2. **Brief Description of Supplies/ Services required and the intended use/Estimated Amount:** The Memphis VA Medical Center has a requirement for a contractor to provide software access support services for the GE PACS Centricity System in use at the Memphis VA Medical Center. The Contractor will provide software access support for one year.
3. **Unique characteristics that limit availability to only one source, with the reason no other supplies or services can be used:**

The GE PACS Centricity System is highly specialized and complex. The system provides the Department of Veterans Affairs with software access support to effectively provide imaging support to medical personnel in support of diagnosis and prognosis of VA patients.

Competition will not be advantageous to the Government, in recouping costs for the replacement and maintenance services of this highly specialized imaging equipment, without unacceptable delays. GE Medical System can provide 24/7 remote coverage, as well as sending out technical support assistance with the equipment.

Accordingly, GE Medical Systems is the only responsible and fully capable source who can provide the requirements within a timely manner, to avoid any continuity of care delays for our veterans. GE has provided an OEM/sole source letter, which substantiates their proprietary status for the GE PACS Centricity equipment in use at the Memphis VA Medical Center.
