

Addendum #4

	RFI Question	Answer
1	Section 123600 Countertops: solid surface top and spec request 3/4" thick solid surface. The products and colors (Corian - Lava Rock & Olivite) that are speified are available only in 1/2" thickness. Which countertop thickness is acceptable, 1 1/2" finished thickness (1/2" lava rock with 1/2" olivite then 1/2" lava rock) or 2" finished thickness (1/2" lava rock with 1" olivite then 1/2" lava rock)?	Corian is no longer provided in the Lava Rock in 3/4" sheets. The 3/4" Corian material (countertops, backsplashes, sill, etc.) has been revised to 1/2". See revised Section 123600 Countertops and the following drawings revised 8/7/13: A-3 Floor Plans and Details; A-4 Enlarged Partial Plans and Details; A-7 Door Schedule, Room Schedule and Details
2	Section 123600 Countertops: Are all countertops 2" or are there 1 1/2" in all other areas other than room C118?	All countertops shall be similar to the countertop shown in detail 9/A4, now indicated to be 1 1/2" (apron only required where there is no base cab.) Sheet A6 Interior Elevation: indicate all countertops the same designation - CTOP-1.
