Mr. Waite,

Thank you for your interest in a maintenance contract for a Lunar bone mineral densitometer. GE Healthcare and Lunar have partnered with Alpha Source to provide the service and maintenance of our bone mineral densitometry systems. Alpha Source is the only authorized vendor that can perform these services without voiding the warranty of these systems. In short, Alpha Source is the sole distributor for service on the Prodigy and iDXA systems and for this reason, they should be considered the Sole Source for this service.

If you have any questions about this, please let me know.

Respectfully,

A handwritten signature in black ink, appearing to read "Christian Brady", with a stylized flourish at the end.
