The estimate for this single source procurement is \$128,499.90

3. Unique characteristics that limit availability to only one source, with the reason no other supplies or services can be used:

Cynergy is the preferred SDVOSB; as they have been the sole contractor in setting up the new security camera system at VAGLAHS. To ensure consistency and compatibility with the VA new systems, VAGLAHS must use the same vendor, equipment and software. VAGLAHS is currently using OnSSI as the Video Management System (VMS) which ties into Client workstations at Buildings 222 (Emergency Operations Center) and will connect to building 236 (Police Station) later this year. This system ties to secure electronic doors and Microwave infrastructure that works hand in hand with the police and emergency radio system also installed and maintained by Cynergy. Only Cynergy have knowledge of the configuration of the VAGLAHS security camera system. Furthermore, due to the high level of security and importance of the system, VAGLAHS must maintain the same vendor on concurrent projects to ensure operability.

4. Description of market research conducted and results or statement why it was not conducted:

The Veteran Information Page (VIP) was queried and found that there were four hundred ninety-four possible vendors that could provide the items under the North American Industry Classification System (NAIC) code 561621 – Security System Services. No one in the VIP list was surveyed.

Based on the need of the camera security system to include installation, a single source procurement, in accordance to FAR Part 6.302-1 – Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements will be processed to support VAGLAHS requirement in meeting the security of Veteran patients and guests visiting the VAGLAHS.

5. Contracting Officer's Certification: *Purchase is approved in accordance with FAR13.106-1(b). I certify that the foregoing justification is accurate and complete to the best of my knowledge and belief.*
