5. **Rationale Supporting Use of Authority Cited Above:** The Siemens Magnetom Skyra 3T MRI is considered to be a highly technological medical equipment that can only be supported and maintained by the OEM. The preventative maintenance services provided by the Siemens highly trained technicians is necessary for the equipment to function in accordance with the manufacturer specifications and standards. The preventative maintenance services for the Siemens Magnetom 3T MRI can only be provided by the OEM, as the equipment and the systems upgrades that support it are proprietary to Siemens.
6. **Efforts to Obtain Competition:** In support of a joint effort by Defense Logistics Agency (DLA) Troop Support Medical and the VA National Acquisition Center (VA-NAC) a solicitation under solicitation number SPE2D1-15-R-0001 was issued in May 2015 under full and open competitive procedures for awarding Multiple Award Contracts in support of the radiology and imaging systems currently owned by the DLA and VA. This equipment support includes computed tomography (CT) scanners, magnetic resonance imaging systems, radiographic systems (X-Ray), nuclear medicine, ultrasounds, computed radiography, magnetoencephalography, Positron Emission Tomography (PET)-CT, PET MR scanners, cyclotrons, angiography, cardiac catheterization, mammography systems, upgrades, repair parts, software and accessories.

This type of equipment is classified as High Technological Medical Equipment, and the systems are proprietary to the OEM. Therefore, the maintenance and support of the equipment can only be provided by the manufacturer for maintaining the equipment in accordance with the OEM's specifications and standards. The Siemens Magnetom Skyra 3T MRI is equipment that can only be supported and maintained by the manufacturer. Market research was conducted and there was no competition identified for this acquisition. In accordance with FAR 5.301 and 16.505(b)(2), this justification will be posted to Federal Business Opportunities Page (FBO) and made publicly available.

7. **Actions to Increase Competition:** The Government will continue to conduct market research to ascertain if there are changes in the market place that would enable future actions to be competed.
8. **Market Research:** The market research conducted is briefly summarized as follows:
