BATROOM FINISH/NOTES FOR DESIGN

Appropriate quality materials include stainless steel, through body porcelain tile, integrated cove base and urethane grout. Interior design will assist with selections of materials and approve before purchasing.

ADA-compliant interior signage that meets VA standards. Submit prototype to medical center for approval. Provide changing stations in common bathrooms in both sex bathrooms with signage.

This technical solution for counter space will not be approved.

No vision panel cut into door that opens to corridor creates unnecessary hazard and need for unappealing signage

Preferred corridor Door
