

CodeMax[®]

This machine can cut Automotive, Commercial, Residential, High-Security and Flat Steel Keys. Optional accessories may be necessary.

The Auto Angler model makes Medeco angle cuts automatically

The original computerized code machine, contains depth & space data for more than 950 lock types

Download bittings from CodeSource® and MasterKing® for error-free key-cutting

CodeMax® is the **Original Computerized Code Machine**. Based on the "Standard of the Industry" Blitz™, CodeMax® has an internal computer chip that contains **Depth & Space Data (DSD) for more than 900 different lock types**. This machine can **accommodate keys with up to 14 spaces and 14 depths**; it also has a micrometer function in both inch and metric formats. This versatility allows it to cut virtually all standard vehicle, commercial, residential and furniture keys throughout the world. It includes 5 cutters (No. CW-14MC, No. CW-1011, No. CW-47MC, No. CW-90MC and No. CW-20FM)

On the Automatic Angler model, (CodeMax®AA) the cutter **pivots automatically to cut high-security angle keys, such as Medeco®**, eliminating the need to turn the cutter head manually. Simply enter the depth and direction of the angle, and the CodeMax® AA does the rest. All models of CodeMax® are **equipped with a shoulder gauge safety switch**. This feature ensures the shoulder gauge is out of the way before you start cutting a key.

The **high-performance, long-life motor** on CodeMax® provides ample torque for cutting a high volume of keys. It is available in 120VAC or 240VAC for use in locksmith shops around the world.

The **total power of CodeMax® is realized when you connect it to your PC**. All machines come with a 25-foot (7.5m), 9-pin serial cable for easy connection to your PC. This gives you the ability to **download information from MasterKing®, KeyTrail® and CodeSource®**. This makes creating new keys as simple as looking up the code on your computer and downloading it to your HPC CodeMax®.

Backed by a 1-year warranty and HPC's Expert Technical Support Department, the CodeMax® is the answer for computerized code cutting!
