

Question 1:

Can the Government please provide counts of Devices and Tags in the 30- and 90-day range for each of the VISN 21 sites listed in the PWS?

Answer 1:

The Government can provide counts of devices and tags in the 30 and 90 day range. It may take me until COB, Tuesday, September 3, but I will try to start today. If I don't have too many interruptions – I may have the data for you this afternoon (August 30)

NOTE: Another amendment will be issued to clarify line item # 1 answer once received from the requestor.
