From: Keith Royster

Subj: Remodel Oncology Questions

1. Does the VA have the demountable partitions in its possession for us to install?
The demountable partitions are in the acquisition stage.
2. The specs contain a section about wall and door protection, but I do not see where these items are on the drawings. Are there areas that need new handrail or corner guards?
Corner guards will be required. The existing handrails will be removed and reinstalled. Refer to Sheet A1-001, Sheet Note #3 Revised. Also, refer to Sheet AD-00. Note #12 added and noted on plan.
3. The demountable partitions drawing shows two doors to be included with the millwork package. The architectural drawings show that we are supposed to supply the same doors. Are the doors part of the millwork package or do they need to be purchased by the contractor?
Refer to Sheet A1-001. Sheet Notes #3 and #6 concerning the doors should be deleted. The doors will be part of the demountable wall system.
