BRICK CHIMNEY OUTER COLUMNS

RADIAL CHIMNEY BRICK

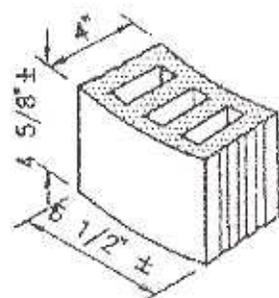

An experienced and innovative source of quality structural clay products, Continental Clay is now recognized as the sole domestic producer of radial brick. Continental radial brick is manufactured in both red shale and buff clay. Both types are formulated from selected raw materials to meet or exceed all industry expectations.

Continental radial brick are produced in nominal 4-5/8" height with an outer face width of 6-1/2", and various depth combinations to accommodate the specified wall thickness. The varied radius faces of these units are adaptable to virtually any desired stack diameter. Continental maintains a complete inventory of radial brick to meet nearly every design or installation requirement.

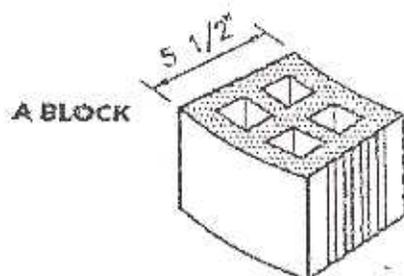

Typical Applications include: power boiler stacks for schools, hospitals, manufacturing facilities or other installations where a combination of aesthetics and functional performance are essential.
