	UroNav Fusion Biopsy System v3.0				
	UroNav is an integrated, image-guided stereotaxic system that uses magnetic resonance (MR) and ultrasound (US) images in conjunction with electromagnetic (EM) tracking devices to plan, guide and document clinical interventions. The system provides real-time, three-dimensional visualization and navigation for pre-operative planning and intra-operative navigation of minimally-invasive interventional procedures. UroNav is a DICOM-compliant system that integrates with Picture Archiving and Communication System (PACS) networks, DynaCAD MRI platform (sold separately), and DynaLync Prostate				
	UroNav consists of self-contained UroNav computer hardware/software, a UroNav procedure cart with monitor, an electromagnetic navigation				

system, wireless keyboard and mouse, and foot pedal.

NOTE: A UroNav Procedure Starter Set, consisting of a prostate biopsy phantom, twenty-five (25) UroNav Navigation Sensor Clips, and three (3) UroNav Universal Navigation Sensors, must be purchased separately based on the compatible ultrasound that will be used in conjunction with UroNav.

Additional UroNav accessories and hardware/software options are sold separately to provide maximum flexibility to meet clinical needs.

Accessories and options (sold separately) consist of:

- Transperineal biopsy hardware and software
- Field generator pole cart
- DynaLync Prostate option

NOTE: UroNav requires two (2) AC Mains power source outlets to support the power requirements for the two (2) IEC320 Hospital AC Supply Mains power cord plugs required by the UroNav fusion biopsy system.

Installation, Warranty, Service and Support:

Maximum of three (3) onsite UroNav Applications Training visits:

Visit 1: Initial Installation and Applications (3 consecutive days) on-site. Recommend 6-8 patients per day, for live biopsy procedures on days 2 and 3.

Visit 2: Second on-site biopsy support (2 consecutive days). Recommend 6-8 patients per day, for live biopsy procedures.

Visit 3: Third on-site biopsy support (1 day). Recommend 6-8 patients per day, for live biopsy procedures.

Visit 4: Optional, remote biopsy support (1/2 day) **.

One (1) year warranty on parts and labor

UroNav Remote Software Updates to existing features** for one (1) year from date of installation

One (1) year Remote system diagnostic and training support (7am - 7pm CST)**

** Requires access to high-speed Internet connection/Remote Access for service (not included)
