- REMOVE TREE

DEMOLITION NOTES:

1. Recycled asphalt & crushed concrete may be used for aggregate in accordance with NJ DOT Standards.
2. All debris shall be removed from the site.
3. Remove concrete slab and foundations in accordance with Geotechnical Engineers recommendations.
4. Contractor to provide 8' high security chain link fence surrounding the work area.
5. Contractor to provide support of adjoining buildings and structures as recommended by the geotechnical engineer and structural engineer.
6. Contractor to remove, abandon, & seal all utility lines in accordance with each utility providers requirements.
7. Contractor to excavate beneath upper level terrace to the required subgrade for the building addition.
8. Contractor is responsible for relocating foundation drains to accommodate the new building addition.
9. Contractor shall terminate & properly abandon underground electric lines for the light fixtures that are being removed.

NOTES

1. A topographic survey was performed by Ritter and Plante Associates, LLC during August 2010.
2. Base plans prepared from an electronic drawing file of the site furnished by New Jersey Healthcare System.
3. Vertical Datum is based on NGVD 1929.
4. Storm inlet, manhole, and invert elevations and pipe classifications denoted with an asterisk are referenced on "Rehabilitate Stormwater Lines plan" prepared by Staunton Chow of Jersey City, New Jersey for the Office of Facilities of the Department of Veterans Affairs on May 12, 2009.
5. Approximate Telephone, Water, and Steam locations taken from digital plans provided by VAMC on April 30, 2008.
