AMENDMENT NO	DATE

STATEMENT OF REQUIREMENTS:

The Iowa City VA HCS is looking to procure an Imaging System Brand Name or Equal (BNOE) to the Bio Rad ChemiDoc MP Imaging Station (Part #17001402)

General Equipment Name: ChemiDoc MP Imaging System Bio Rad Part #17001402

Description & Salient Characteristics:

This is an imaging station that can view DNA gels, protein gels or blots with visible light, far red/near infrared fluorescence and chemiluminescence detection, and be used for all other general gel documentation.

The ChemiDoc MP Imaging Station is compatible with stain free technology for gel and blot protocols

- The ChemiDoc Imaging Systems provide **total protein normalization with stain-free technology** as an alternative to normalization with single housekeeping proteins (HKPs). Stain-free total protein normalization can be used to validate HKPs or may replace HKPs entirely, simplifying the western blot workflow and allowing for probing another antigen of interest on the same western blot
- allowing quality control (QC) validation of results at each stage of the blotting process, thereby increasing confidence in results

This imager has an open platform. It can be used with the antibodies and chemiluminescence kits that we currently use, to keep our protocols similar.

The ChemiDoc MP is a 5-channel system for stain-free, red, blue, green, and far red/near infrared. In addition to chemiluminescence the MP can image a wide range of canonically used fluors, including the Licor NIR dyes.

It has an HE charged coupled device (CCD) camera 6.0g megapixels for reduced background and high sensitivity to match X-ray film. Deeply cooled sensor allows longer integration time to detect weak signals. Quantitative (>4 orders of linear dynamic range for all samples). Allows users to gather maximum information from a blot that has both intense and weak signals in a single image. High-resolution CCD ideal for resolving closely spaced bands on a gel or blot

It has mechanical zoom to get optical resolution without compromising sensitivity

It has multistacked optical filtration design

Illumination sources:

- Trans-ultraviolet: 302 nm excitation
- epi-white
- Trans-white (requires White Sample Tray)
- Trans-blue: 450–490 nm excitation (requires Blue Sample Tray)
- Epi-blue: 460–490 nm excitation
- Epi-green: 520–545 nm excitation
- Epi-red: 625–650 nm excitation

- Epi–far red: 650–675 nm excitation
- Epi–near infrared: 755–777 nm excitation Standard 590/110 nm filter and chemiluminescence filters:
- 518–546 nm filter for blue-excitable fluorophores and stains
- 577–613 nm filter for green-excitable fluorophores and stains
- 675–725 nm for red-excitable fluorophores and stains
- 700–730 nm filter for far red–excitable fluorophores and stains
- 813–860 nm for near infrared–excitable fluorophores and stains

Smart Tray Technology*

Smart Tray Technology* recognizes the application-specific tray and adjusts imaging parameters, iris setting, and software options accordingly. This feature is extremely helpful for multiuser and multilaboratory instruments

Safety interlocks are designed to avoid unintentional UV exposure

The imaging station is an all in one unit, which does not need a separate computer/monitor.

It has touch screen functionality

- enables users to easily interact with the touch screen to acquire, assess, and export images

Several image export options

- Users can export images to a flash drive, external hard drive, and shared folder on a network drive or stand-alone computer
- Users can export images in several file formats (Image Lab SCN/MSCN, 16-bit TIFF, 8-bit TIFF, JPG) suitable for their purposes, such as analysis and publication

Flexible and automated image exposure setting for all compatible applications. Ensures the optimal exposure time to obtain the best dynamic range for all applications

- Optimal auto-exposure for chemiluminescence: produces an image with full dynamic range, when performing quantitative analysis of the blot
- Rapid auto-exposure for chemiluminescence: acquires an image with a limited dynamic range using a shorter exposure time
- Manual exposure is available to override automated imaging
- Signal accumulation mode (SAM) for easy optimization of manual exposure time for chemiluminescence detection
- Specifying the Region of Interest for Auto Exposure allows optimal exposure of a specified area/band. One helpful scenario would be to exclude much brighter signal that does not need quantitation
- Image Lab Touch Software takes the guesswork out of estimating the shortest exposure time for obtaining high-resolution images (175 microns per pixel)

ImageLab analysis software is unlimited free of charge copies and can be downloaded from website

- Image analysis software that is compatible with **BOTH** Mac operating systems AND Windows operating systems.
- Allows free functionality for sharing, analysis, and presentation of gel data. Unlimited copies of Image Lab Software are available with each system
- Multiple computers can be used, allowing flexibility in choosing location, media, and time for data analysis
- Provides large descriptive buttons with tool tips and comprehensive tutorial with navigation menu

Export options

- Allows retention of all image data as 16-bit or 8-bit TIFF files. This option enables users to analyze the image in other software programs
- Publishing resolution (DPI) and publishing dimensions can be specified with 1-click image export for publication. Provides functionality to produce images at user-defined DPI and dimensions
- Produces publication-ready images. Images can be exported with and without overlays. Selections include TIFF, BMP, PNG, and JPEG formats
- Eliminates the need to first import image into image editing software, such as Photoshop, to change image DPI and size
- Quick export of analysis and images to PowerPoint presentations or Excel files

Easily accessible targeted analysis features

- Automatic and manual methods for molecular weight determination, purity, assessment, and relative and absolute quantitation

Flexible lane and band detection, and normalization tools

- Provides complete flexibility with automatic and manual detection of lanes and bands using proprietary algorithms
- Lane profile tool for easy background adjustment and detection of lanes/bands
- Flexible analysis tools to normalize your band of interest to a single housekeeping protein or total protein signal

Multiple input and output ports (USB and Ethernet)

(h) *Certification Regarding Responsibility Matters* (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals—

(1) ☐ Are, ☐ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) ☐ Have, ☐ have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) ☐ Are, ☐ are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4) ☐ Have, ☐ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,500 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) *The tax liability is finally determined.* The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) *The taxpayer is delinquent in making payment.* A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples.*

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. Sec. 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. Sec. 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. Sec. 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).
