SimLEARN REdI Mobile Testing Equipment

All interested companies shall provide quotation for the following:

STATEMENT OF WORK

1. Title of Contract: REdI Carts and Equipment

2. Scope of Work: The contractor shall provide all labor, supervision, and other resources required to deliver to each individual VHA facility (noted in the allocation document) Mobile CPR Testing Stations and Portable CPR Testing kits.

3. Background: Resuscitation Education Initiative (REdI) is the national program that administers and evaluates all resuscitation training throughout the VHA. In 2018 REdI shifted its focus and financial support to VA facilities away from classroom-based courses (publications/printed materials and consumables) to optimizing the use of on-line/electronic courses that utilize Cardio Pulmonary Resuscitation (CPR) Testing Station to obtain the required Basic and Advanced Life Support skill evaluation. This shift out of the classroom frees up instructors and students for other critical duties such as Veteran care. CPR Testing Stations and their peripheral products are required to (1) support field training that has outpaced the available equipment and (2) replace equipment at the end of its life cycle. Costs no longer include an electronic tablet as they are being procured and paid for by the Office of Information & Technology. The equipment must include both adult and infant for each station as the certification is to an overarching standard.

The placement of field stations allows for staff to complete the didactic training and then demonstrate competency of skills without the need of a physical instructor, choose between two different training options; the traditional every two-year certification and a quarterly skill assessment that provides a low-dose, high-frequency approach to maintain competency of skills. The quarterly skills assessment extends the certification period with the successful completion of skills to include compressions and ventilations. All training meets the governing standards for CPR Standards for Basic Life Support (BLS) and Advanced Life Support (ALS) training programs. VHA Directive and local facility policy cites appropriate certification and training is required for all staff providing direct Veteran care. Therefore, training availability impacts access to this critical patient care.

This purchase will be completing the system-wide requirements in FY19 and beginning in FY20 the program will be moving to a sustainment/replacement cycle. To meet the training needs for the 250,000 VHA healthcare providers, this purchase for additional equipment will meet the total amount of equipment needed to support them. This FY 19 purchase will be the last of upfront costs to acquire adequate amounts of equipment to meet learner demand.
