switch to a different brand of field machine we lose the ability of applying information from our existing data base to future visual field studies.

- 4. Description of market research conducted and results or statement why it was not conducted:**

Market research consisted of VIP search under NAICS 333314, GSA Advantage, VA MedSurg Catalog, VA NAC/SAC contracts, FPDS-NG, FBO, and SBA DSBS. Market research results indicated quotes from two or more SDVOSB concerns may be possible. Since the non-manufacturer rule does not apply for

procurements under the SAT, an RFQ will be posted to FedBizOpps as an SDVOSB set-aside along with this brand-name justification.

- 5. Contracting Officer's Certification:** *Purchase is approved in accordance with FAR13.106-1(b). I certify that the foregoing justification is accurate and complete to the best of my knowledge and belief.*
