**2. Contract Title.** Procurement of two servers and the installation/configuration of the servers for MiPACs.

**3. Background.**

The G.V. (Sonny) Montgomery VA Medical Center (GVSM VAMC) is requesting the purchase of two identical servers that will be installed and configured to replace the existing failing MiPACs server. The procurement is to include two identical servers and the onsite installation and configuration by a Medior Imaging engineer. MiPACs is already in place in Dental Service at the Medical Center, this procurement is to replace the server as the hardware is antiquated and randomly fails.

**4. Scope.**

Purchase of two servers with the following requirements:

- Intel Xeon 4114 Silver Processor
- 16GB RAM (2666 MT/s RDIMMS)
- (6) 600GB 10Krpm hard drives in RAID 5 array (3TB total storage, shared by OS and data)
- Single 1Gbps Network Card
- Single 750W Power Supply
- DVD Reader
- ReadyRails with Cable Management Arm
- 3 Years ProSupport with NBD Onsite Service

Purchase of Onsite Services to include:

3 days onsite service from a Medior Imaging engineer to migrate existing data to new server environment, upgrade existing clients to latest MiPACS software version, and configure backup and connection to Vista Imaging.

No refurbished servers shall be accepted.

**5. Specific Tasks.**

Server to be provided within 3 months of contract award. Configuration and installation shall be completed within 1 month of the servers delivery at the VAMC.
