

SCOPE OF WORK

For

Bldg. 17 (LOADING DOCK) Renovations

Contractor to provide all labor and material for removal of existing soffit panels, roof overhang, and track system are to be removed from Bldg. 17. After track system is removed a new track is to be emplaced with new ceiling. A new roof overhang is to be erected and new gutters and downspouts installed. Asphalt milling is required and paving at loading dock. New grating and drainage issues to be resolved.
