Staff currently use StarDental handpieces which will provide a seamless transition for dental staff that may be required to see patients at both locations. The facility's established standard operating procedures and competencies are for StarDental handpieces. Staff from Fayetteville will be the ones to train and sign off on the competencies for the staff at the Springfield, MO CBOC. Also SPS from Fayetteville will be transporting the RME's from the Springfield CBOC to the Fayetteville, AR hospital for processing and sterilization. The Springfield CBOC has the same dental chairs/units that are currently in use in Fayetteville, and the StarDental handpieces and connects are compatible with the dental chairs/units currently in use by the facility. Any other brand of equipment would not be compatible with existing system, and its cost prohibitive to replace entire system. Its in Government's best interest to procure this specific brand due to need for compatibility with existing system.

StarDental brand name only equipments is being requested in order to standardize with the existing equipment. The use of identical equipment in all dental areas decrease the possibility of human error, therefore increasing patient safety. The use of such descriptions in the acquisition is essential to the Government's requirements, thereby precluding consideration of a product manufactured by another company.
