EXHIBIT F – 1A - CALCULATION OF SELF-PERFORMED WORK

PROJECT: Project 630A4-CSI-103, Renovate Radiology &CT at NY Harbor Healthcare System, Brooklyn Campus, VISN 3

Use a format similar to the following to identify and calculate cost of the work to be self-performed. Refer to the definitions pertaining to “Self-performance of work”, “On the Site” and “Total amount of work to be performed under the contract”. (Includes mobilization and utilization of owned or rented plant and equipment to be operated by the prime contractor’s own employees; only those materials which will be both purchased and installed by the prime’s own forces; labor associated with those aforementioned materials or equipment; only those supplies to directly support work performed by the contractor’s own employees; and the contractor’s own job overhead costs.) NOTE: The intention of this set-aside is to have actual work performed by the Contractor’s own forces or the forces of other SDVOSB contractors and not just “contract management”. This contract is not intended for construction contract management firms.

Clearly describe the work to be self-performed:

Show Calculation of Self-Performed work: _____

B.1 Total Offer Price: \$ _____

B.2 If applying for consideration as a General Contractor (multi-discipline projects) subtract Specialty Trades (Unless being self performed) \$ _____

B.3 Subtract G&A, home office overhead, prime contractor’s markups for profit, bond, state use tax, etc. (\$)

B.4 Remainder is “Total amount of work to be performed under the Contract” = \$ _____

B.5 “Work to be self-performed”: = \$ _____ Amount shown on this line should match the amount shown for “Show Calculation of Self-Performed work”?

(Includes mobilization and utilization of owned or rented plant and equipment to be operated by the prime contractor’s own employees; only those materials which will be both purchased and installed by the prime’s own forces; labor associated with those aforementioned materials or equipment; only those supplies to directly support work performed by the contractor’s own employees; and the contractor’s own job overhead costs.)

B.15 % Self-performed Work = Line B.5 / B.4 X 100% = _____ %
