CENTECH SecurityManager Upgrade and Data Migration

Date: July 21, 2018

VA-18-0003734-FY-2018

Product Description Version Number: 1.2

CENTECH SecurityManager Upgrade and Data Migration

TAC Number: VA-18-0003734-FY-2018

PRODUCT DESCRIPTION

1.0 REQUIREMENTS

Upgrade and data migration of SIC owned application SecurityManager to CENTECH SecurityManager 4.x (approved on VA TRM) on VMware Windows Server 2012 R2 or higher; and migration of current version of SecurityManager MS SQL database to a new SQL Server database instance on the VA R02 MS SQL Central Server.

<u>Description</u>	<u>Qty</u>
CENTECH SecurityManager Version 4.x	1
License for each additional 10 names users	4
Annual License Maintenance – SecurityManager	1
Annual License Maintenance – Each add 10 users	4
On-Site Installation, Configuration, and Database Migration	1

The CENTECH Group will provide on-site installation of all necessary application code and/or utilities to insure continued functionality of the PerSec, Contracts, Import/Export, and Admin functionality to the level currently supporting the SIC Business Processes. The CENTECH Group will configure the latest version of SecurityManager insuring that each staff role and level of access is provided comparable to the current version and that all data currently accessible by each staff role and level of access remains accessible. The CENTECH Group will install the latest version of their proprietary SQL data architecture compatible with the latest version of their SecurityManager application; and will write and execute all utilities or scripts necessary to migrate all current data from the current version of SecurityManager to the latest version of SecurityManager. They will assist with User Acceptance Testing of the application to validate functionality and data migration.
